Tab

Tabs are components for exploring subordinate screens, which are used for the local navigation of the screen. Flexible and Fixed tabs are provided.

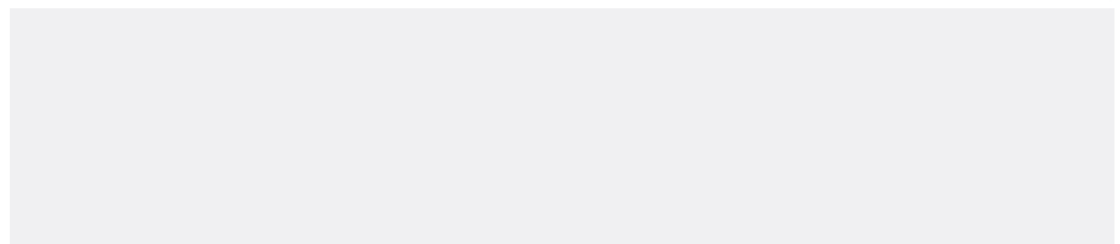

Anatomy

1. Tab Item
- 1-1. Tab Item Container
- 1-2. Tab Item Label
- 1-3. Selected Tab Indicator
- 1-4. Notification Badge
2. Tab Container
3. Tab Expand Button (Optional)
4. Divider

