Text Button

If the task of the button is not largely related to the overall content of the screen or if it attracts low attention, use the Text button. Text button has no elements such as background, outside border line, etc., comprised of Text only.

Anatomy

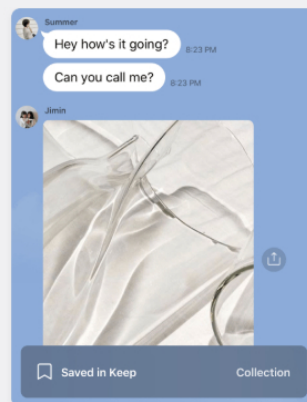

1. Text area

The content of the button is included and use the color identical to the icon.

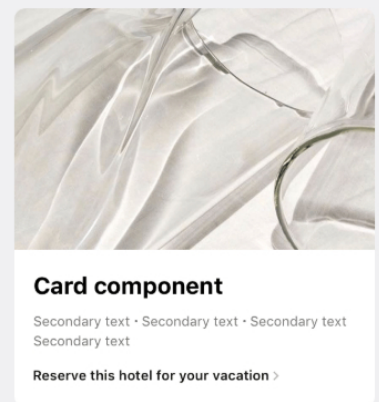

2. Icon area (optional)

This is used to distinguish it from the general text. Use the color identical to the text.

Do

Write the text concisely for everyone to understand easily.

Don't

Avoid writing the text too long.

States

Active	Text Button >	This is an enabled status.
Inactive	Text Button >	This is a disabled status.
Pressed	Text Button >	This is a status in which a user is pressing the button to execute an action.

Types

Text button is in three sizes of Large, Medium, and Small, and each has 4 properties of Primary Green, Secondary, Destructive Red, and Retreative Light.

LightDarkOverlay

Text Button Large >

Text Button Medium >

Text Button Small >

Controls

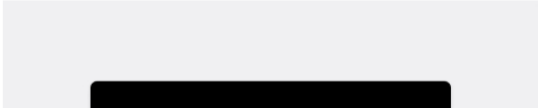

Type

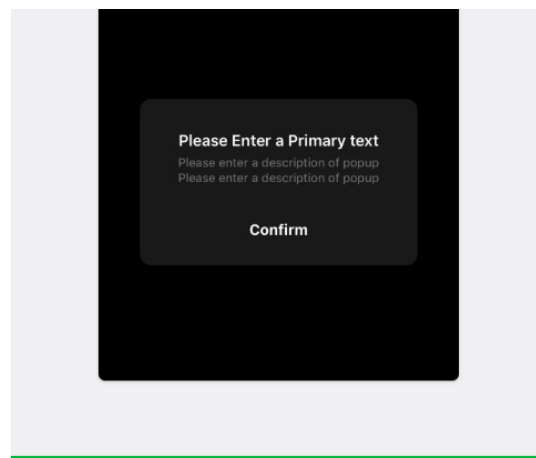

- Primary Green
- Destructive Red
- Secondary Mono
- Retreative Light

States

- Active
- Inactive
- Pressed

Primary Green	Text Button >	Use the Text button for the more important action.
Destructive Red	Text Button >	This is used to trigger destructive results (Delete, etc.) when selecting the Text button.
Secondary Mono	Text Button >	This is used for action (task) buttons that are less important than the Primary Green button among Text buttons.
Retreative Light	Text Button >	Used for actions of retreating from the current screen such as 'Cancel/Close' among Text buttons.

