Color Usage

This usage guide is designed to help designers work efficiently. Designers can select from the LINE Color as long as they can meet the readability standards in the guide.

Visualizing Hierarchies Color is a very effective way to prioritize information. You can use colors to arrange information in a hierarchical structure for the audience to intuitively understand the significance of information.

Applying Color to UI

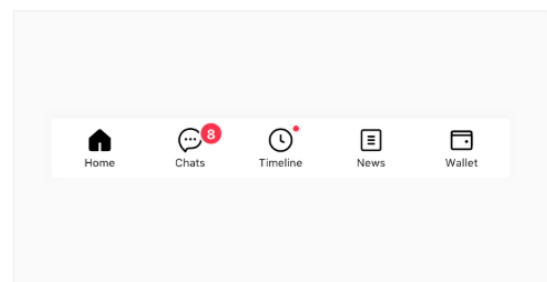

Button

	Line Green	Okay Button BG
	Line Black	Title Text
	Line Gray 600	Body Text
	Dimmed effect 70	BG Dimmed effect

You can apply LINE Green, LINE Red, LINE Gray 500 + or LINE Blue 500 + for buttons. LINE Red and LINE Green are often used as feedback color. However, you need to pay special attention to using these two colors as they can be tricky for the audience with red-green colorblindness.

Navigation Bar

	Line Black	Tab Icon and Text
	Line Red 400	Notification Badge
	Line White	Background

Hashtag, Mentioned, link, etc