Element Patterns and Types

Flexible Tab

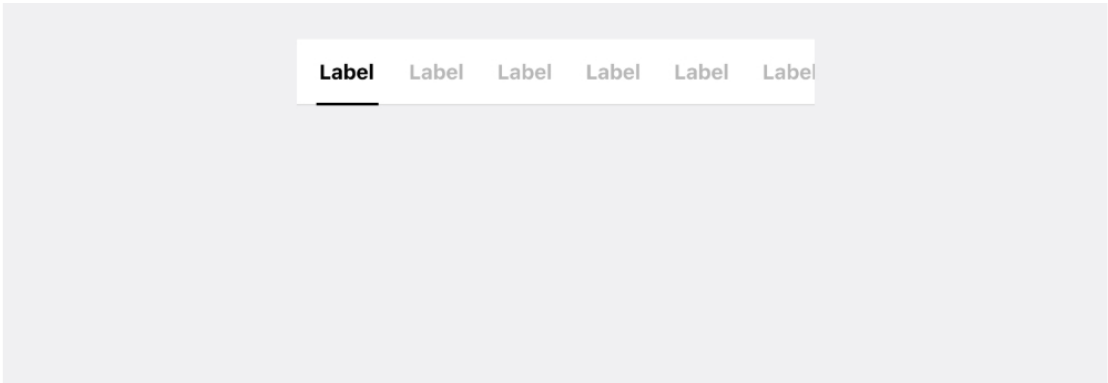

Overlays

- Popup
- Snackbar
- Toast Overlay
- Tooltip
- Bottom Sheet
- Pulldown Menu

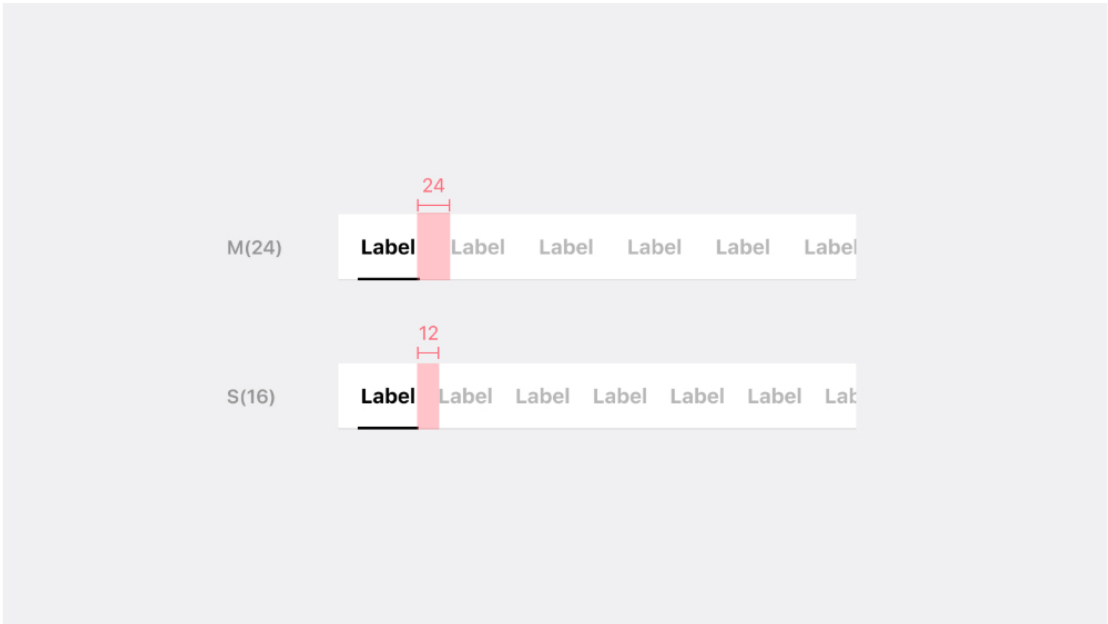

Systems

LIFF View

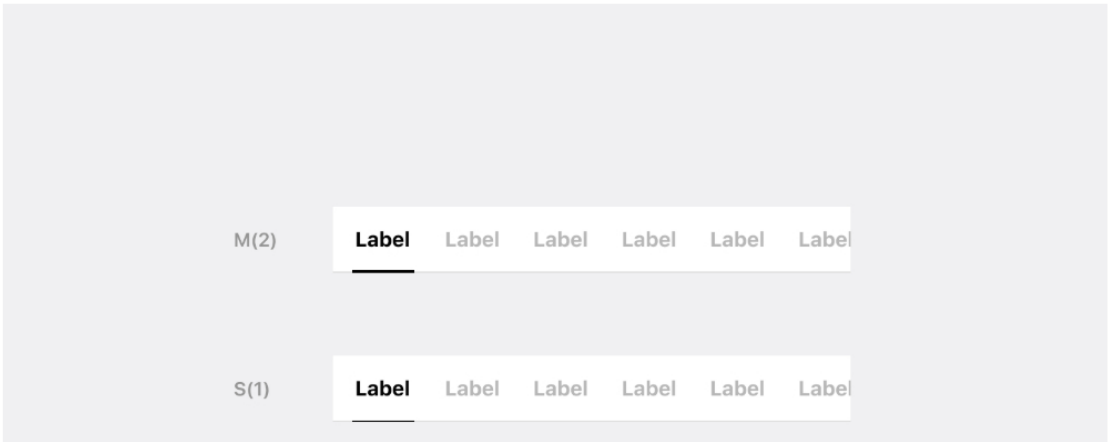

Margin	M (12)	S (8)
Underline	M (2)	S (1)
Expand Button	True	False

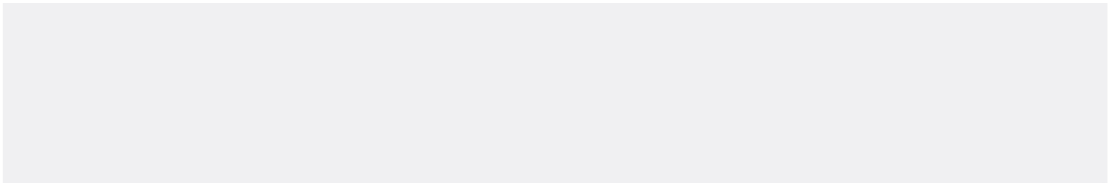

Margin

You can adjust the text and text space of the tab item. The number in parentheses indicates the space between texts.