Do

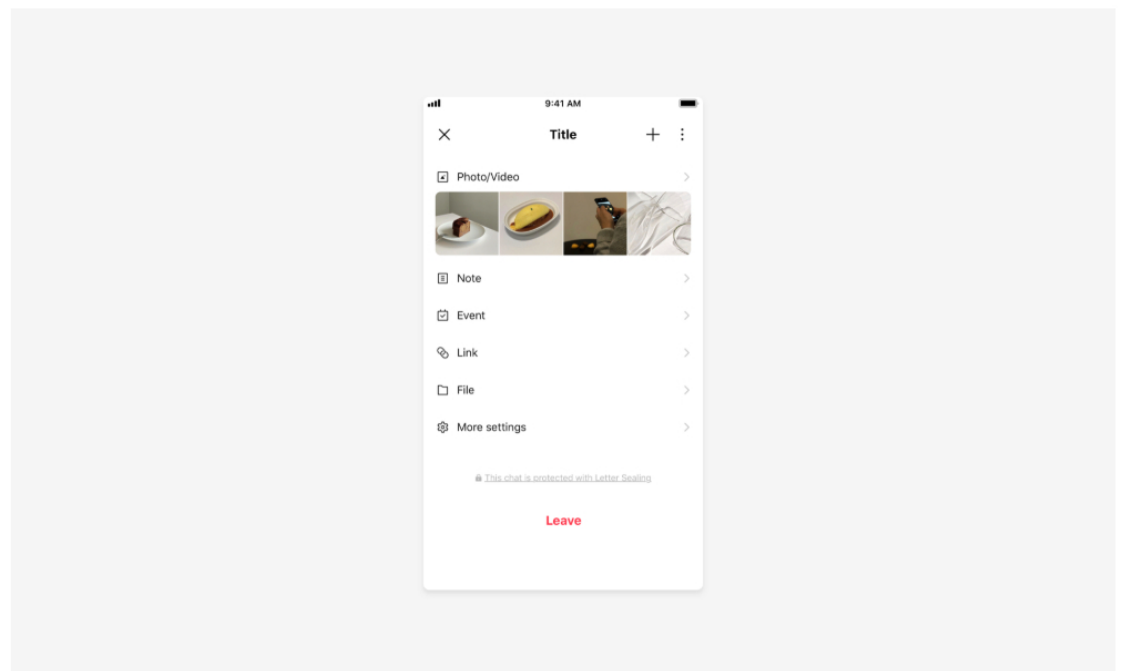

As for the secondary Mono, white is applied in the dark mode.

Usage

The button helps users to take an action. It can used in the following components.

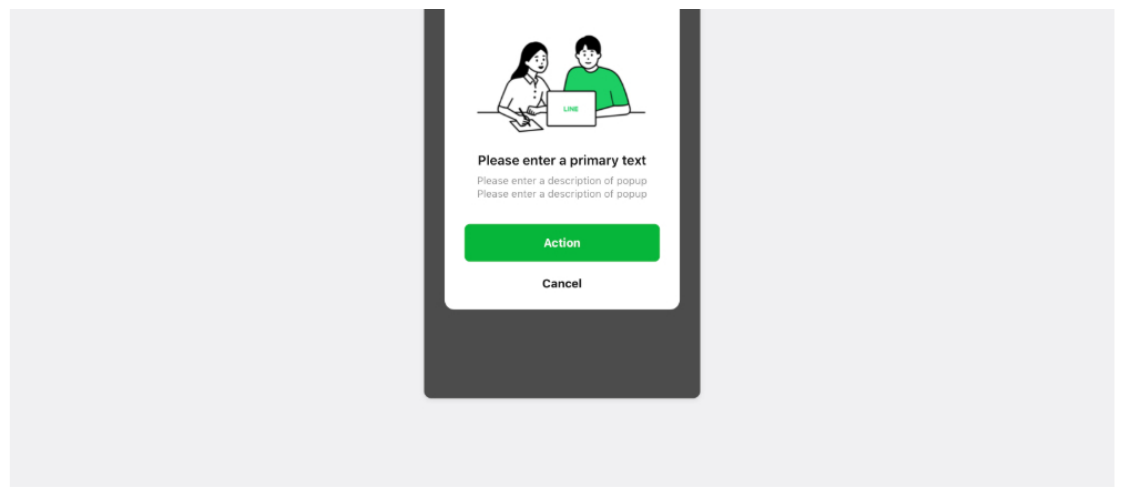

General usage

General use of the button is as follows.

