Pulldown Menu

Pull-down menus are used with components, such as pull-down buttons or icon buttons. Menu options are provided as a list in the top layer.

Anatomy

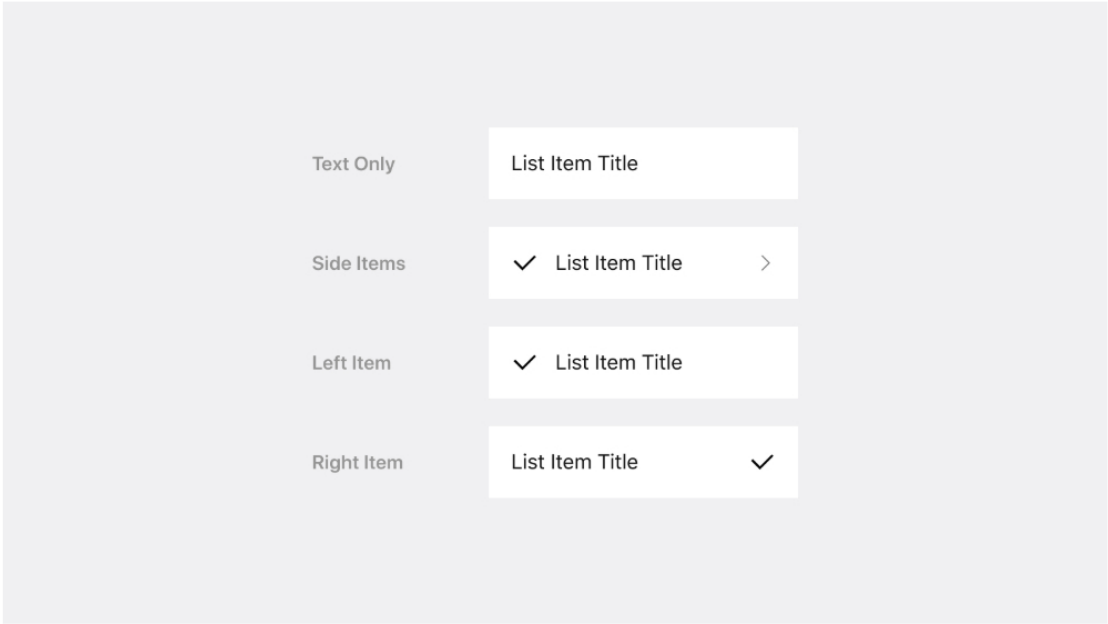

The diagram illustrates the components of a pulldown menu. It shows a container (1) containing a title (2), a header (3), and a list of items (4). Each item consists of a left item (5), a text label (6), and a right item (7). The list items are separated by dividers (6).

Element Patterns and Types

Element Pattern	Text Only	Side Items	Left Item	Right Item
States	Enabled	Disabled		
Title	True (Default)	False		
Left Item (Left)	Avatar	Icon	Slot	
Right Item (Right)	Arrow	Arrow + Text	Text	Icon

