LIFF View

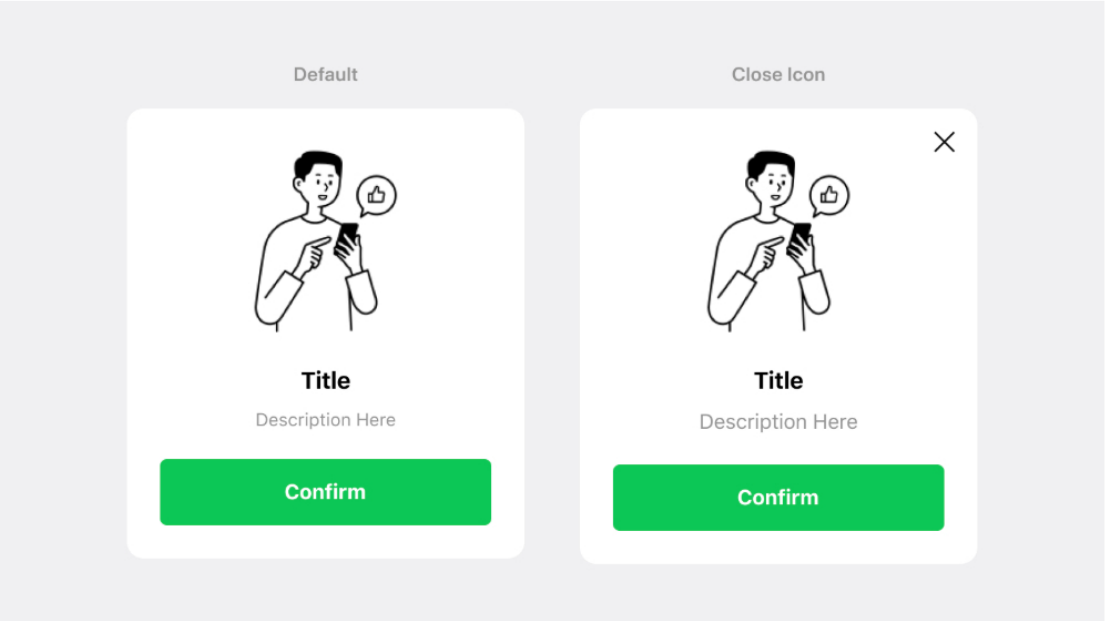

Depending on the pattern of the element, we provide four pop-ups: Text Pop-up, Avatar Pop-up, Image Pop-up, and Full Image Pop-up.

Element Pattern	Description
Text Popup	A basic alert pop-up. Used when user confirmation is important.
Avatar Popup	A pop-up with an avatar image. Mostly used to add an OA account.
Image Popup	A pop-up that can use images, titles, and text with two different ratios together to give feedback on the results of the action or receive confirmation. Image ratios: Horizontal 4:3 and 16:9
Promotion Popup	A pop-up that provides all areas other than the button area as an image. Mostly used for advertisement images. There are four image ratios: Horizontal 4:3, Horizontal 16:9, 1:1, and Vertical 4:3

