1. Title (Optional)

2. Text

3. Container

4. Help Text Area (Optional)

5. Character Counter (Optional)

Element Patterns and Types

Type	Outlined	Contained		
States	Enabled	Disabled	Error	
Typing States	Placeholder	On Focus	On Typing	Typed
Title	True	False		
Required	True	False		
Help Text Area	True	False		

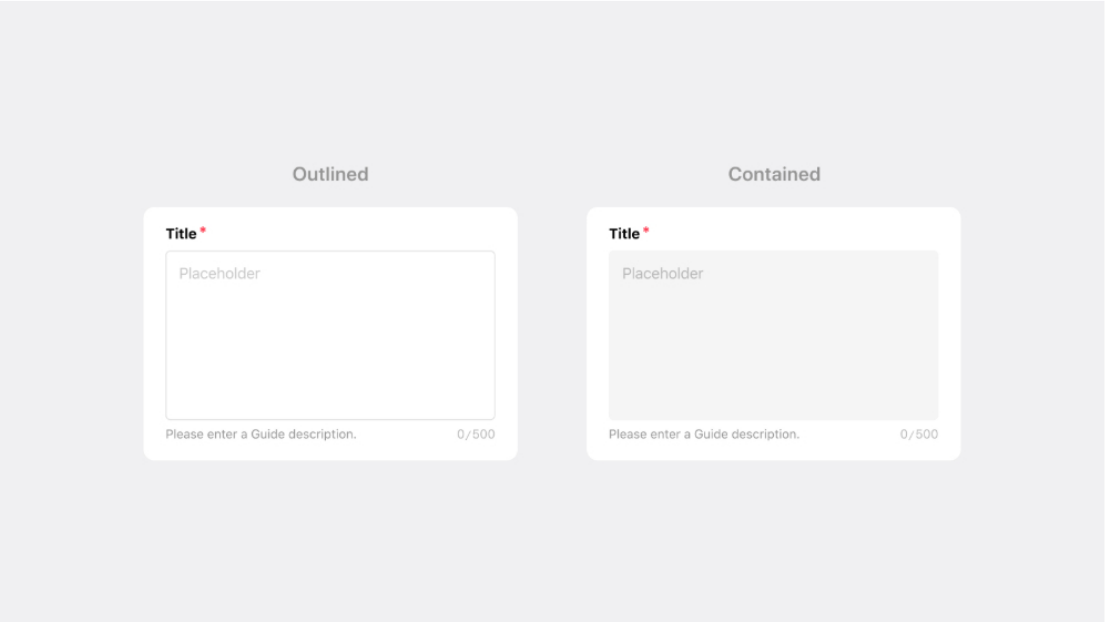

Overlays

- Popup
- Snackbar