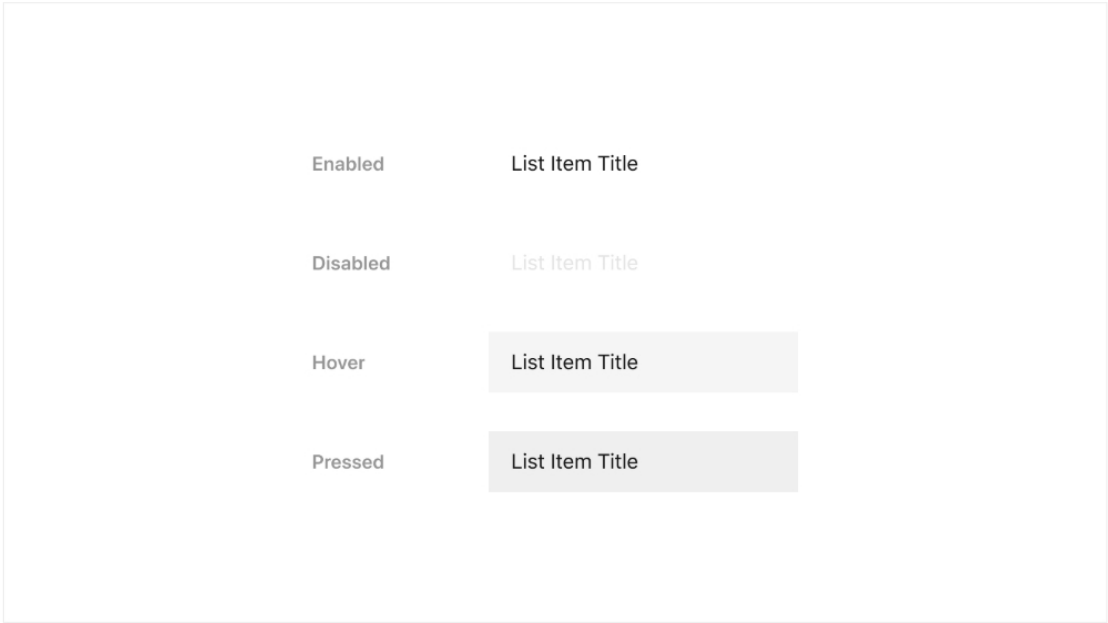

Right Item (Right)	ALLOW	ALLOW TITIAL	REAL	ICONT	SIGN
Divider	True	False (Default)			

Pulldown List Item Patterns

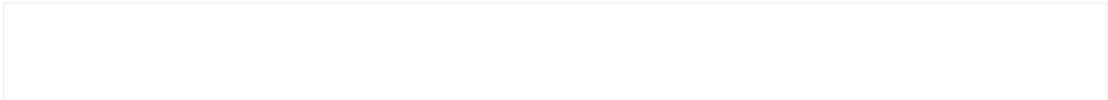

Four patterns are available: Text only, side items, left item, and right item Patterns with icons are easier to recognize than the text-only pattern.

States

Four states are available.
The Hover state is used for PC web only.

Title

True

Pulldown Header

List Item Title

List Item Title

False

List Item Title

List Item Title

You can select whether to provide a title.

Left Item

Avatar

 List Item Title

Icon

 List Item Title

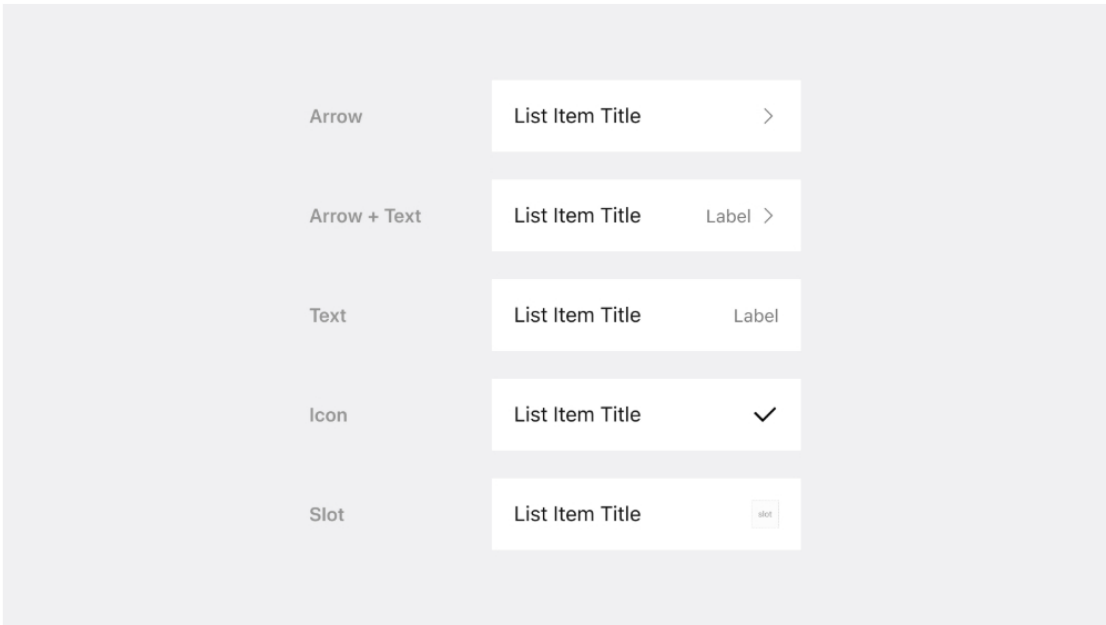

Slot

 List Item Title

Three types are available.

Option Name	Description
Avatar	- An avatar is a component used to describe a user, which may be composed of an image or text from the user name. - For more information, see Avatar.
Icon	- You can customize the icon and the action associated with the icon. - We recommend that you use LAICON. - For more information, see Iconography.
Slot	You can use a slot to add elements other than those provided by default (e.g., images, graphics).