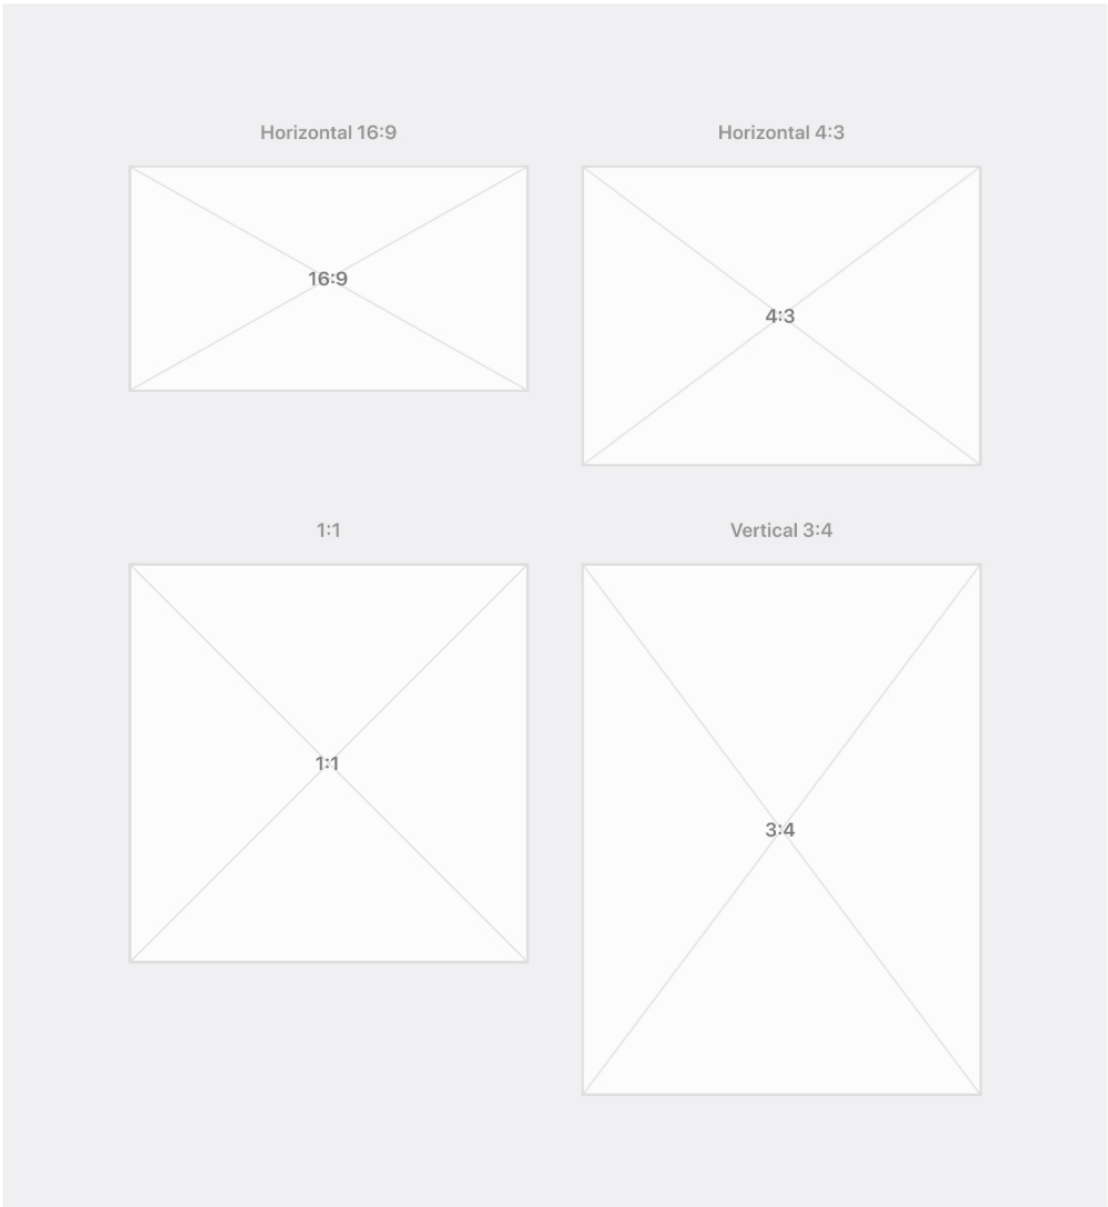

Child Elements

Header

You can use a close icon button in the header area.
Be careful when using the close icon button since it makes it difficult to close the pop-up.
You can also change the color of the close button if necessary.