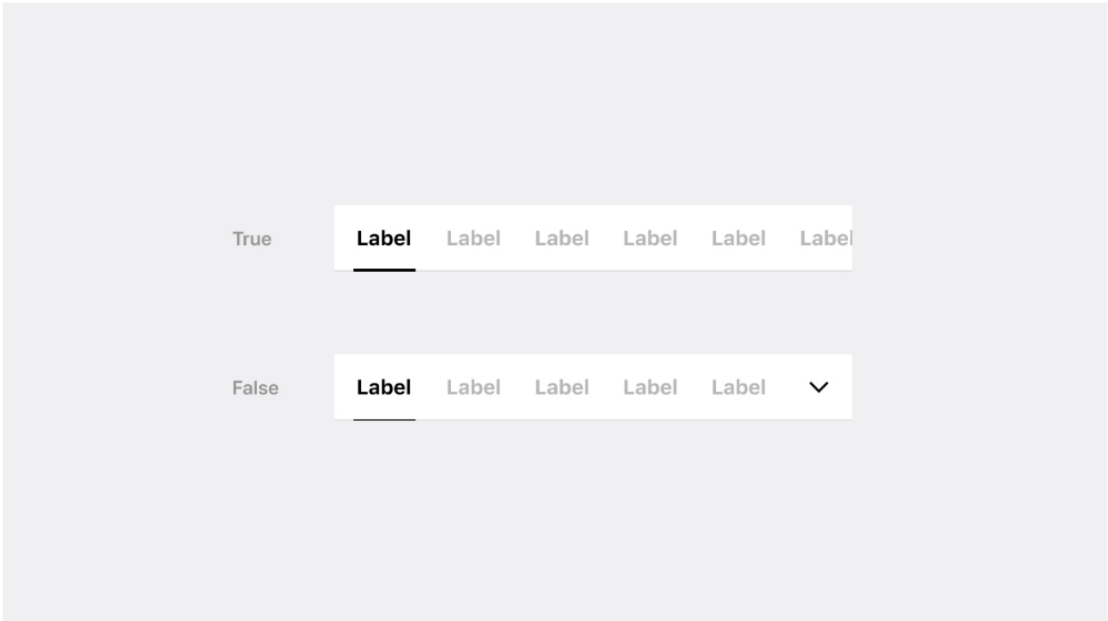

Underline

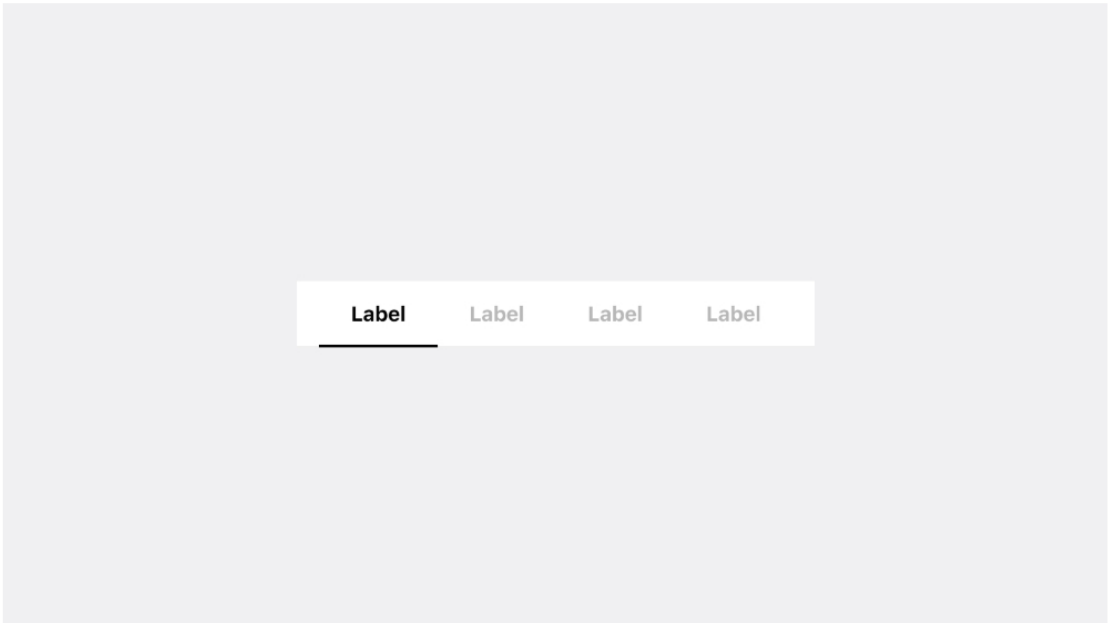

Users can adjust the width of the underline. M (2px) and S (1px) are available for the width.

Expand Button

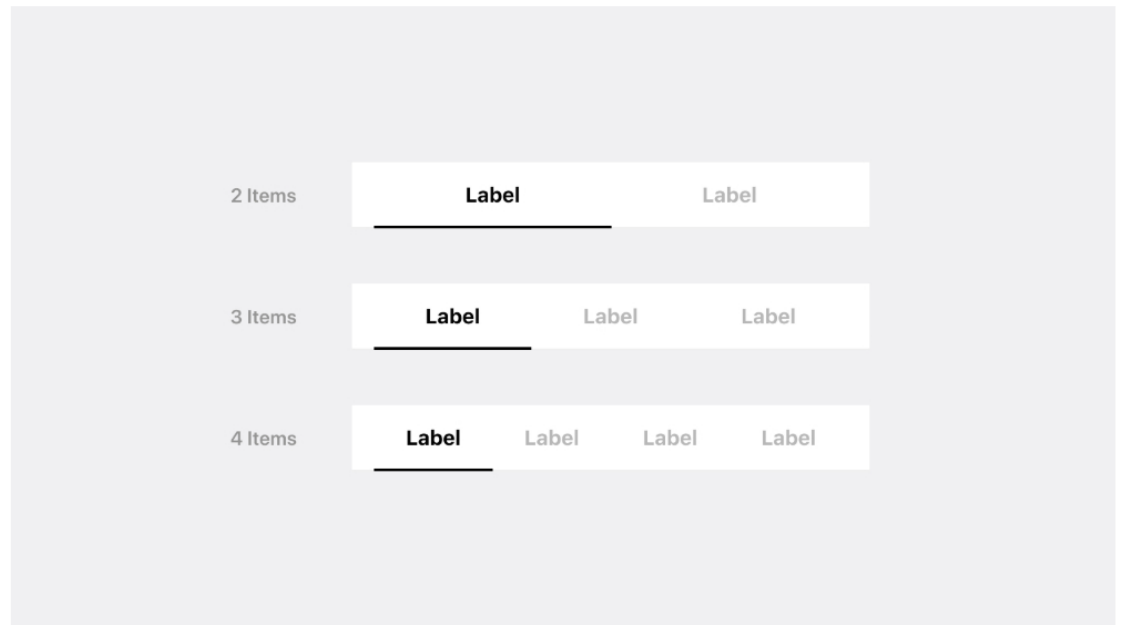

You can select whether to expose the Expand button on the right.

