# LINE VOOM

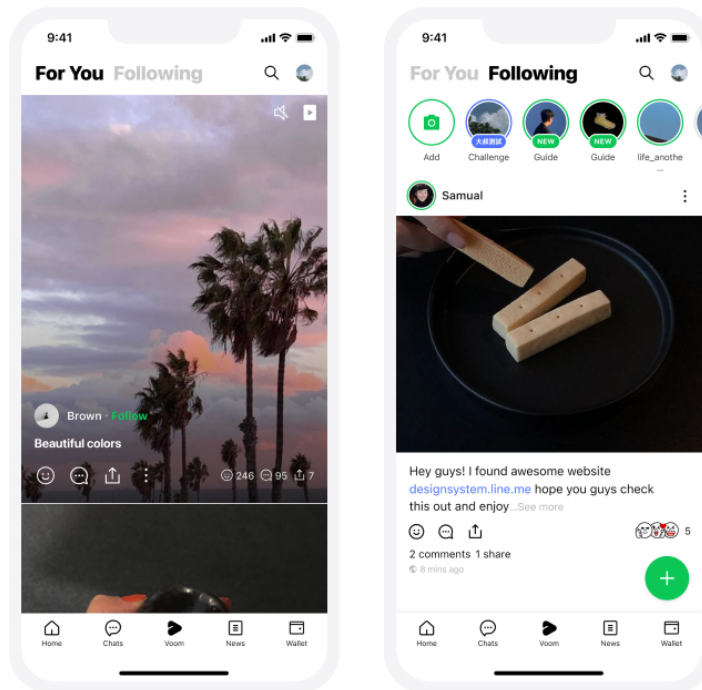

You can check the LINE design system components used for the LINE VOOM to share the interested posts and activities.

## Features

### Top navigation tab

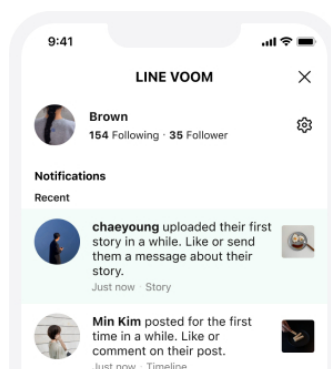

Use an LINE design system component in the top navigation. You can provide the top navigation of LINE Design System in tab form. If the top navigation is used as a tab, the number of tabs may not exceed two.

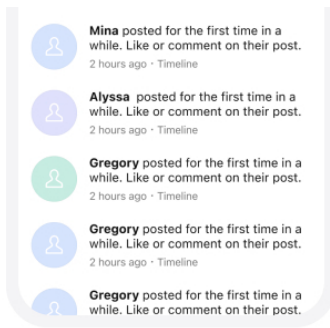

[Top Navigation >](#)

### Notification

The full screen modal view is used for the LINE VOOM Notification.

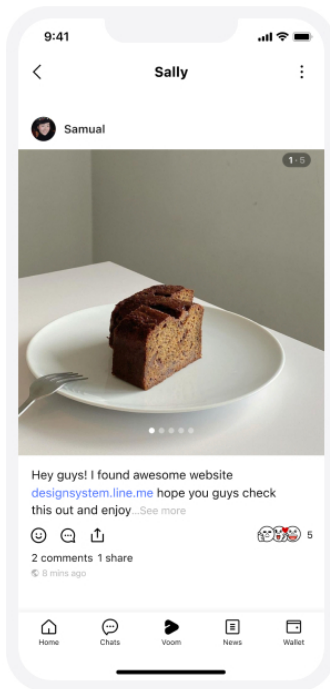

## Pagination

Guide the point which the user belongs to with the pagination component of the number and dot format in the LINE VOOM. Let users acquire information without confusion and use the service smoothly by informing them the amount of information provided and the user's current point.

[Pagination >](#)

## Image grid

Use the image grid component to align images in a list. Icons in the top-right corner are used to provide information on the image. Icons with motion may be included depending on the situation.