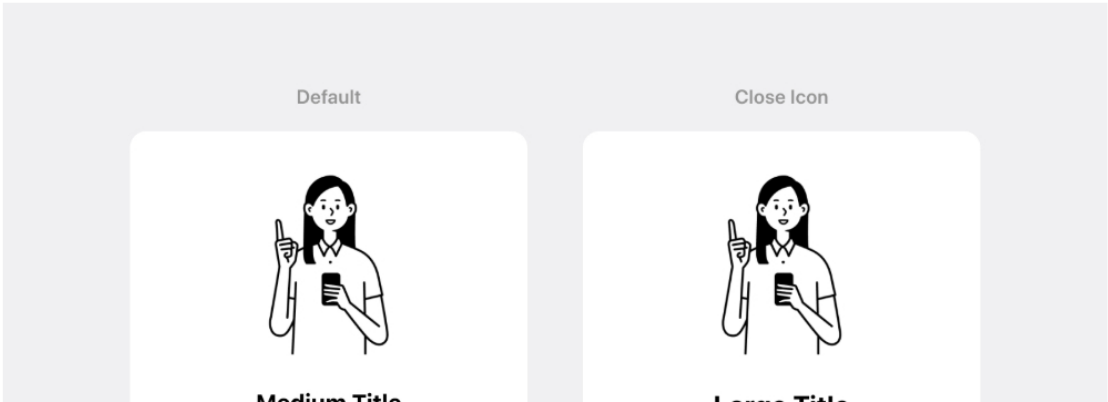

Image Option

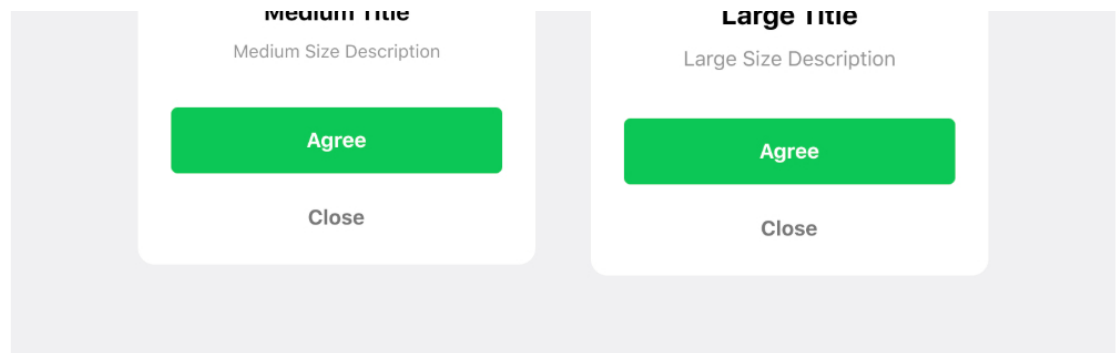

Choose from four different image ratios: Vertical 4:3 and 1:1 can only be used for the promotion pop-ups.
We recommend you follow the guidelines included in the library file when creating an image file.

Patterns	Horizontal 16:9	Horizontal 4:3	1:1	Vertical 4:3
Image Popup	O	O	X	X
Promotion Popup	O	O	O	O