Fixed Tab

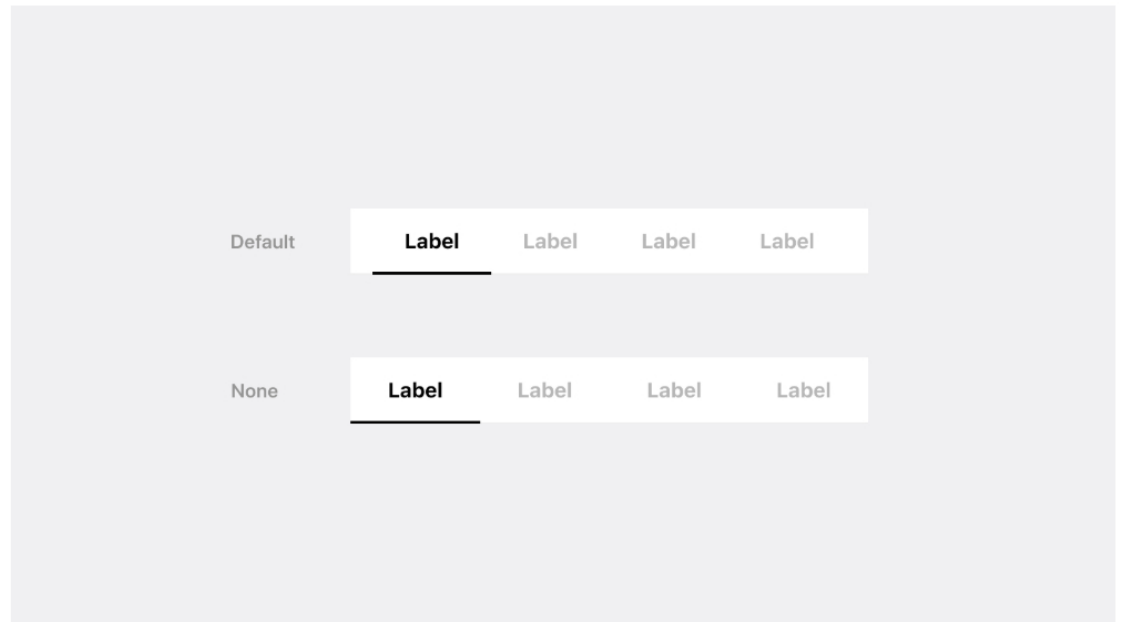

Number of Items	2 Items	3 Items	4 Items
Side Margin	Default (16)	None (0)	

Number of Items

You can select the number of tab items to provide. A minimum of two to a maximum of four tab items may be used. Consider using a flexible tab if there will be four or more tab items.

Side Margin

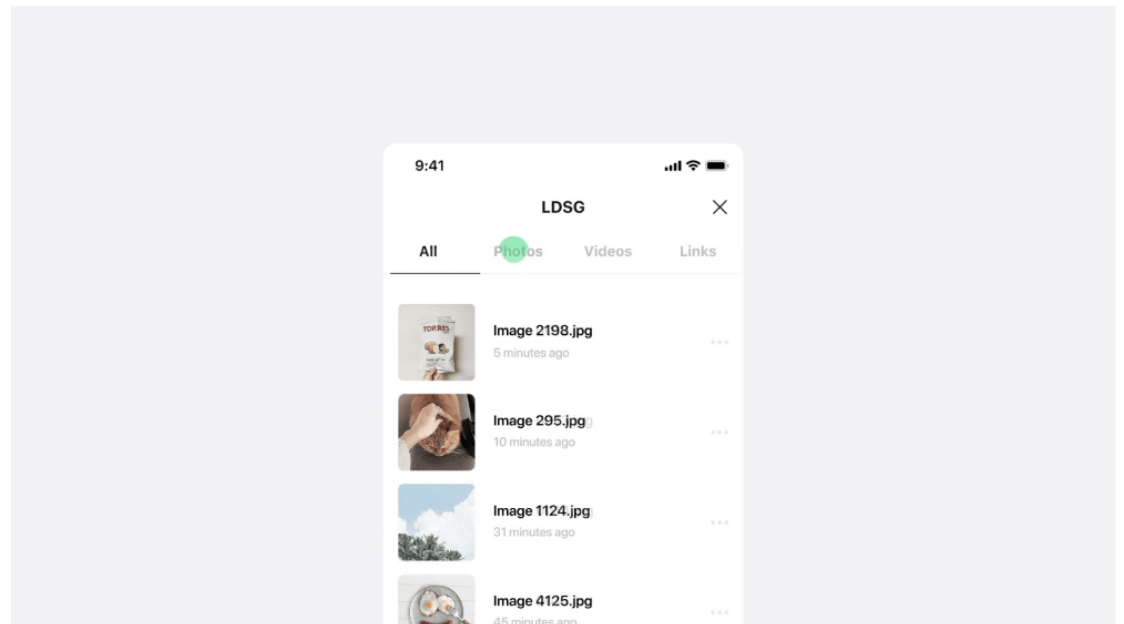

You can select whether to use the left and right margins. The margins are set as 16 pixels by default, and the tabs can occupy 100% of the screen width if the margins are set as "None".