Right Item

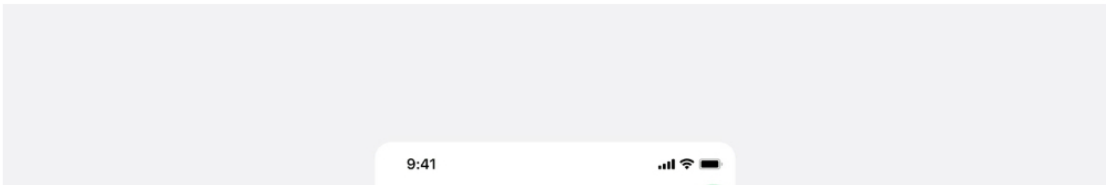

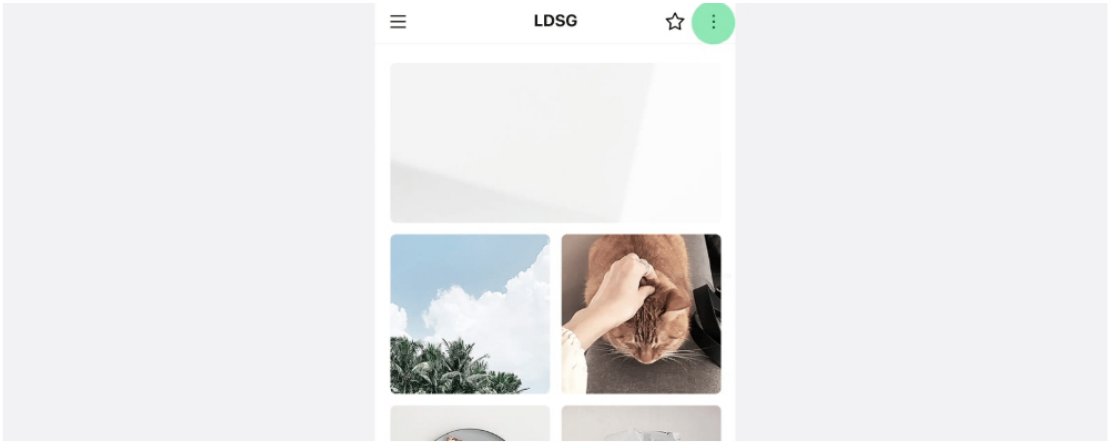

Five types are available.

Option Name	Description
Arrow	Used as a button to move to another page (e.g., View more button).
Arrow + Text	- Used as a button to move to another page (e.g., View more button). - A label is used to provide a summary of the information set on the next page.
Text	- Used as a button to move to another page (e.g., View more button). - A label is used to provide a summary of the information set on the next page.
Icon	- You can customize the icon and the action associated with the icon. - We recommend that you use LAICON. - For more information, see Iconography.
Slot	You can use slots to add elements other than those provided by default (e.g., images, graphics).