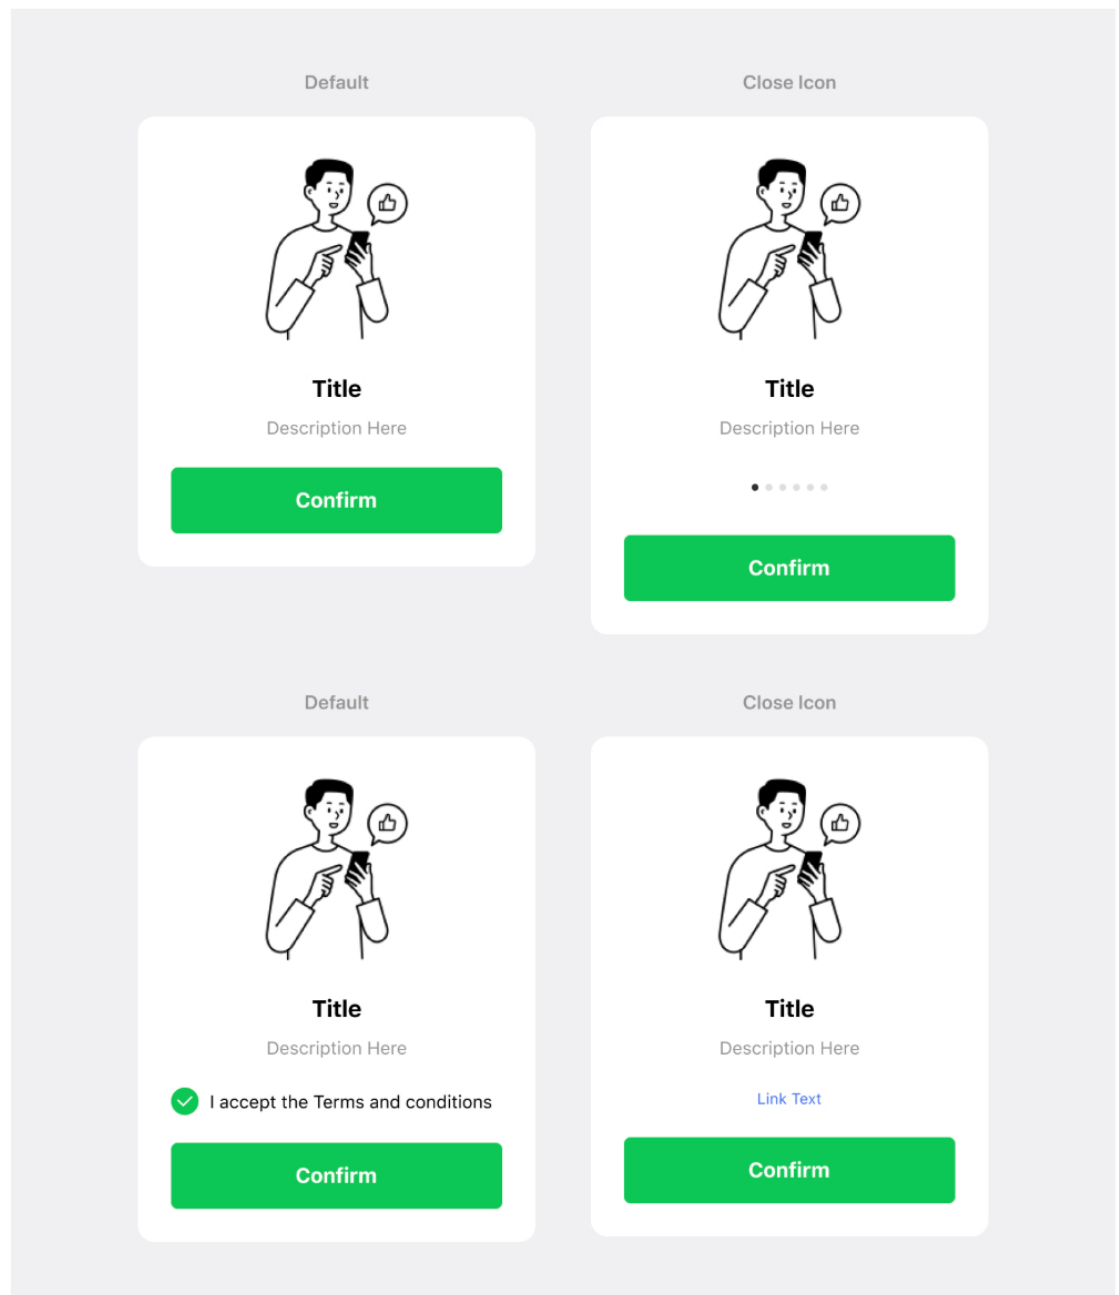

Title & Description

The title and description are available in two sizes.
 The default size is medium.
 Use the large size if the title needs to be emphasized.

Additional Items

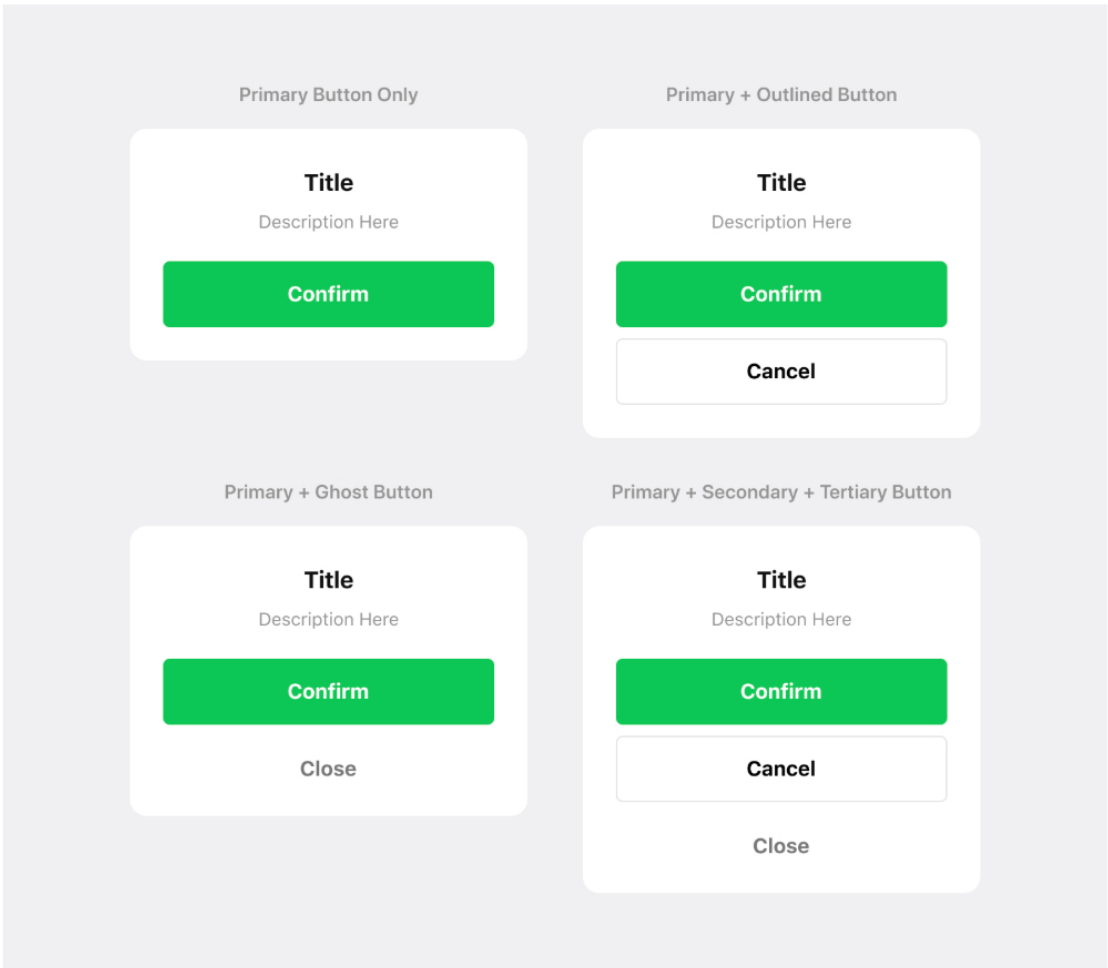

In addition to basic elements, such as images, text, and buttons, you can also use additional elements in the pop-up.
 Each additional element will work as expected.