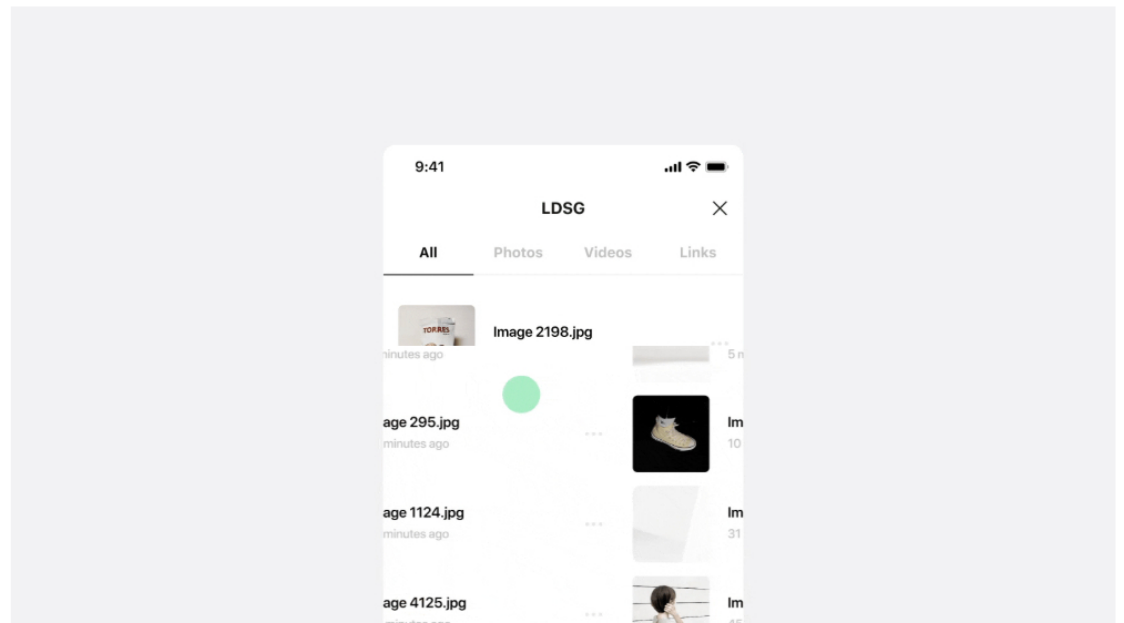

Behavior

Move between Tabs

Move by Selecting a Tab Item

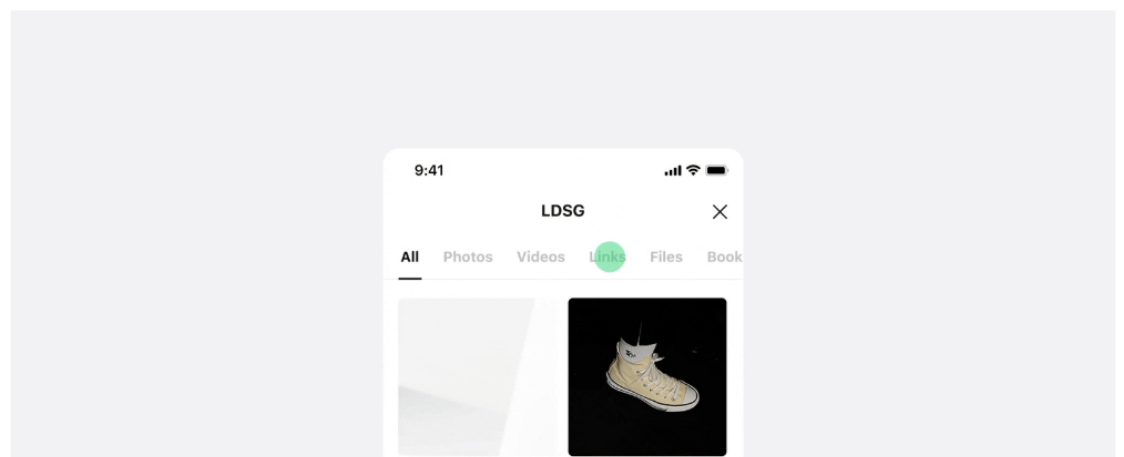

Swipe through The Content Area (Optional)

You can horizontally swipe the content area to switch between tabs. It is an optional feature that is not provided by default.