- Toast Overlay
- Tooltip
- Bottom Sheet
- Pulldown Menu

Systems

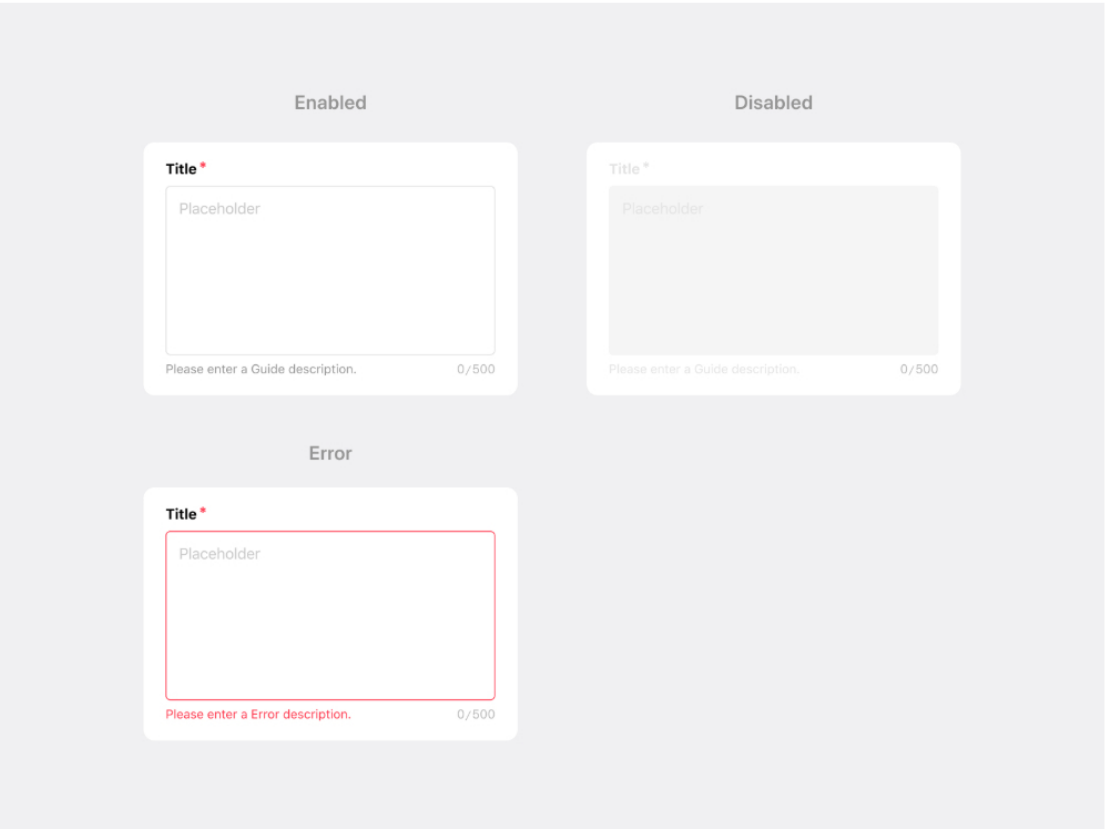

- LIFF View

Type

Two container types are provided; the Outlined type has an outline and the Contained type is filled with a color.

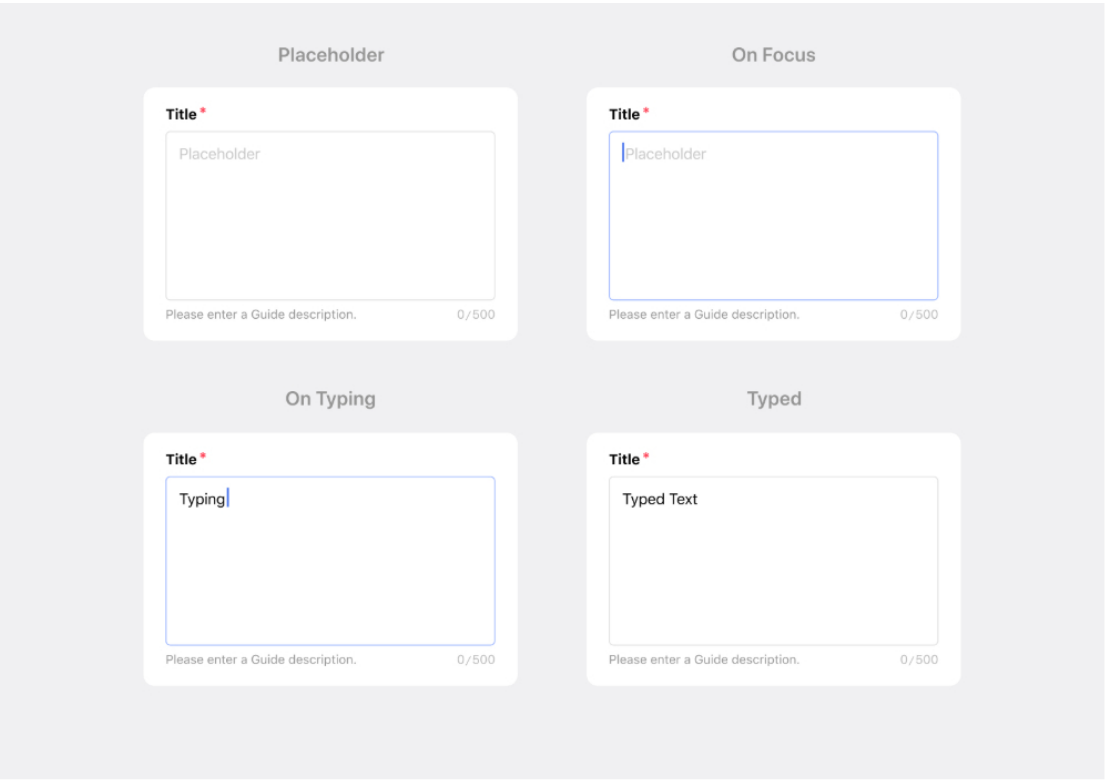

States

A text area is an input component that is used to allow text input with two or more lines.

