Chats

You can check the LINE design system components used in the conversations between users and the conversation list.

Features

Chat list

A list component with a profile or image placed on the left is used on the Chat tab. The list can be used by making each tab into a folder, and the tab component of LINE design system is used in the chat list.

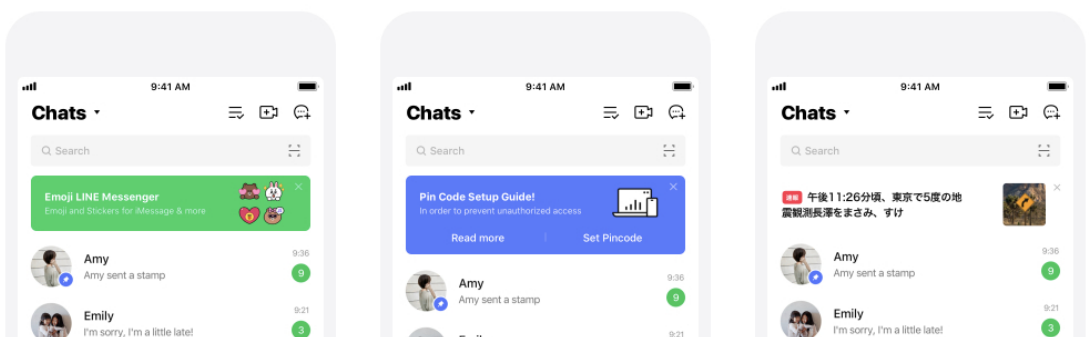

[List >](#)

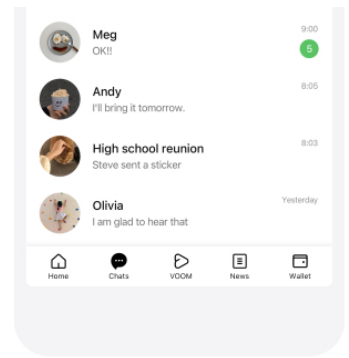

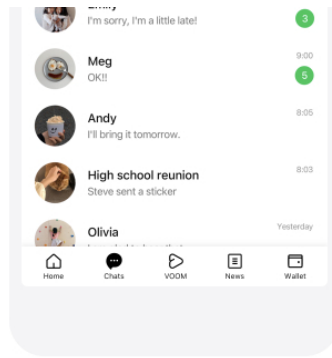

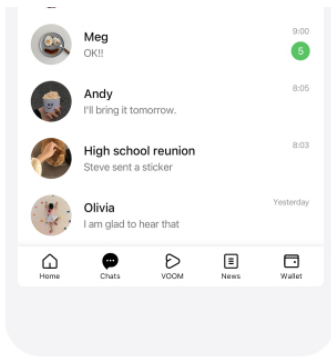

Banner

A banner component for advertisements, promotions, or sending messages to users is used at the top of the chat list.

[Banner >](#)

Share

A task for sharing the details in the chat room is provided as a modal. An automatic modal view is used to provide an interactive experience with the screen below.