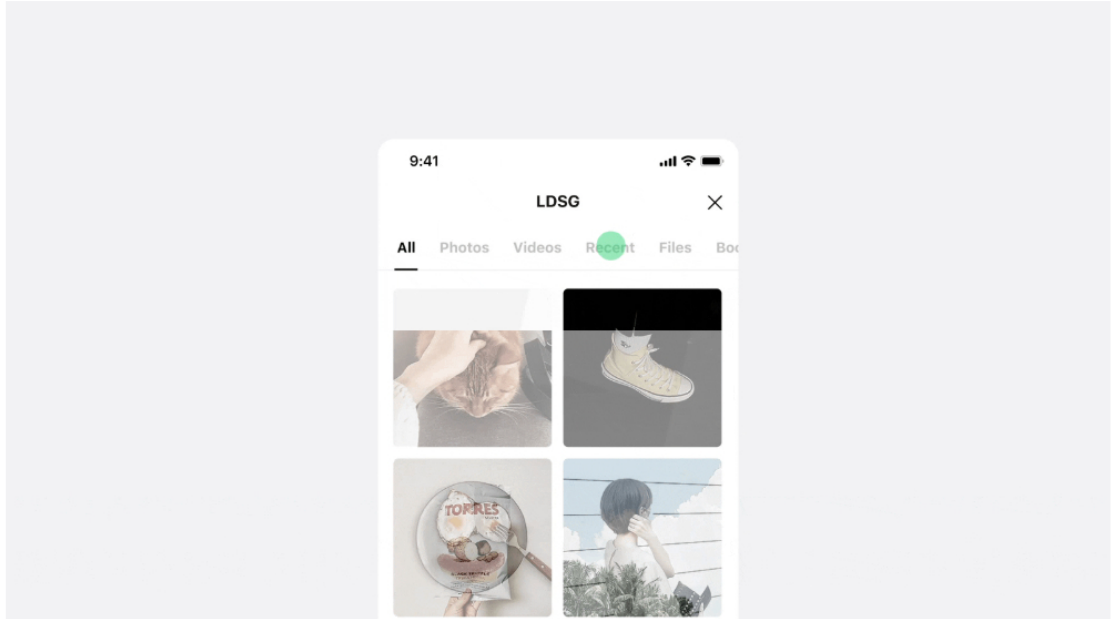

Scroll Tab Area - Flexible Tab Only

It is provided in a flexible tab when the tab item exceeds the screen width.

Auto Scroll - Flexible Tab Only

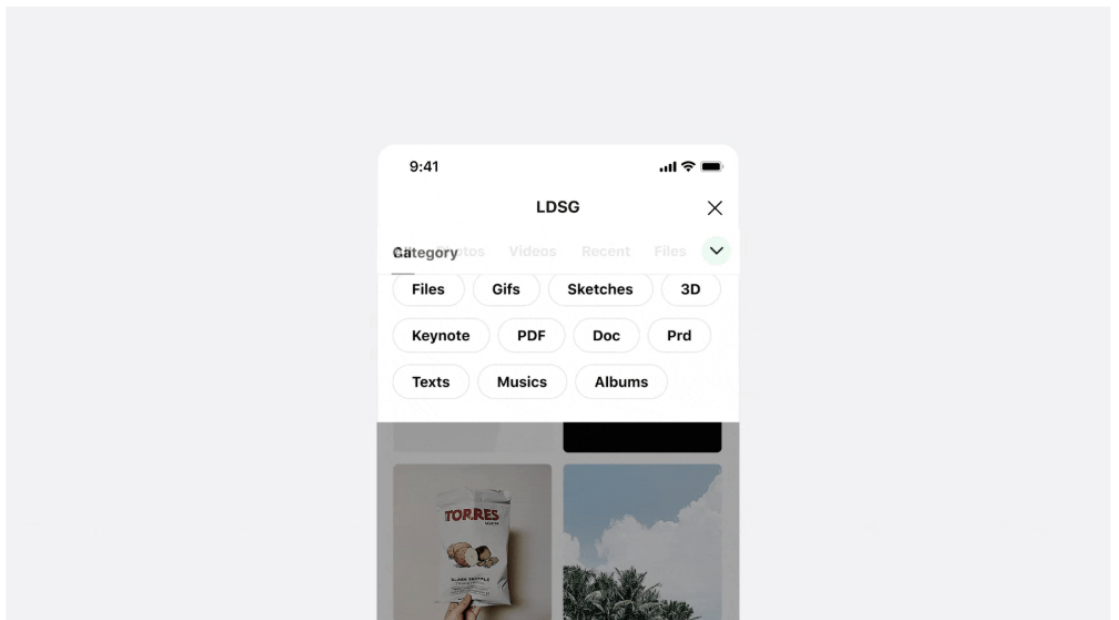

When a tab on the right from the center of the screen is selected, the selected tab moves to the center of the screen and the subordinate screen for the tab will be displayed.

Scrollspy (Optional)

It allows you to scroll through the tabs instead of moving the page. Scrollspy is an optional feature and navigation between the pages on the tabs is not available when this feature is used. To use this interaction, see the Scrollspy document.

