Flex Message

Icon button

Icon button uses an icon as a button. If the space is not enough or the icon is a metaphor intuitive enough for users to understand, you can use the icon button along without any label.

Anatomy

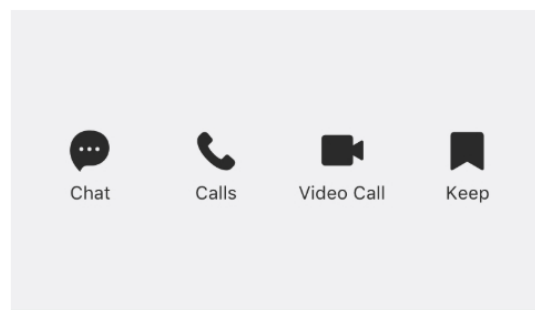

1. Icon

This is an icon area representing the content and nature of the button.

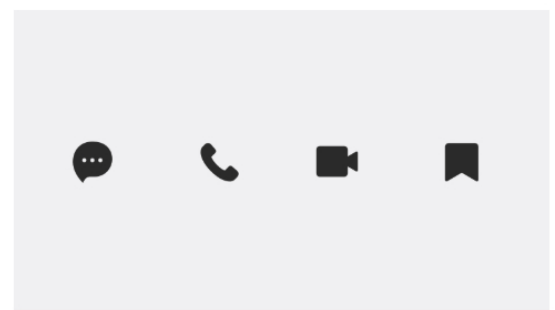

2. Text (Optional)

If it is difficult to impart the content of the button with an icon alone, you may additionally display the text.

Do

Use simple text so that everyone can understand easily.

Caution

Pay close attention whether the icon delivers the message well, especially if it is used alone as a button.

States

Active

Chat

This is an enabled status.

Inactive

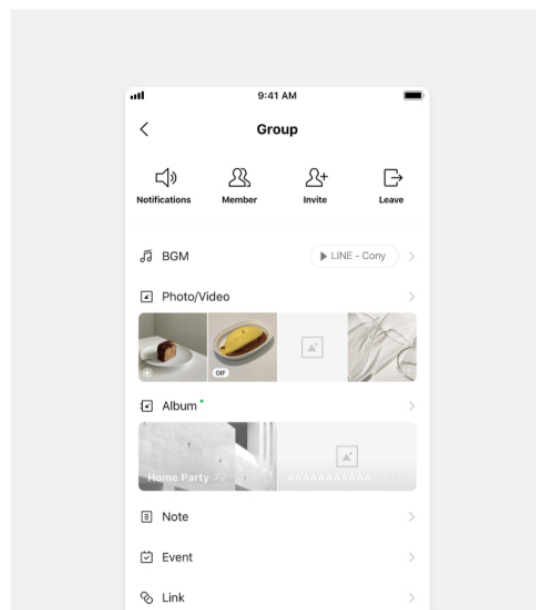

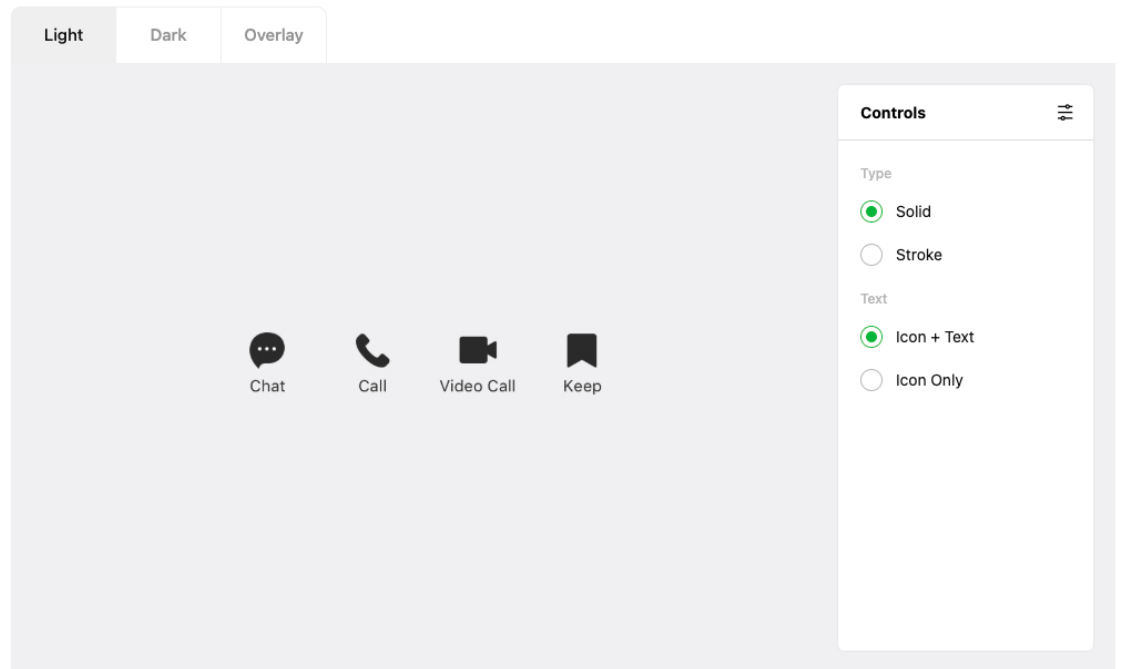

Chat

This is a disabled status.