Button Area

You can select and use vertical and horizontal buttons in the button area

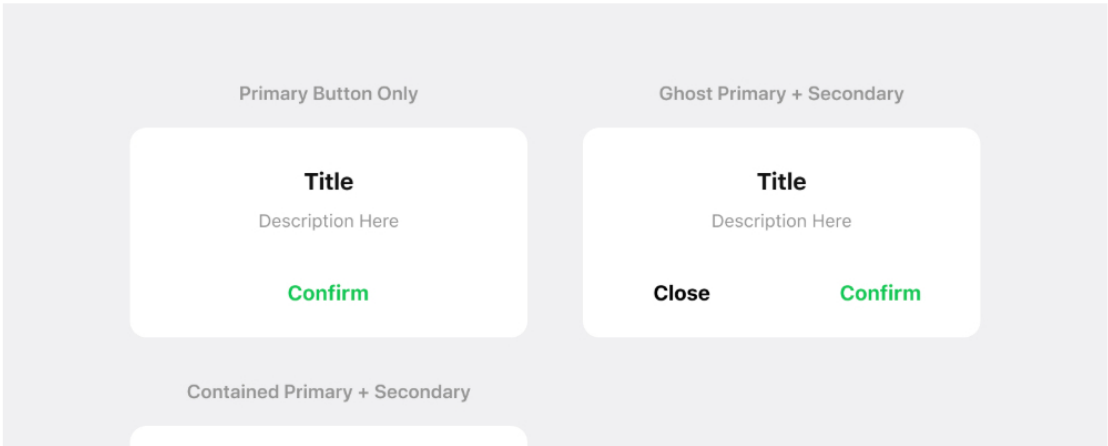

Vertical buttons have more visibility. We recommend you use vertical buttons when your pop-up contains a lot of content. For simple pop-ups, we recommend you use horizontal buttons instead.

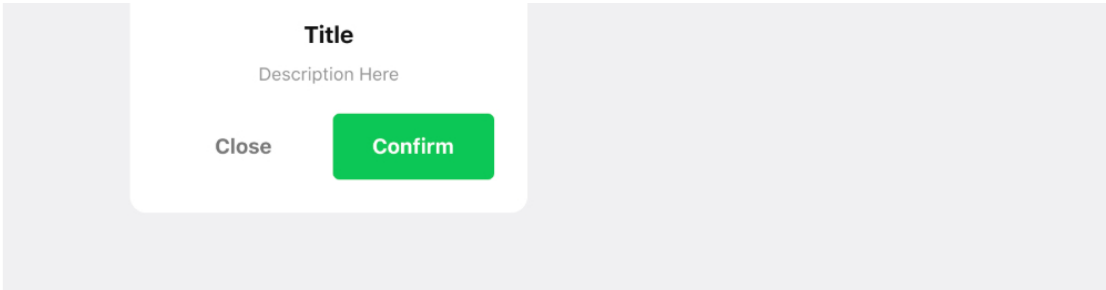

Vertical Buttons

Element Pattern	Description
Primary Button Only	Used when it requires only one action, such as a simple confirmation.
Primary + Outlined Button	Used to emphasize the secondary action.
Primary + Ghost Button	Used when you want to use two buttons while emphasizing the primary button.
Primary + Secondary + Tertiary Button	Using three buttons is not recommended. Use them only if necessary.