Behavior

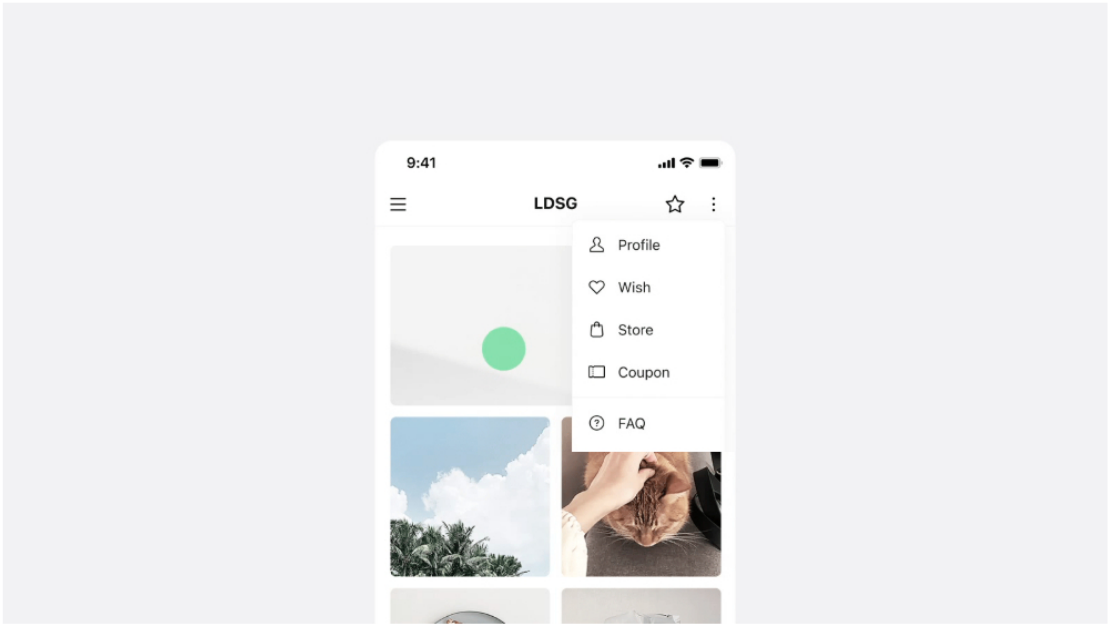

Open Pulldown Menu List

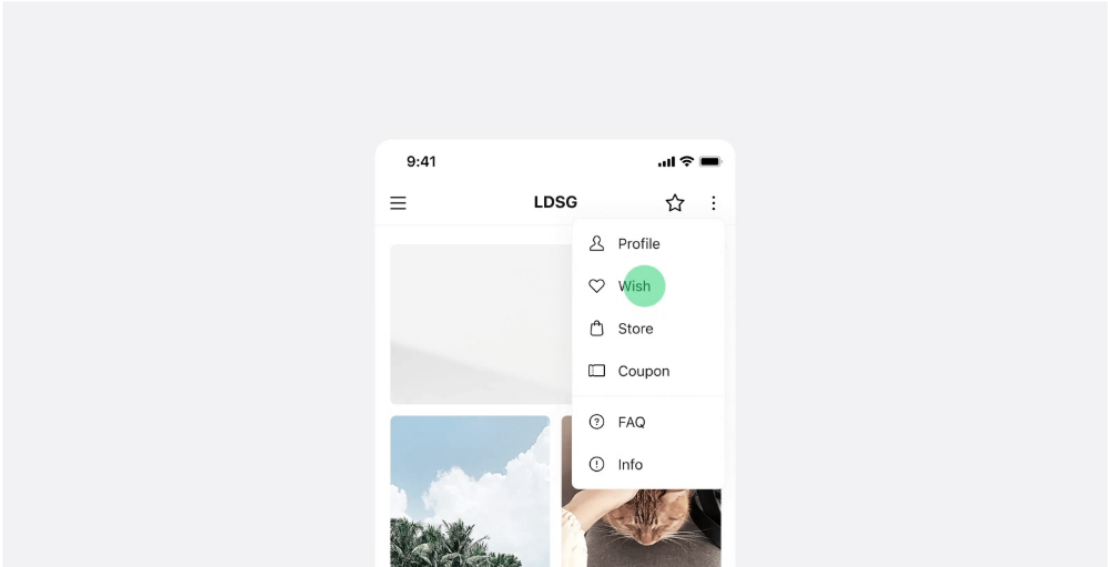

Select the button to open the menus.

Close Pulldown Menu List

Tap anywhere outside the pull-down menu to close it.