Types

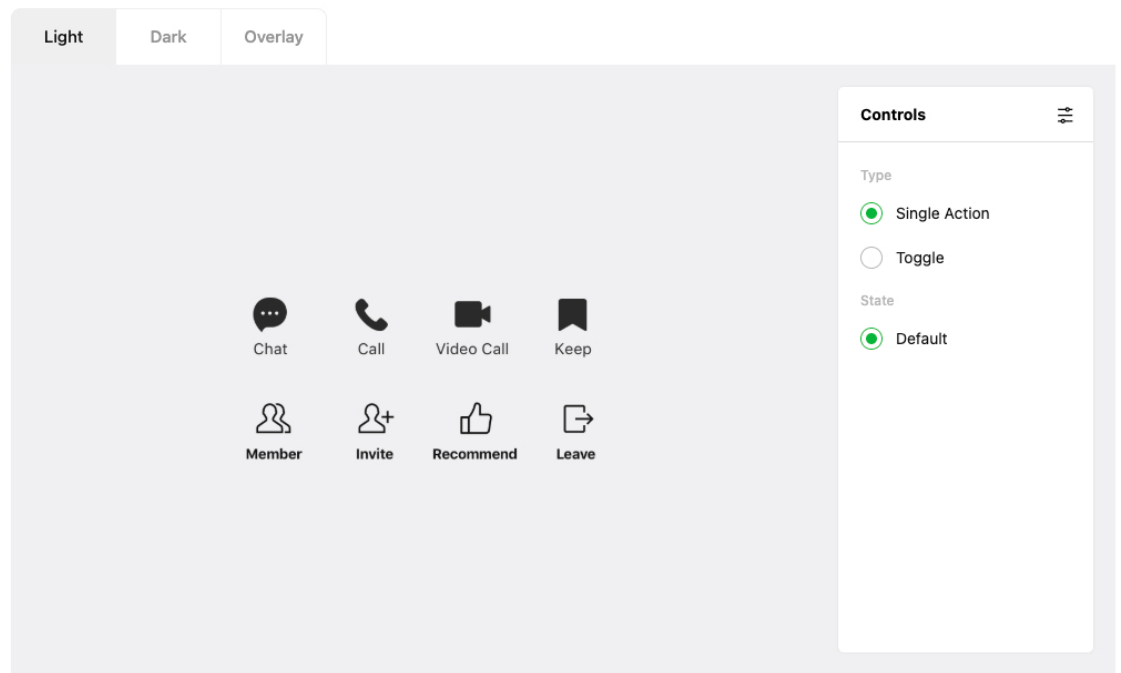

Icon type

Do

It is recommended to put the text below for accurate delivery of the message.

Single Action & Toggle Type

Single
Action

Chat

Button performing a single action.

Toggle

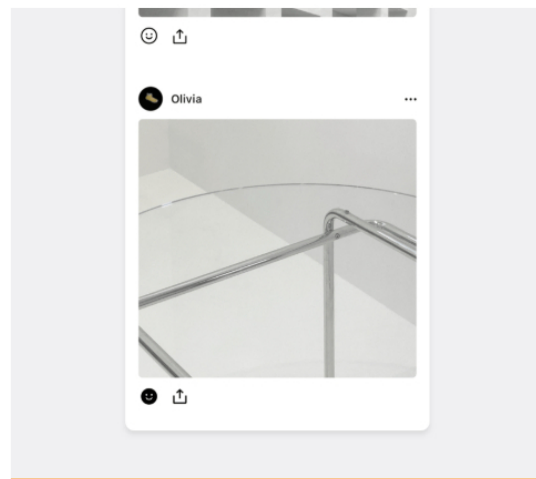

Mute

Unmute

It can be used as a toggle button to select or unselect a single item.

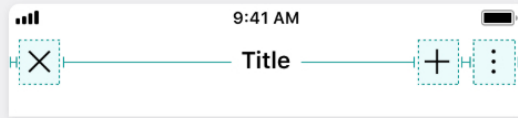

Caution

It should clearly indicate the status of the toggle button so that users can recognize the status right away.

Usage & Placement

Place icon buttons as per need.

Top Navigation

Icon buttons should be placed with an internal margin on the left and right in Top Navigation.

Bottom Navigation

There should be the same spacing between buttons in Bottom Navigation.

List / List Header

Icon buttons should be placed with a margin on the right in the List and List Header.

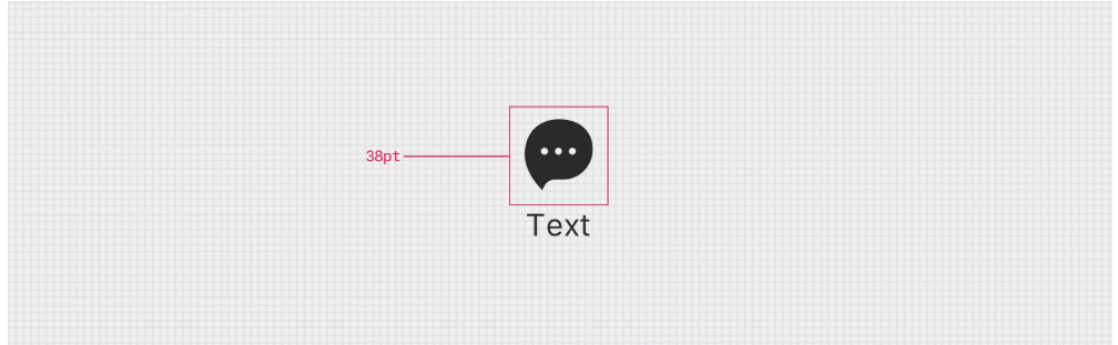

Toolbar

There should be the same spacing between buttons in Toolbar.

Design spec

Icon button does not allow design customization.

As Icon button included no margin within the component, design QA is required for Placement.

Floating Action Button

Text Button