Horizontal Buttons

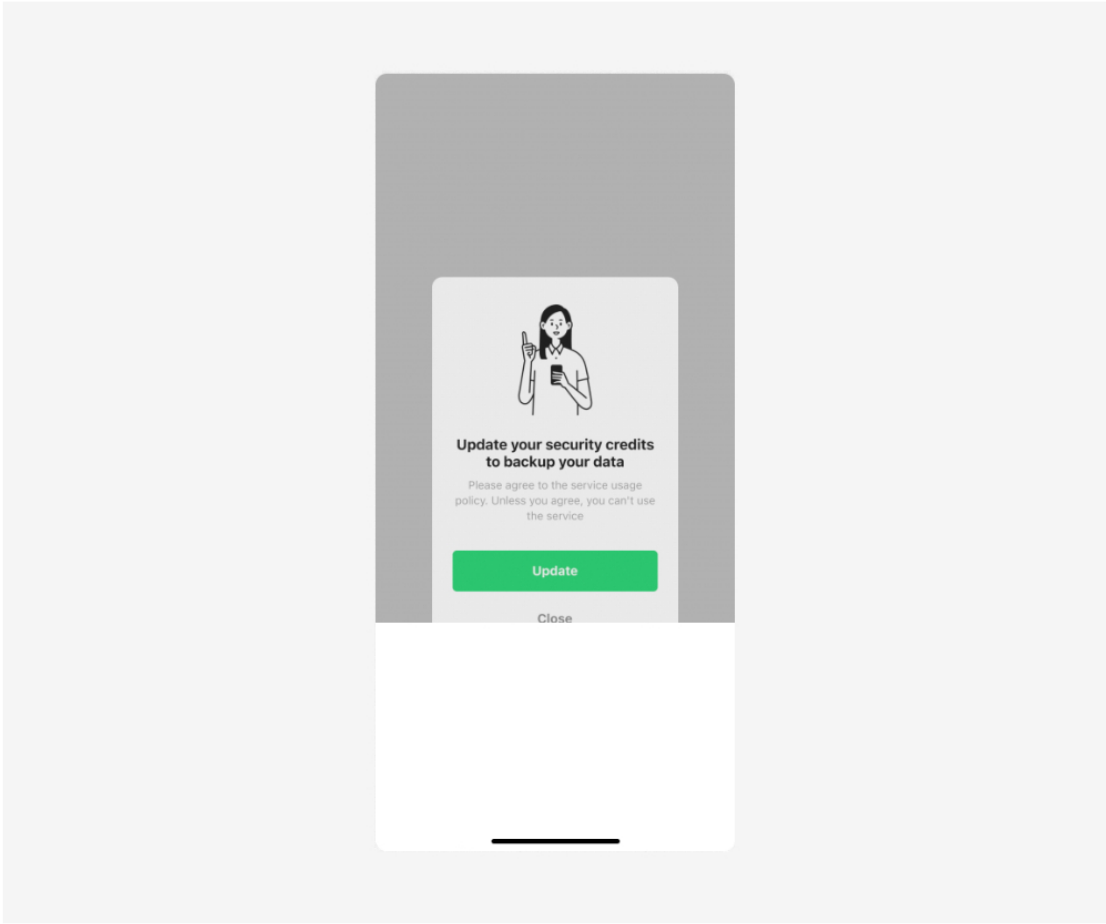

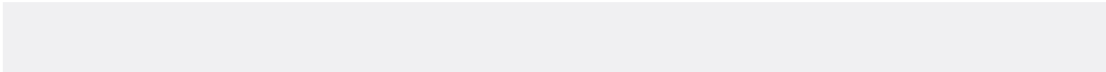

Element Pattern	Description
Primary Button Only	Used when it requires only one action, such as a simple confirmation.
Ghost Primary + Secondary	Used when you have two options and it is not necessary to emphasize the primary action.
Contained Primary + Secondary	Used when you have two options and it is necessary to emphasize the primary action.