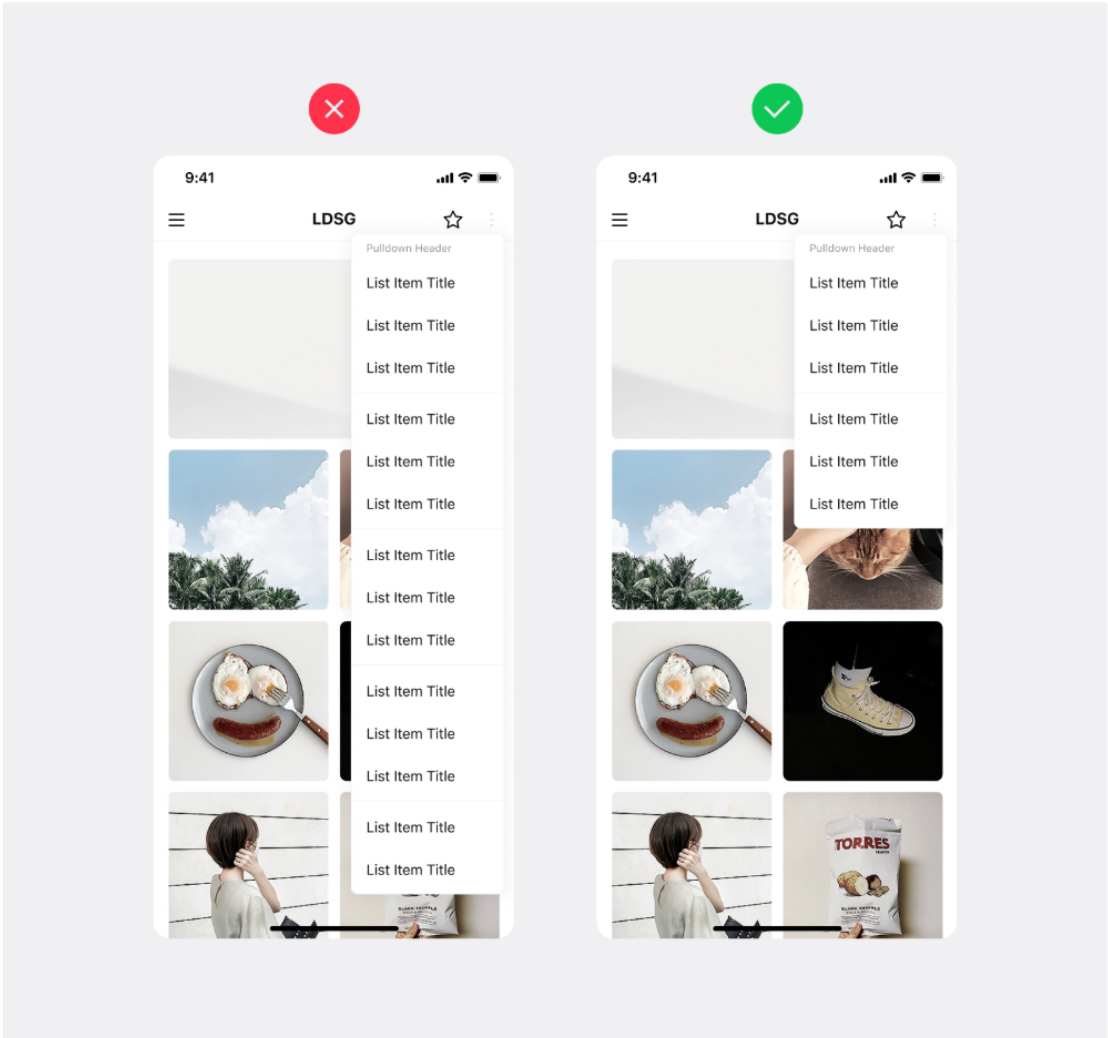

Pressed Pulldown Menu List

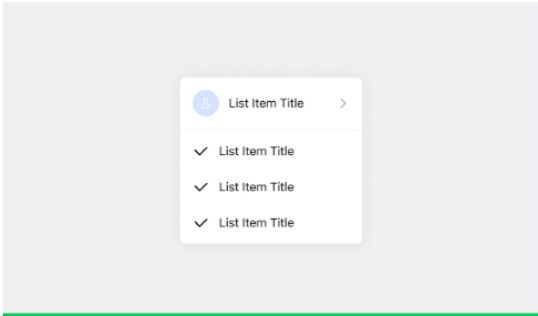

Press an item to move to the corresponding page.

Usage

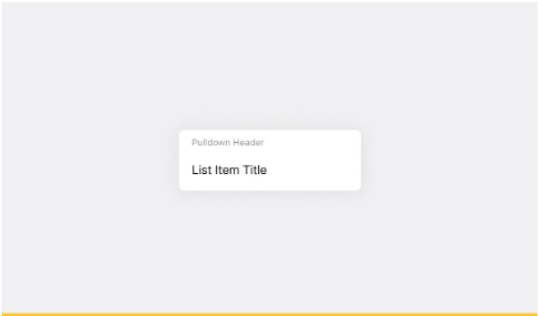

Mobile

Suitable for a list of six items or less.
For greater pop-up heights, we recommend you use the bottom sheet.

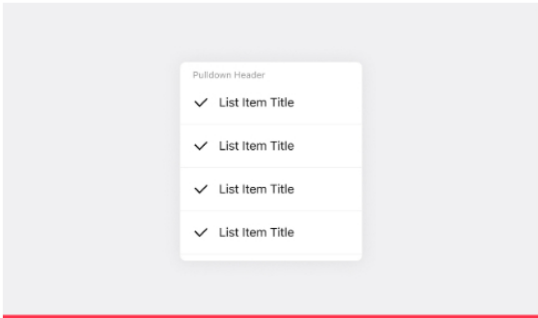

Do
Can be used with other types of items.