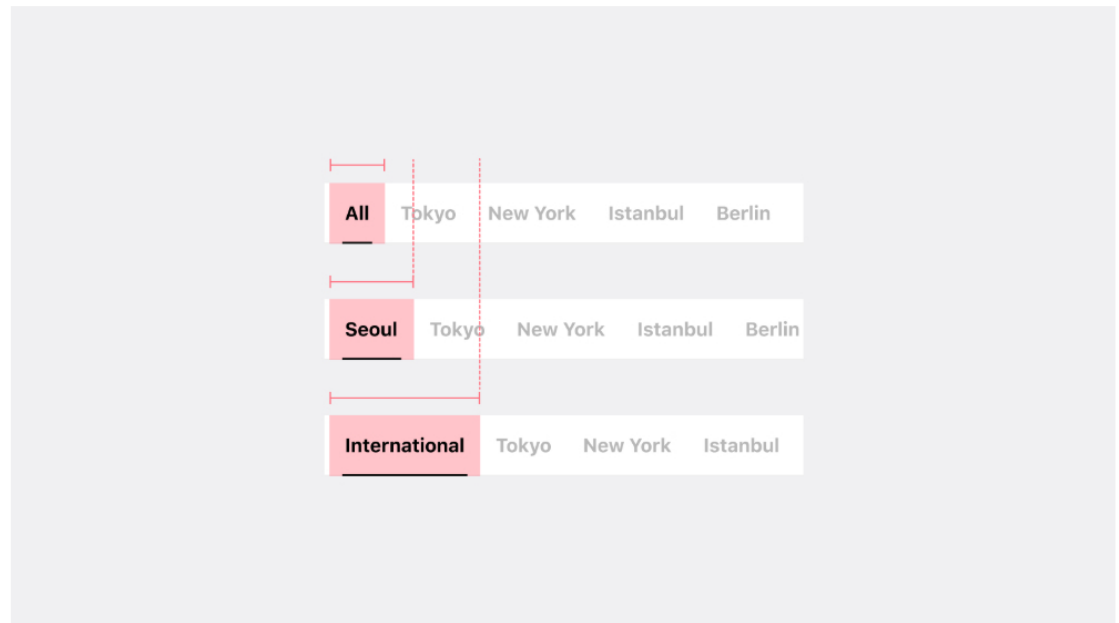

Open Expanded Tab - Flexible Tab Only

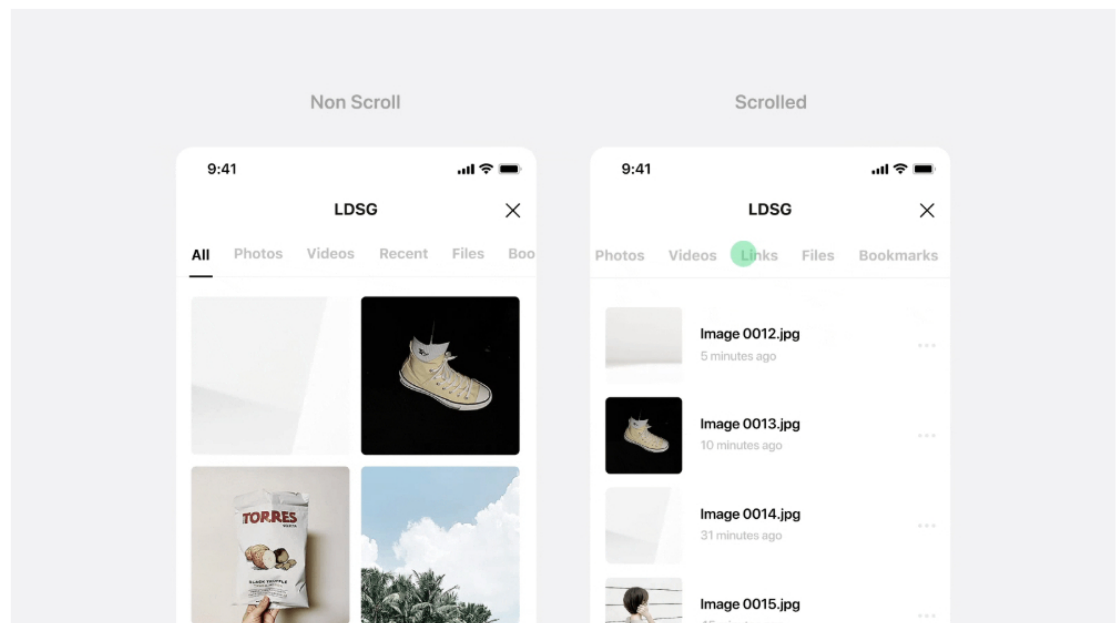

You can tap the Expand Tab List button to display the expanded tab list. On the expanded tab list, you can tap the dimmed area or select

Usage

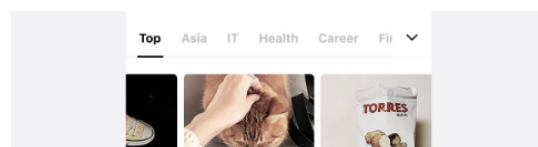

Flexible Tab

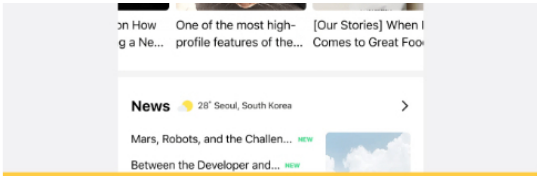

The flexible tab allows for the width change while maintaining the padding values. The space between tab items is 0, and the position values of the preceding items will change according to the width of the tab item. There is no limitation to the number of items.

If the width of the tab items exceed the screen width, you can optionally select the horizontal scrolling. Scrolling does not work if the tab item width is smaller than the screen width.