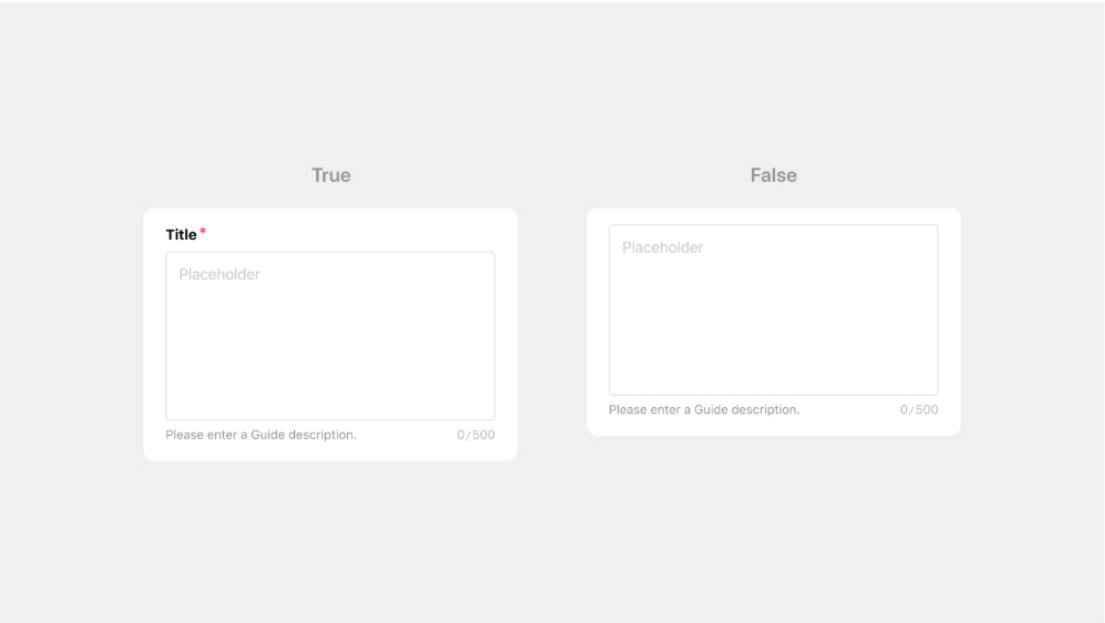

Typing States

Typing States	Description	Enabled	Disabled	Error
Placeholder	Default state without an input.	☐	☐	☐
On Focus	Selected state before an input.	☐	☒	☐
On Typing	One ore more characters are being input.	☐	☒	☐
Typed	The user has left the text area after completing the input.	☐	☐	☐

Title

You can select whether to provide a title.

Help Text Area

The image shows two variations of the Help Text Area component. The 'True' version has a title 'Title *', a text area with a 'Placeholder' label, and a bottom section containing the text 'Please enter a Guide description.' and a character count '0/500'. The 'False' version is identical but lacks the bottom section.

You can select whether to provide the help text at the bottom.

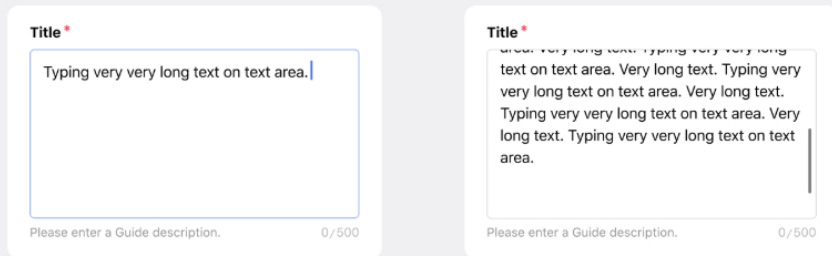

Text Area Option

The image displays three options for the Text Area component. The 'Help Text Only' option includes a title 'Title *', a text area with a 'Placeholder' label, and the text 'Please enter a Guide description.' at the bottom. The 'Help Text + Character Counter' option includes the same elements but also features a character count '0/500' at the bottom right. The 'Character Counter Only' option includes the title 'Title *' and the character count '0/500' at the bottom right, but lacks the text area and the descriptive text.