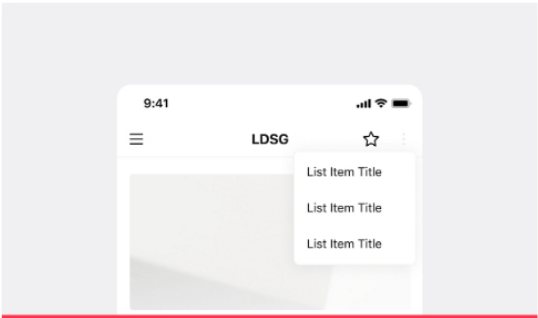

Caution
We do not recommend you use a header when presenting a single list.

We recommend you use a divider to make them more easily distinguishable.

Don't

Do not use dividers between all items in the list. In particular, do not use a divider for the item at the bottom.

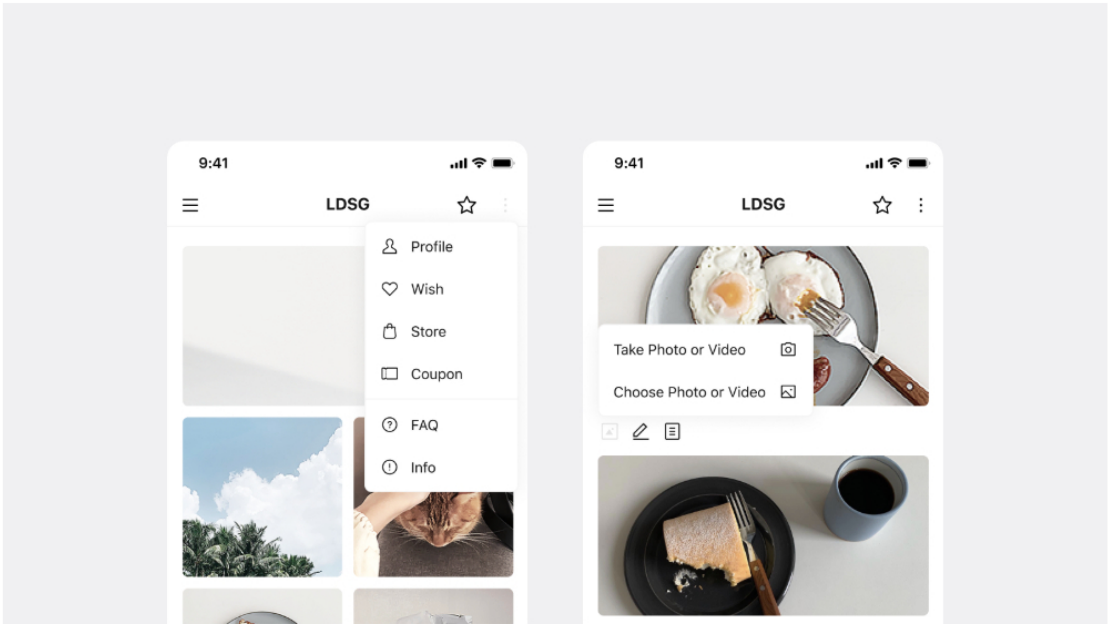

Don't

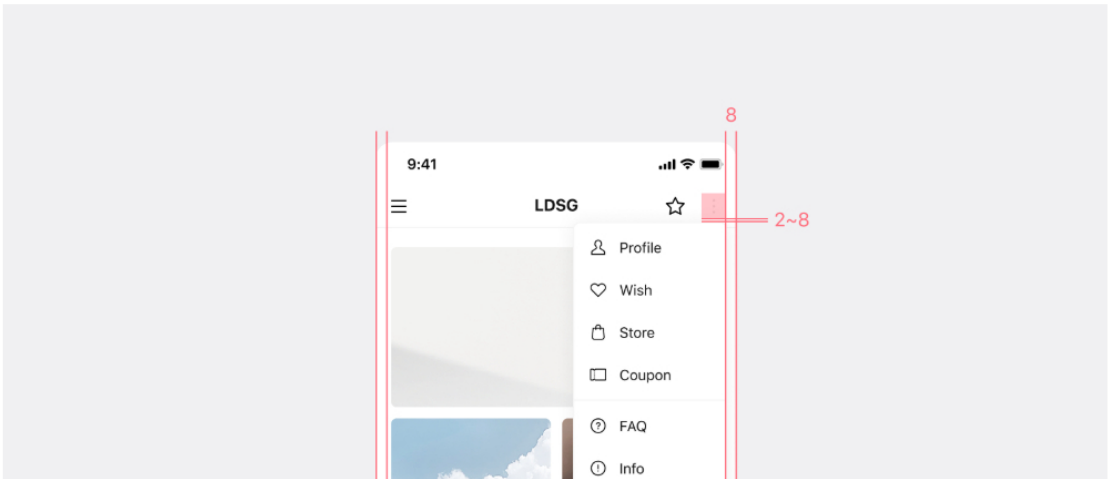

Make sure the components do not overlap the button area when they are activated.

