Flex Message

Banner

The banner is used as a guiding role by indicating brief, important messages for certain functions or updated services.

It is used to send messages to users and provide related selectable actions. With minimized functions, it can be used for advertisements, promotions, etc.

Anatomy

1. Background

The background container area of Banner.

2. Content Area

You can display text, such as titles or descriptions.

You can also display the Text button, Caption, Label, or apply Action Button.

3. Image area(Optional)

An area where the image related to the banner content is displayed.

4. Optional button area (Optional)

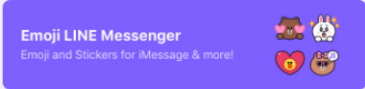

An area where the Close button or More button, to navigate additional functions, is displayed.

Types

The component type is classified according to the usability of the banner.

Promotion Banner Type

Usage

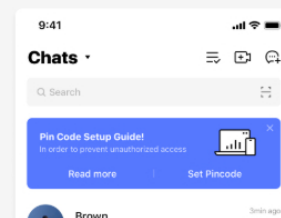

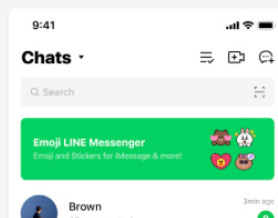

In the LINE app, the banner is used in the following manner.

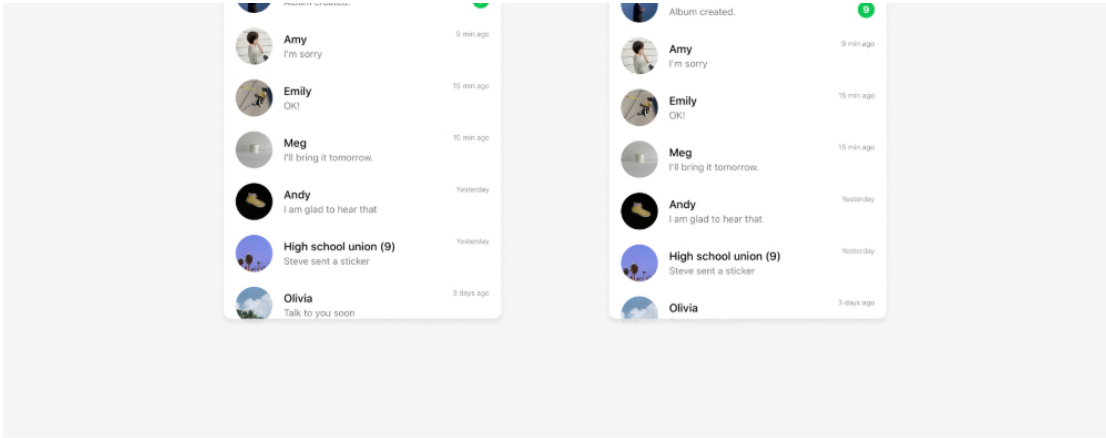

Promotion Banner

A promotion banner is used as above in each tab and feature.

