Chip

Chips are components that allow users to make single or multiple selections from multiple items.

Anatomy

1

2

3

4

Chips text

1. Left Icon (Optional)

2. Text Label

3. Right Icon (Optional)

4. Container

Element Patterns and Types

Element Pattern	Text Only	Side Icons	Left Icon	Right Icon
Types	Contained	Outlined		
States	Selected	Unselected	Disabled	
Size	Small	Medium	Large	

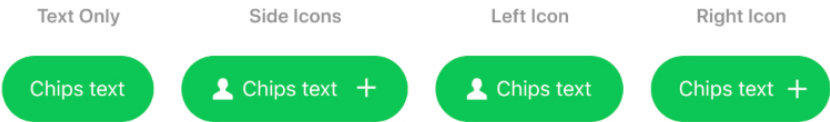

Element Pattern

Overlays

- Popup
- Snackbar
- Toast Overlay
- Tooltip
- Bottom Sheet
- Pulldown Menu

Systems

LIFF View

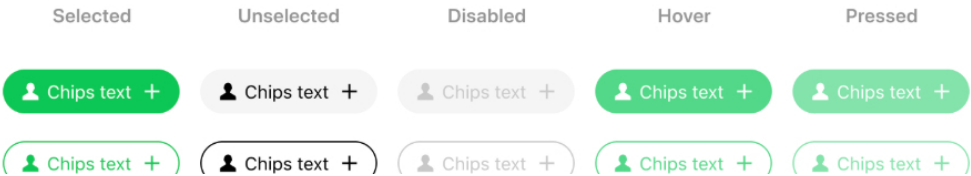

Four patterns are available depending on the situation. Patterns with icons are easier to recognize than the text-only patterns.

Types

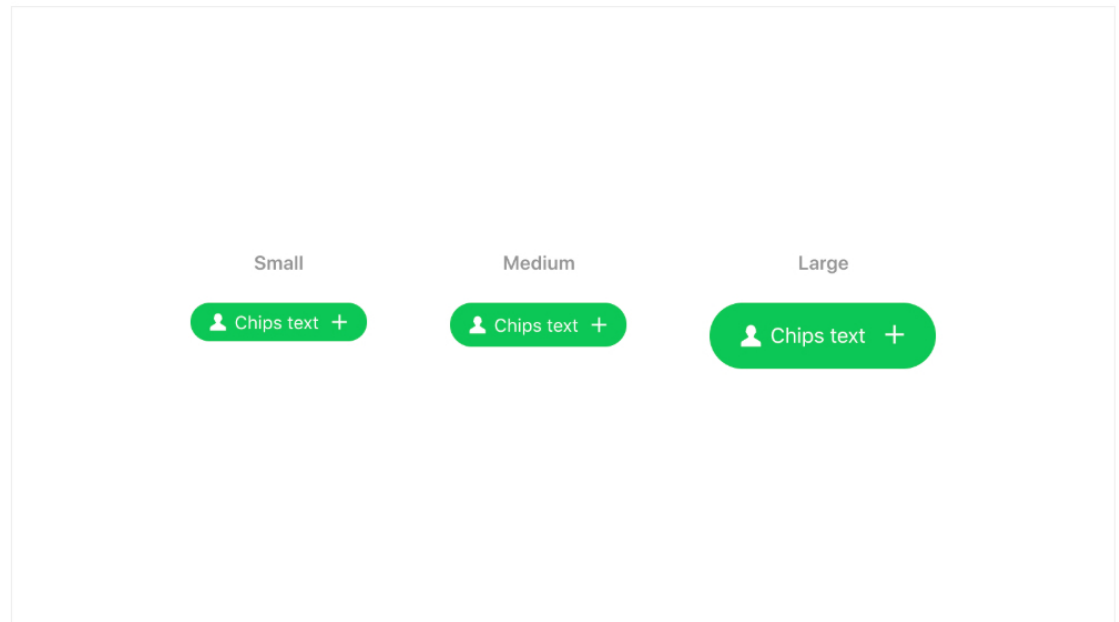

Select "Contained" or "Outlined" depending on the desired design styles and situations. The Outlined type has a lower priority over the Contained type.