Design Specs

Mobile

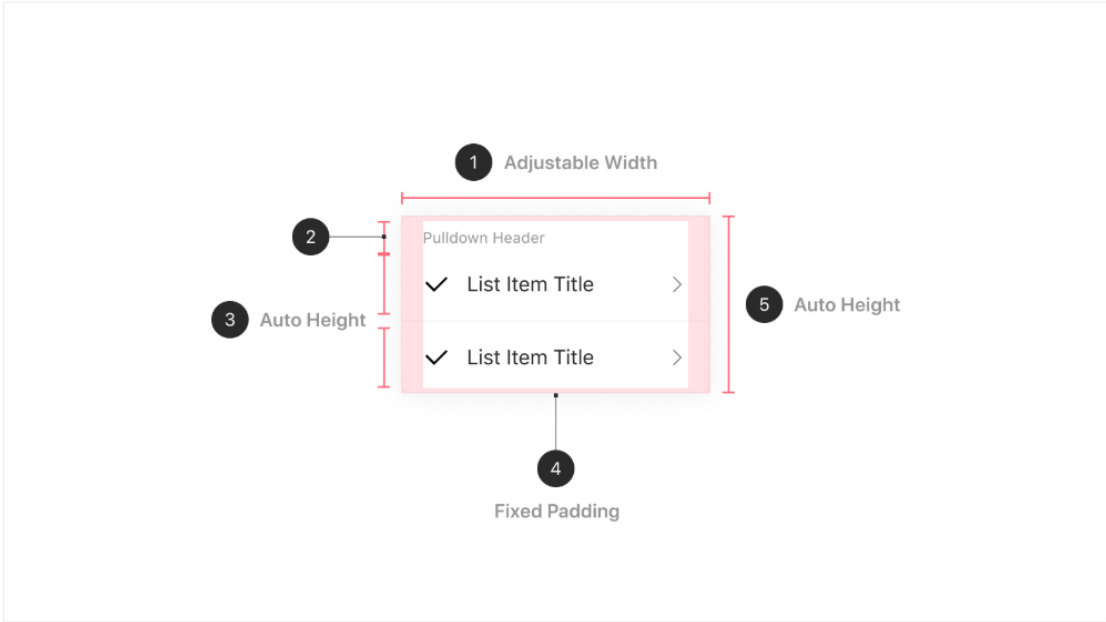

Place the components at the top/bottom/left/right depending on the location of the button.

Place the menu at least 8 pixels away from the starting and ending edges of the screen.
Place the menu 2 to 8 pixels away from the elements that are explained by the menu.