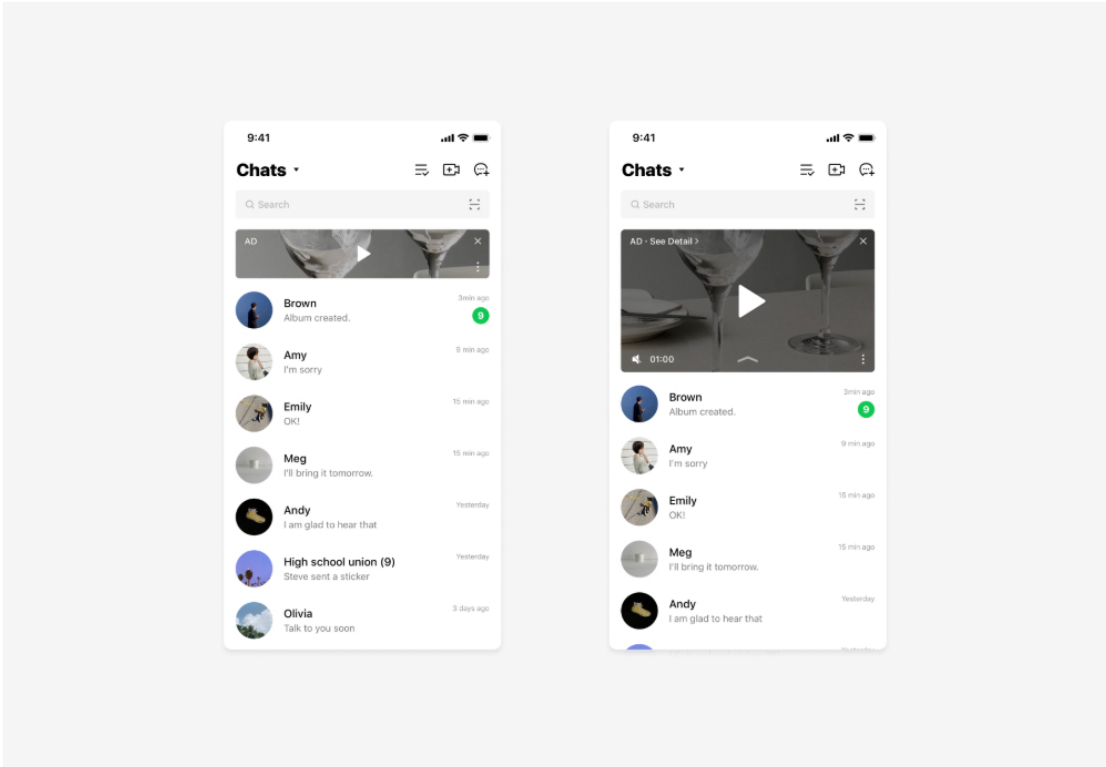

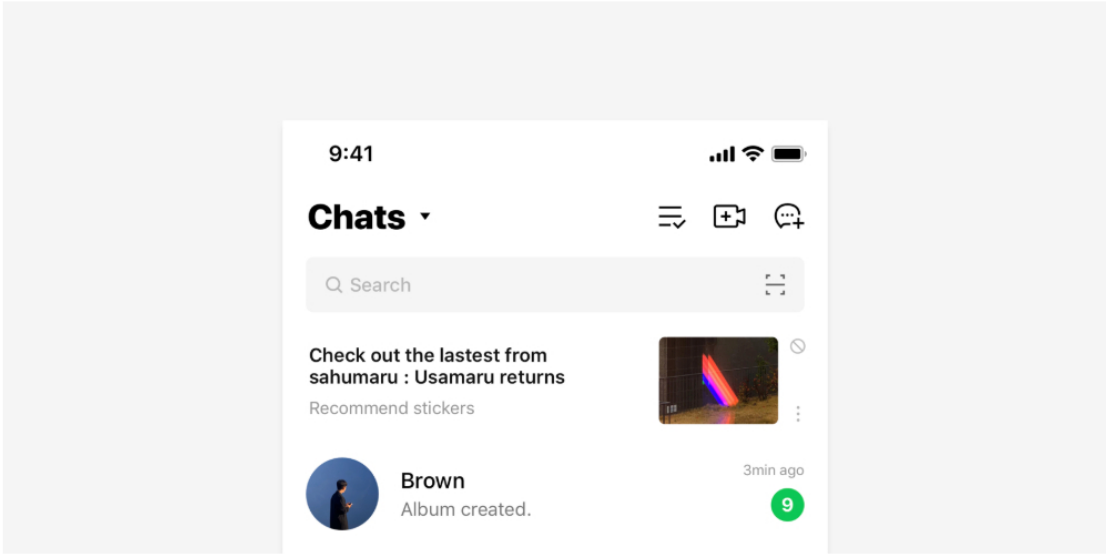

LAN Banner

A LAN banner is used as above in the Chat tab.