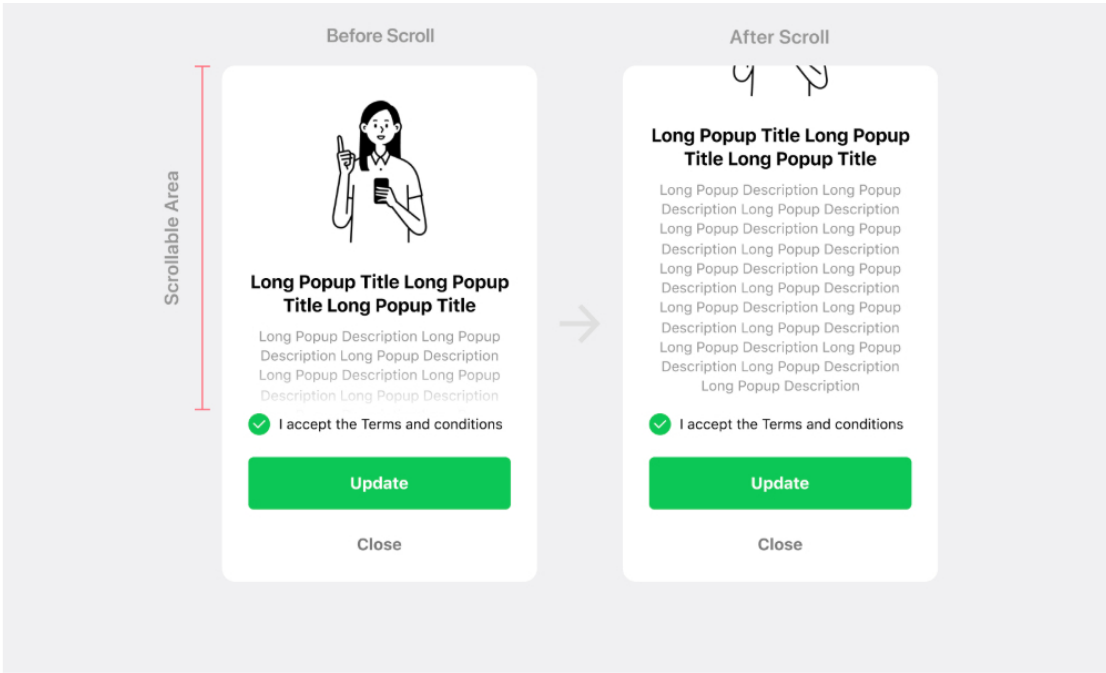

Behavior

Appear / Disappear

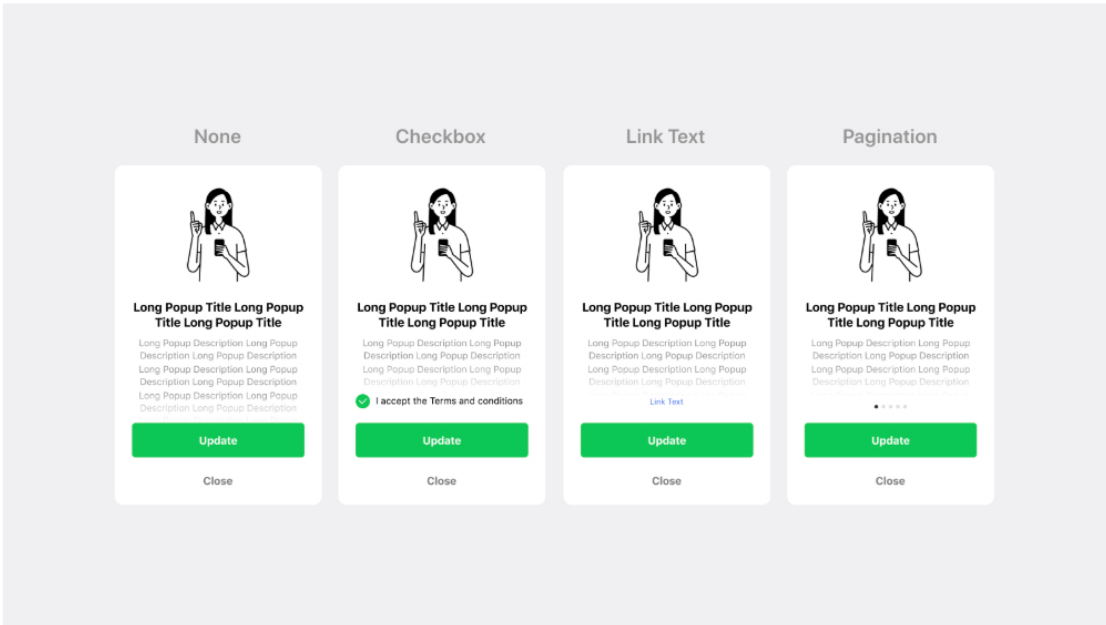

Scroll Area

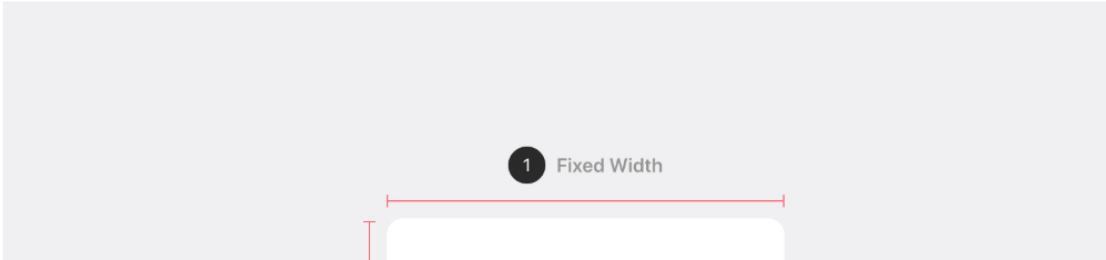

If the content is longer than the maximum height or the set height, the top area automatically becomes the scroll area.

Element	Description
1 Fixed Width	- Fixed Width: 288px - Width cannot be changed.
2 Auto Height	- Height cannot be changed. It is determined depending on the content and image ratio. - The maximum height is 504px. Be careful not to exceed it. - When using LIFF, a pop-up of 472px or higher may overlap the LIFF close button on a small device, such as iPhone SE. - If the pop-up height exceeds the maximum height, the top area is scrolled. - For greater pop-up heights, we recommend you use the bottom sheet.