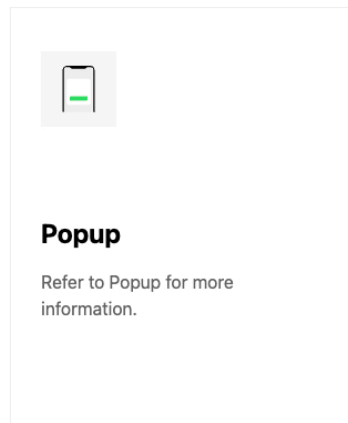

Popup usage

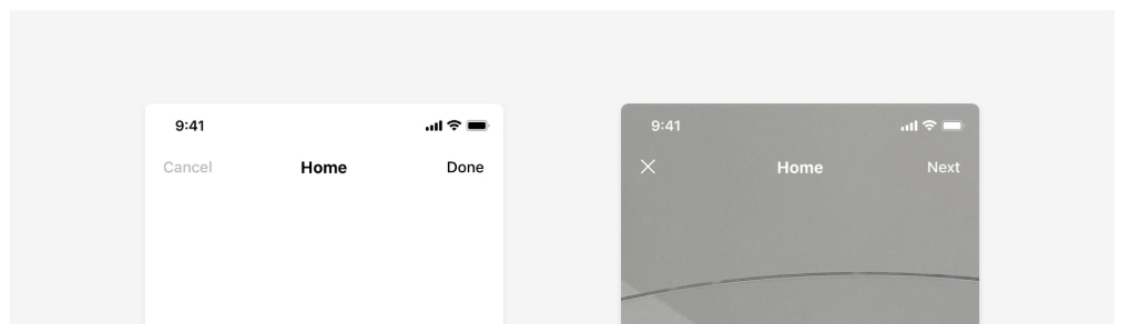

Used to close the popup. When used together with the primary button that closes the popup after completing the task, this button finishes the task regardless of the content on the popup.

