You can check the LINE design system components used in Home, which lets you see the required information at a glance.

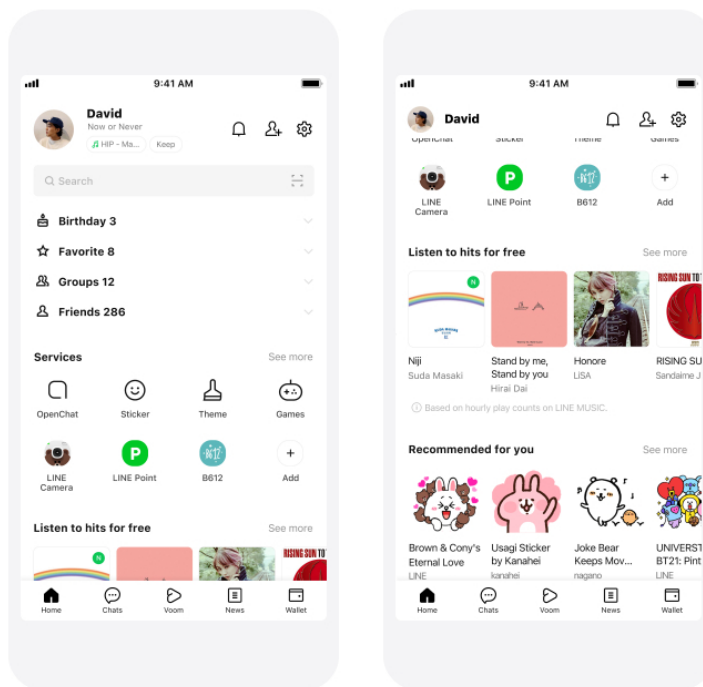

## Features

### Main

Both the Top and Bottom Navigation use LINE design system components. 1-Depth Main Top Navigation Components are applied to the five main tabs in LINE app. The Top Navigation in Home tab shows abbreviated information when the page is scrolled up.

[Top Navigation >](#)

[Bottom Navigation >](#)

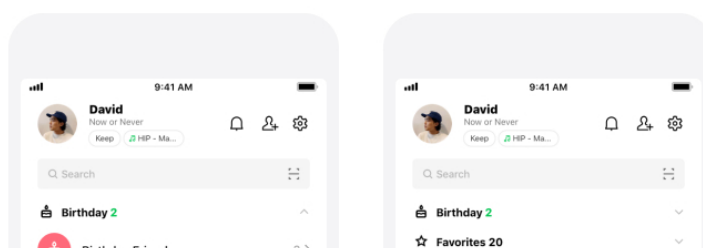

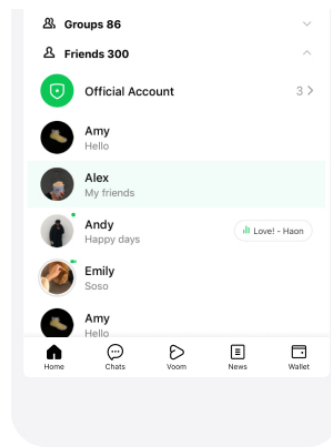

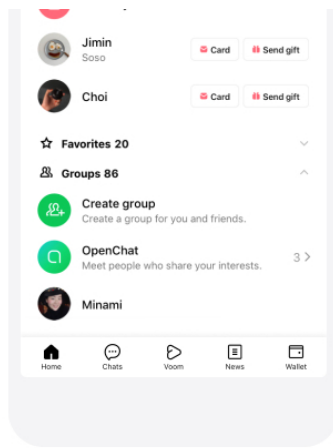

### List

List components and List Header components are used in Birthday Friends Lists, Favorites, Groups, Friend lists etc. List Headers may provide actions of moving, filtering and drop-down according to their right-hand buttons.

[List >](#)

[List Header >](#)

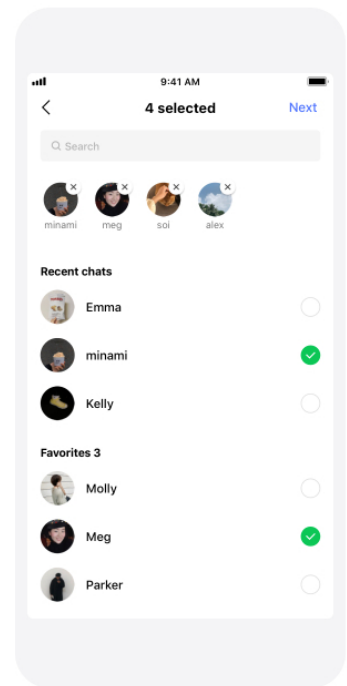

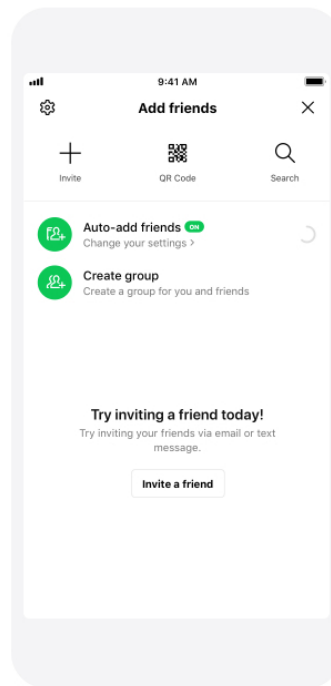

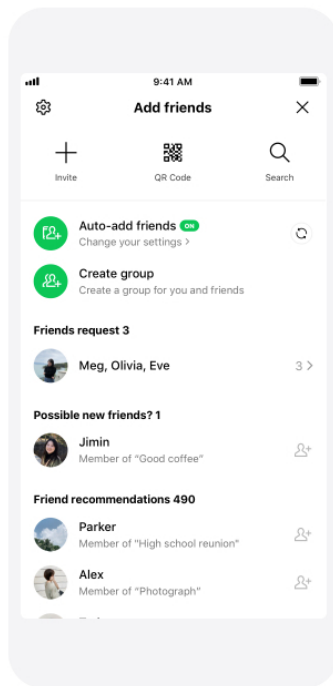

## Add friends

When you tap the Add friends icon, you can enter the friend-adding flow. The to-be friend list use Lists and List Headers, and when there are no friends to show, Empty components appear to show the list has nothing to display.

## New feature guide

You can inform the users about new updates or notable information about certain features with LINE design system components such as Banners or Bottom Sheets.

In LINE Home, new features are announced according to the guidelines of Bottom Sheets from New Feature Guide.