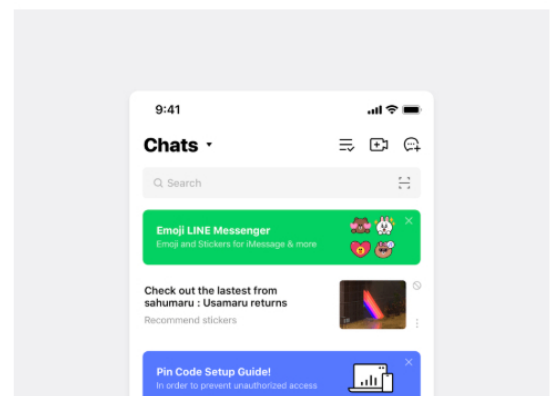

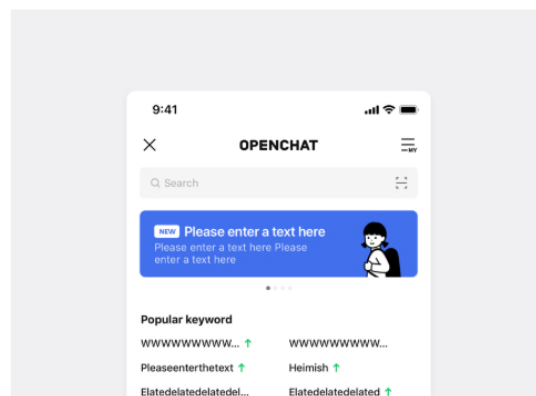

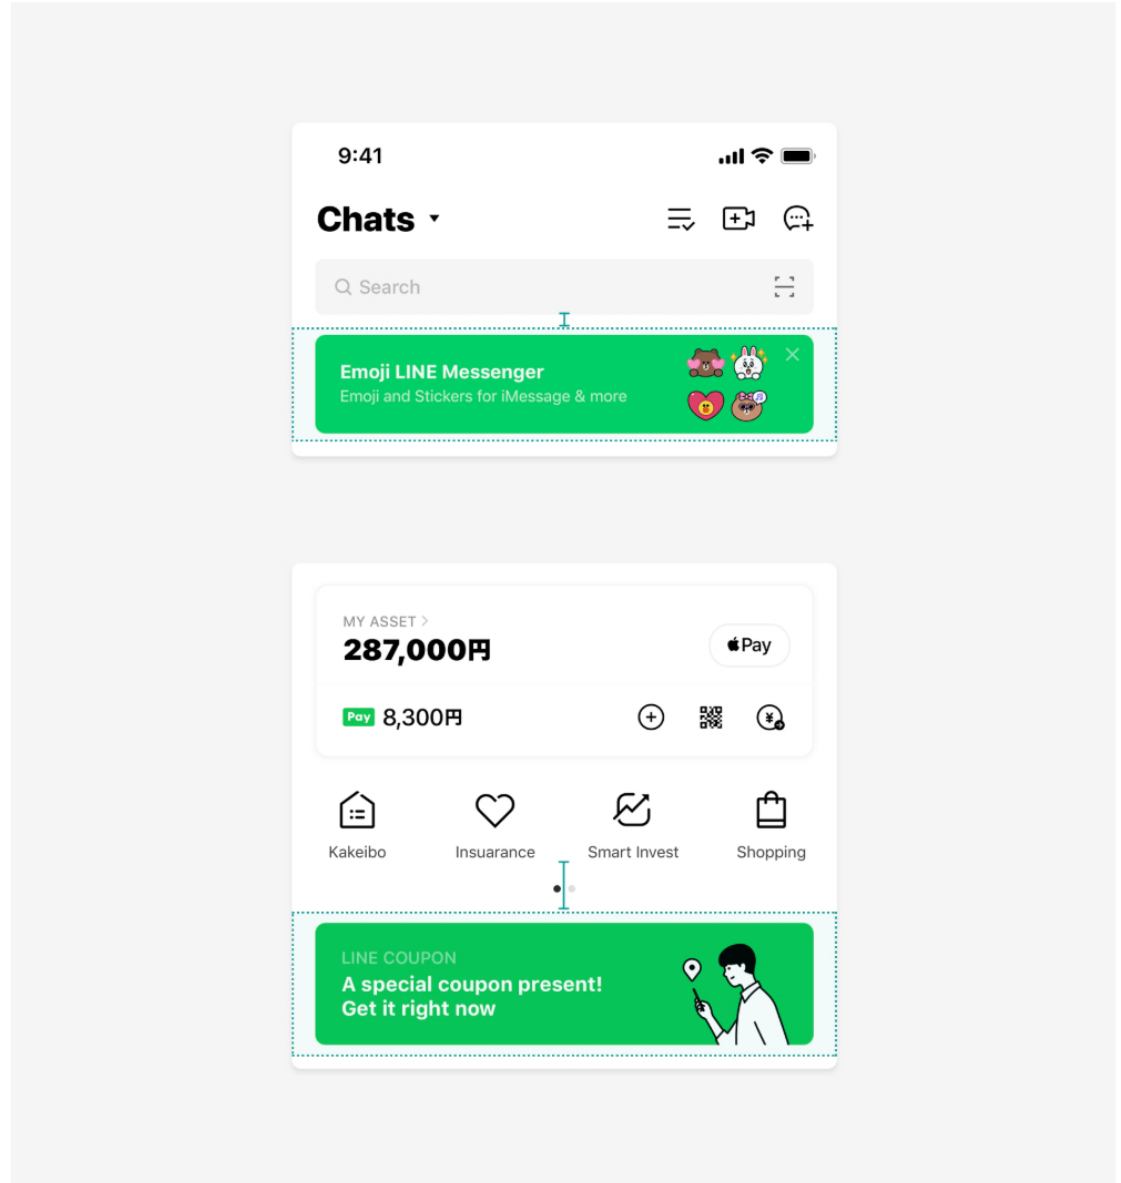

Smart CH

Expand/collapse feature of AD banner can be used as shown above.

Placement

Banner is normally placed below top navigation by default, but can be placed in the content area depending on the usage or the applied environment.

Do

Use of pagination is recommended for providing multiple banners on one screen.

Don't

Stacking multiple banners on one page is not recommended.