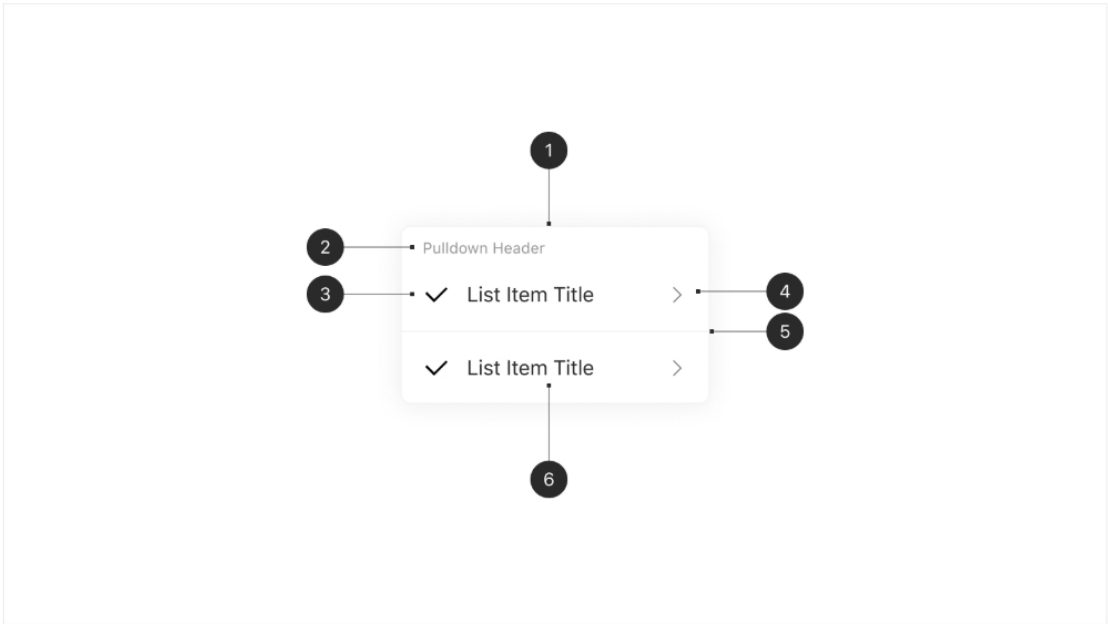

Resizing

Value	Description
1 Adjustable Width	- The value does not change regardless of the text length. - Users can freely adjust the width. - The minimum width is 112 px. Be careful not to create a pull-down menu with a width smaller than 112 px. - Provided as default value (Component width - left/right margin: 16).
2 Fixed Height	Fixed values. You cannot change the height of the container.
3 Auto Height	The height value is automatically adjusted according to the number of lines in the text.
4 Fixed Padding	Fixed values. You cannot change the padding values.
5 Auto Height	- Determined depending on the height in ④. - The height should not exceed the device's screen height. - For greater pop-up heights, we recommend you use the bottom sheet.

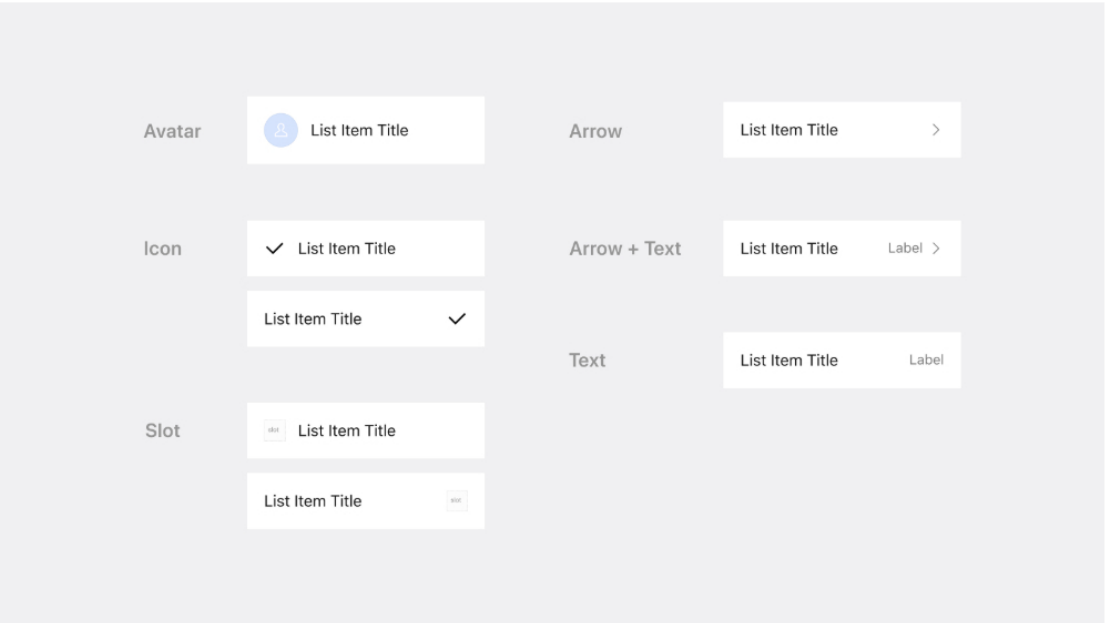

Styles

Styles

Element	Properties
1 Container	- The default value and Included the border. - Width: Fixed - Minimum-width: 112px - Height: Auto - Background Color: Changeable - Default: Idsg-color-white - Border Color: Changeable - Default: Idsg-color-gray-150
2 Title	- Typography: Unchangeable - Size: Unchangeable - Color: Changeable - Default: Idsg-gray-500
3 Left Item	Follows each items' rule below
4 Right Item	Follows each items' rule below
5 Divider	- Size: Unchangeable - Color: Changeable - Default: Idsg-color-gray-150