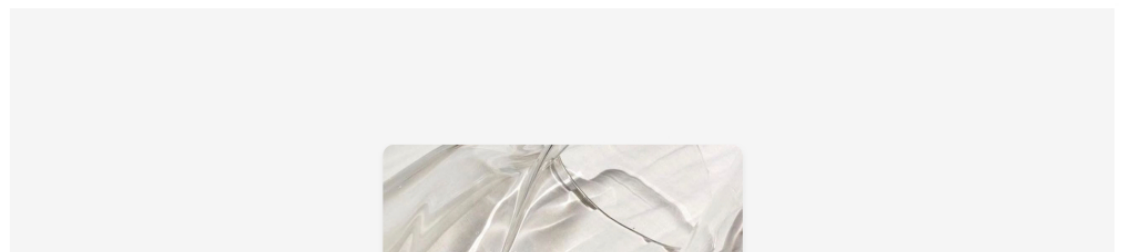

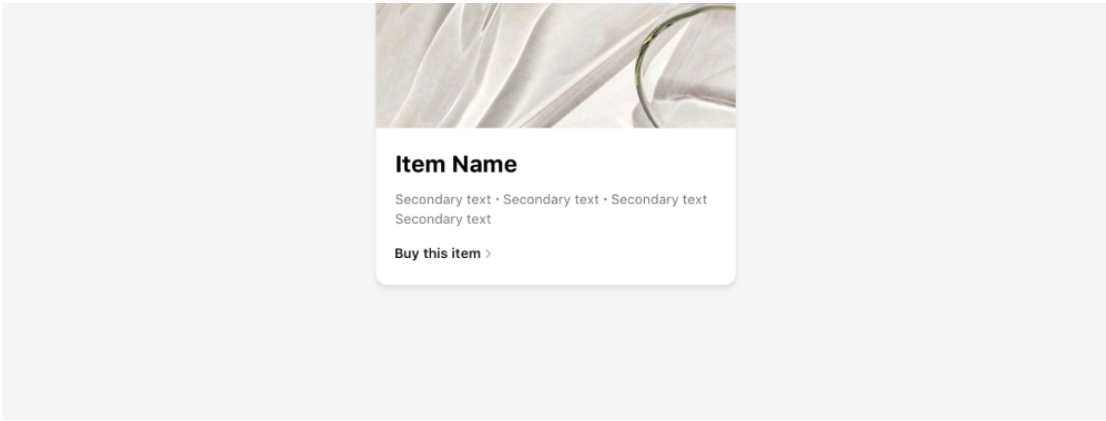

Top Navigation

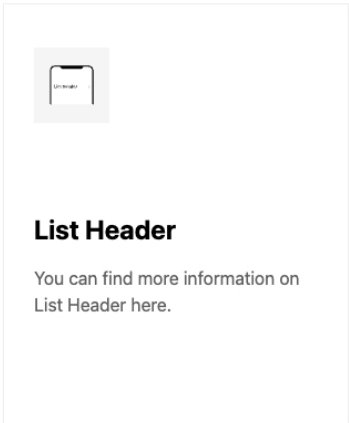

Used to leave or move from the screen. (e.g Cancel, OK or Next)

Snackbar , List Header

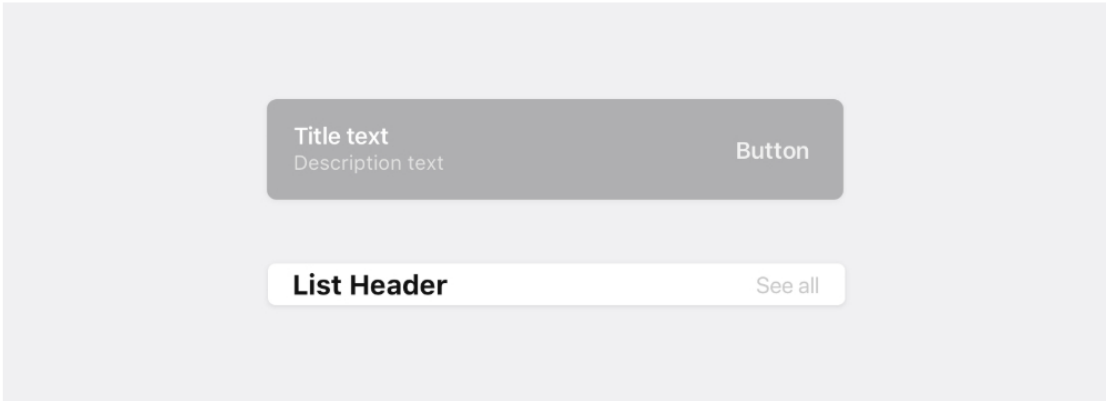

Used as a button for additional features on the right.

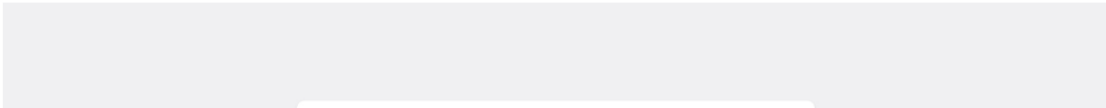

Card usage

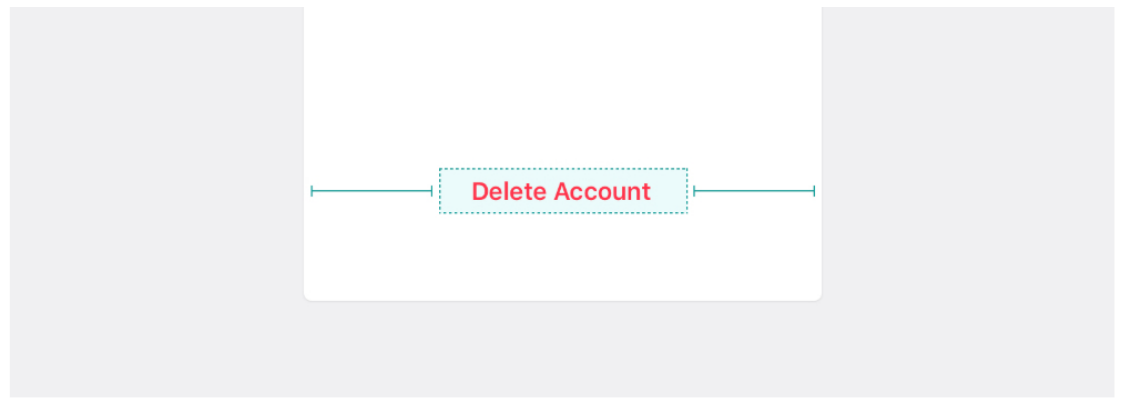

Used as a button for additional features on the card.