Three character counter options are available for the help text area: Help Text Only, Help Text + Character Counter, and Character Counter Only.

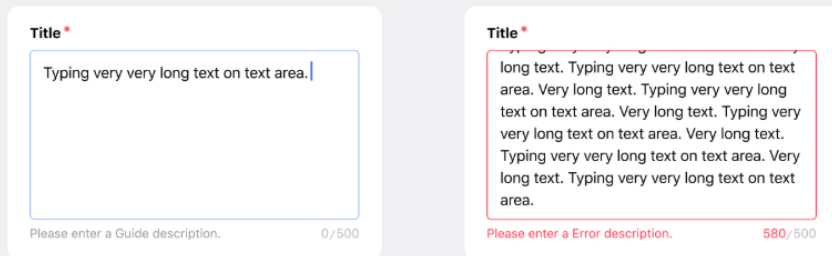

Behavior

Scroll

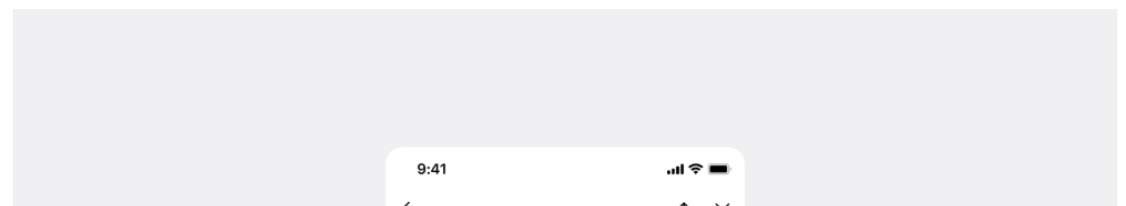

A scroll bar is displayed when the number of lines in a text exceeds the specified area. When the line breaks, the previous line scrolls up on the screen.

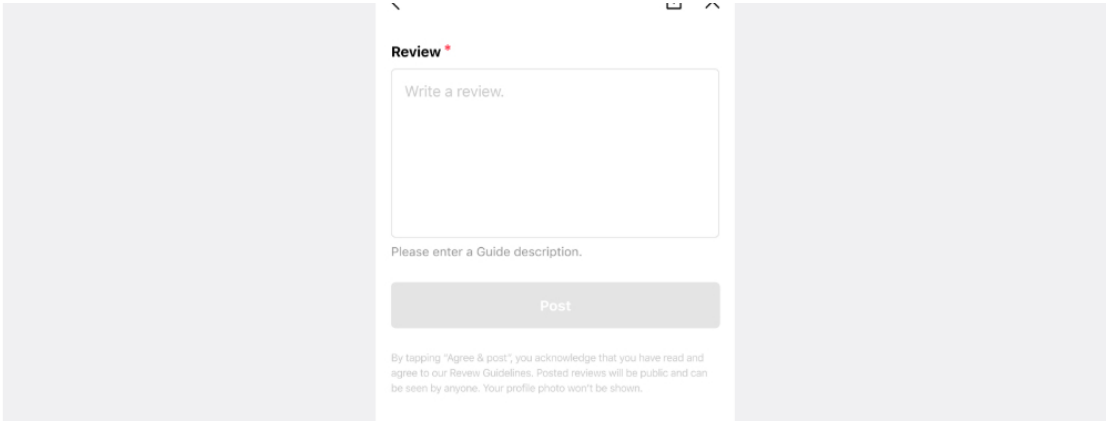

Exceed Maximum Characters

When the specified number of characters is exceeded, an error message is displayed in the help text area even if the input is still available.

Usage

It is recommended to use the text area when the text will have two or more lines.

Design Specs

Resizing

Element	Description
1 Title Area Height	- Auto Height - Font size of the title. The height changes according to the option set with 1-1 Padding.
1-1 Title Area Padding	- Adjustable Padding - Users can freely adjust the padding.