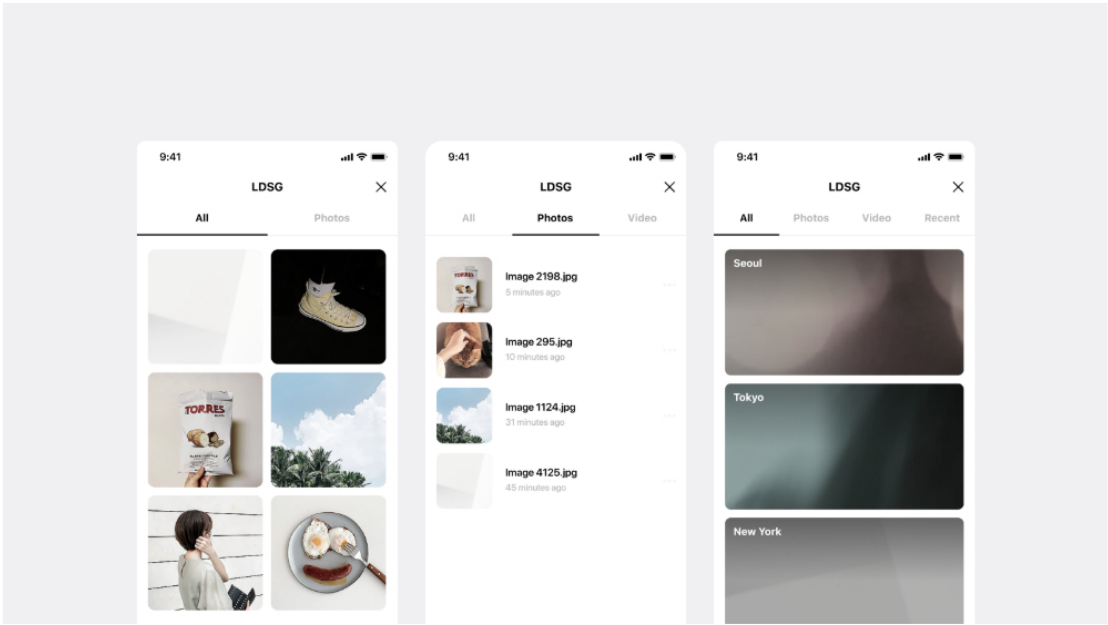

Caution

If there are horizontally scrollable components on the screen, use of the scrolling feature on the tabs is not recommended.

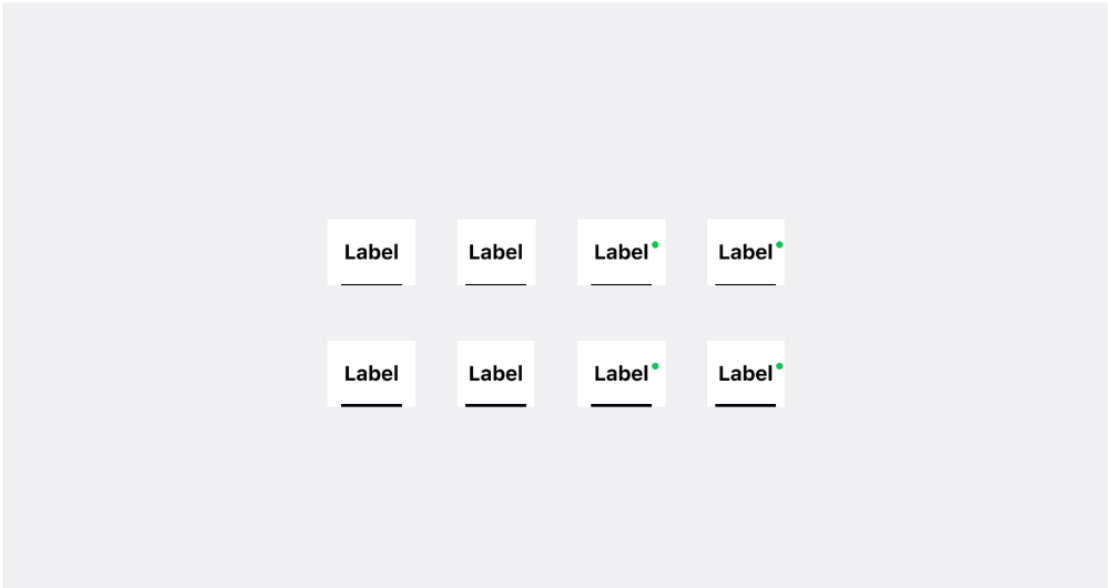

Fixed Tab

A minimum of two to a maximum of four tab items may be used. Consider using a flexible tab if there will be an imbalance between the items due to the difference in text lengths.

Child Items

Tab Items

Option	Value			Description
Padding	S (8)	M (12)		You can select the value for the padding between the text and the container. S (8) is provided by default. This default padding is available only with flexible tabs.
Underline	S (1)	M (2)	None	You can select the width of the bottom bar. M (2) is provided by default.
States	Selected	Unselected		You can select a state. Only one of the tabs can be set as "Selected".
Badge	True	False		You can select whether to use a badge.

States

	Selected	Unselected
Normal	Label	Label
Hover	Label	Label
Pressed	Label	Label

Normal	Opacity: 100%
Hover	Opacity: 70%
Pressed	Opacity: 50%