States

The Selected, Unselected, and Disabled states are provided. In Selected and Unselected states, Hover and Pressed states are provided depending on the interaction.

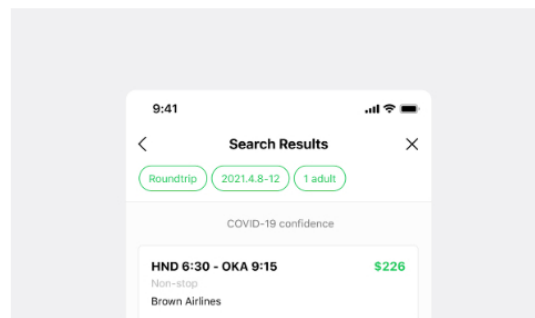

Size

Three sizes are provided: Small, Medium, and Large

Usage

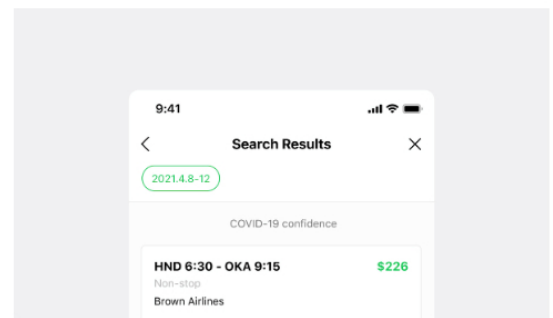

Only Available for Multiple Items

Do

In a chip, the container width is automatically adjusted according to the content length.

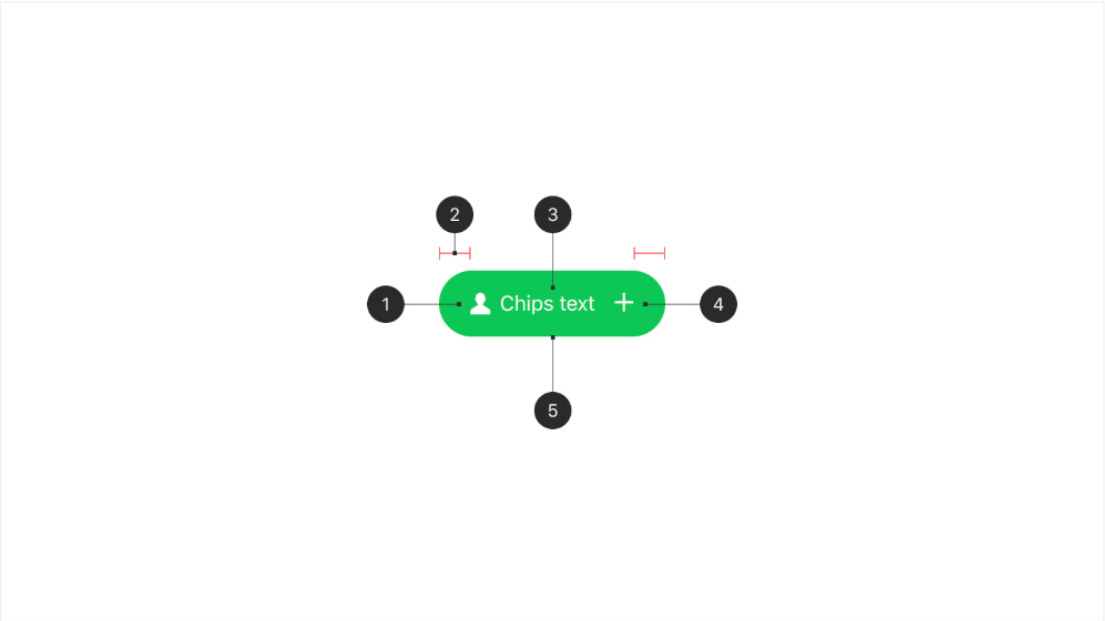

This option is available only when there are two or more items.

Don't

It cannot be used when there is only one chip that can be selected.