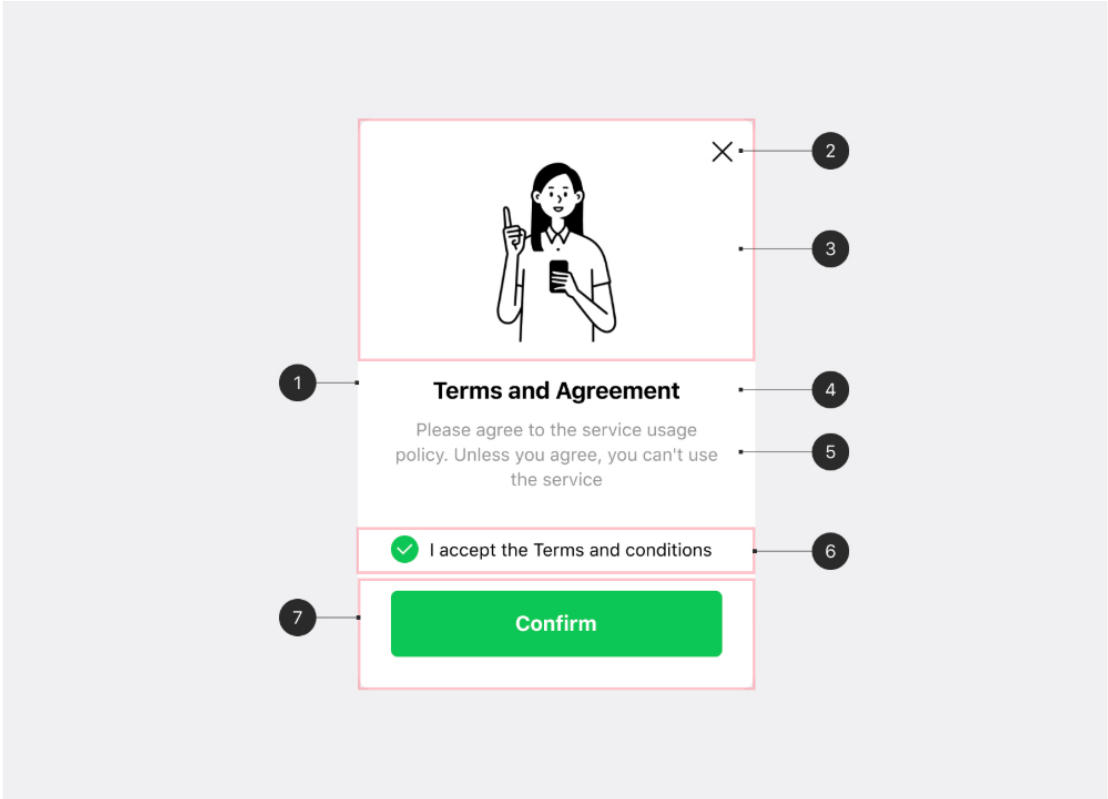

Placement

Pop-ups are placed in the middle of the device by default.
The left and right margins (x-axis values) cannot be changed.
The up and down margins can be changed.

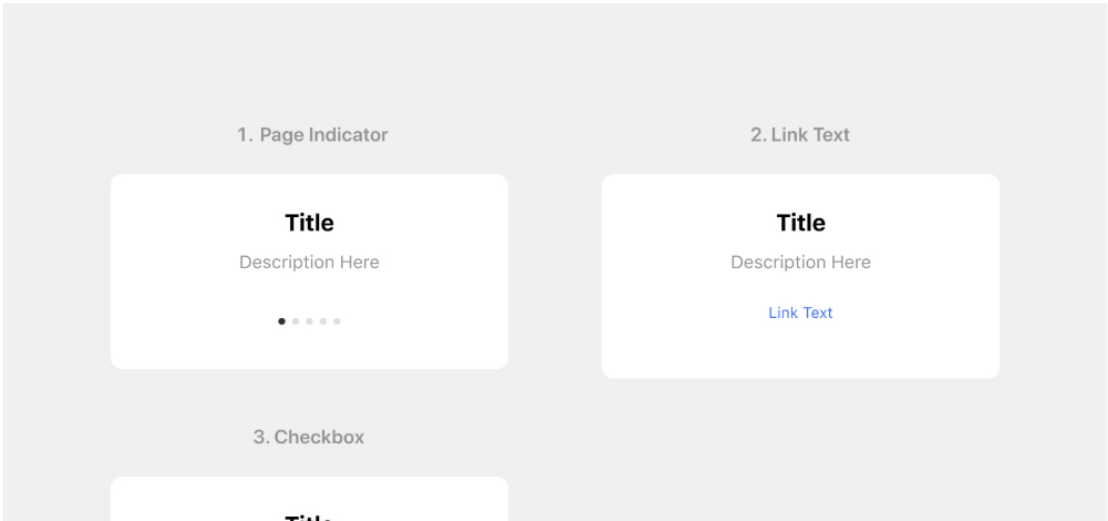

Styles

Element	Properties
1 Container	- Width: Fixed, 288px - Height: Auto - Max-height: 504px - Background Color: Changeable - Default: Idsg-color-white
2 Close Button (Optional)	- Color: Changeable - Default: Idsg-color-gray-900
