You can select the input container type. Select and use an input container type that matches the service type well.

Contained type has a background in the input container and allows you to change the color.

Outlined type has a border in the input container and allows you to change the border options.

Underlined type has an underline and allows you to change the properties of the underline.

Don't

Do not use various input container types on one screen. When using outlined types and contained types together, containers in a disabled state may look similar.

Don't

Informing the user of the input form error only after the user finishes filling out the form is not recommended.
Inform the user of the error while the user is filling out the form.

Design Specs

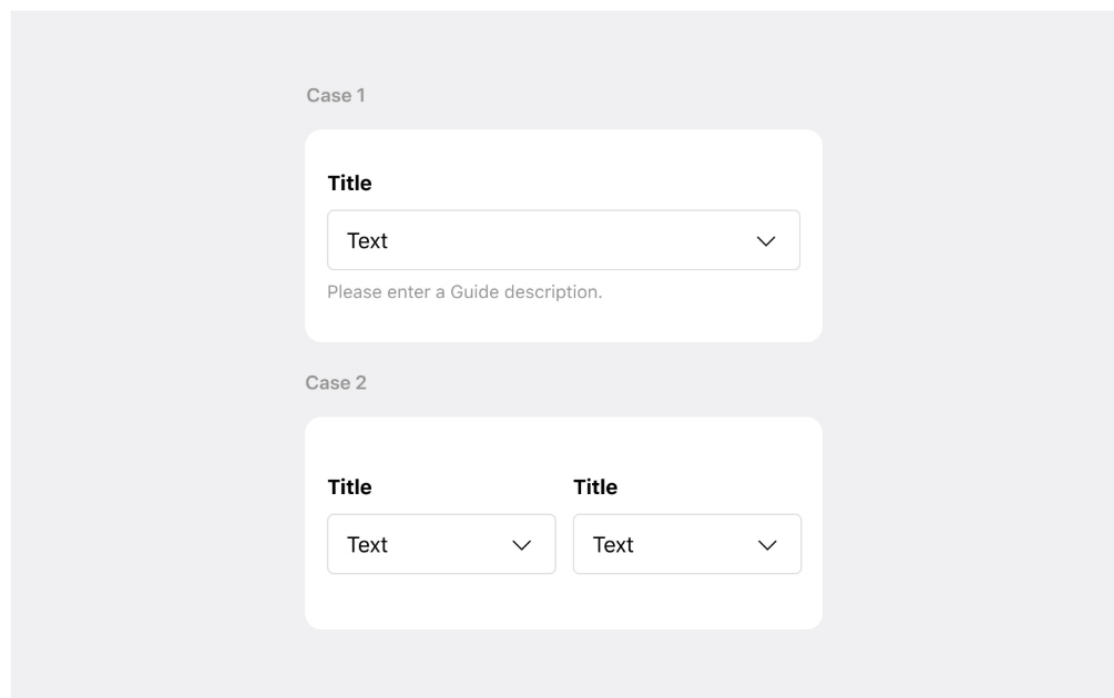

Placement

Value	Description
1	Fixed Height
	- Fixed values - You cannot change the size of the container without changing the font size

2	Fixed Margin	- Fixed values - You cannot change the margins
3	Auto Height	Determined automatically depending on the length of the text
4	Adjustable Width	- You can change the width - The default value is set as "screen width - left and right margins"
5	Auto Height	Determined depending on the text height (3)

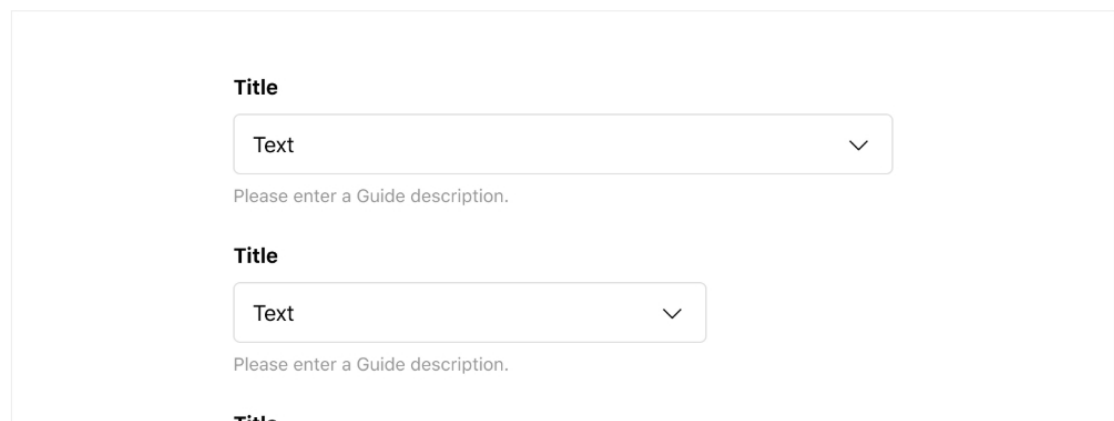

Resizing

Case 1 : One text input

Case 2 : Two text inputs

- When using one text input in a row, use the default width. ("screen width - left and right margins")
- When using two text inputs in a row, adjust their size.
- Resize the inputs to fit the grid. (Space: 12px)

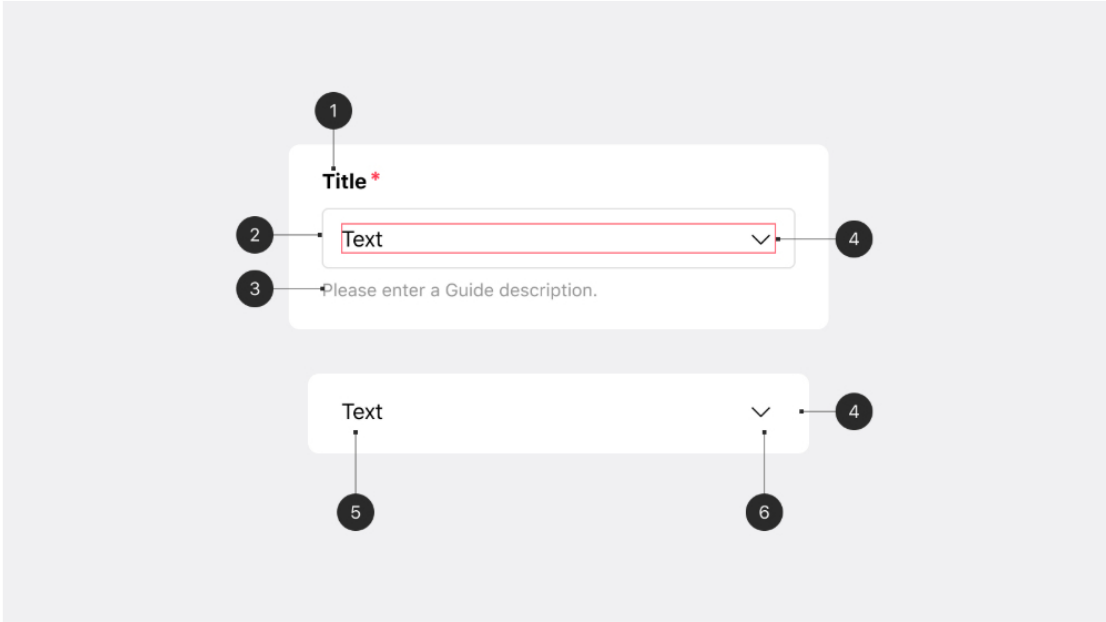

Title

Please enter a Guide description.

You can resize and customize the width.