Placement

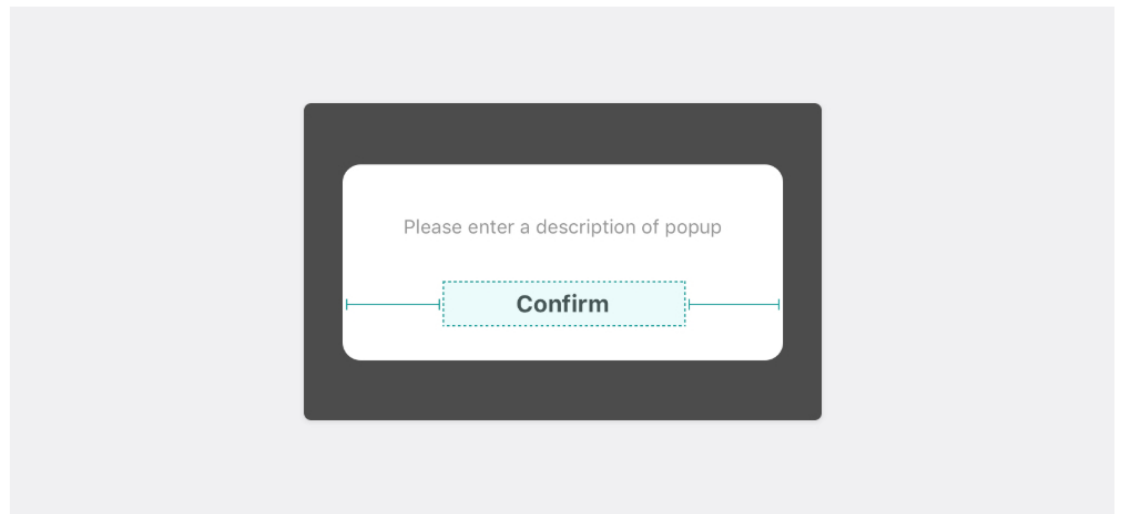

General

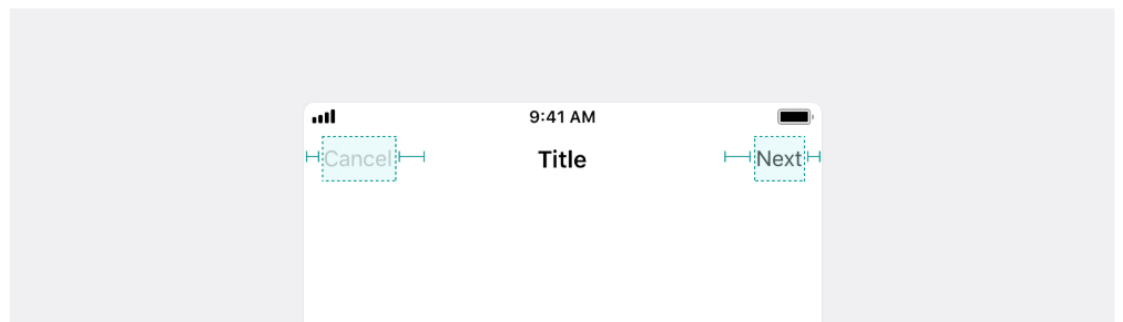

Text buttons can be positioned anywhere on the screen, but we recommend to use one text button per line. It requires design QA as there is no fixed placement and no margin is included in the component.

Popup

Popup should be aligned at the center of the bottom of the screen.

Top Navigation

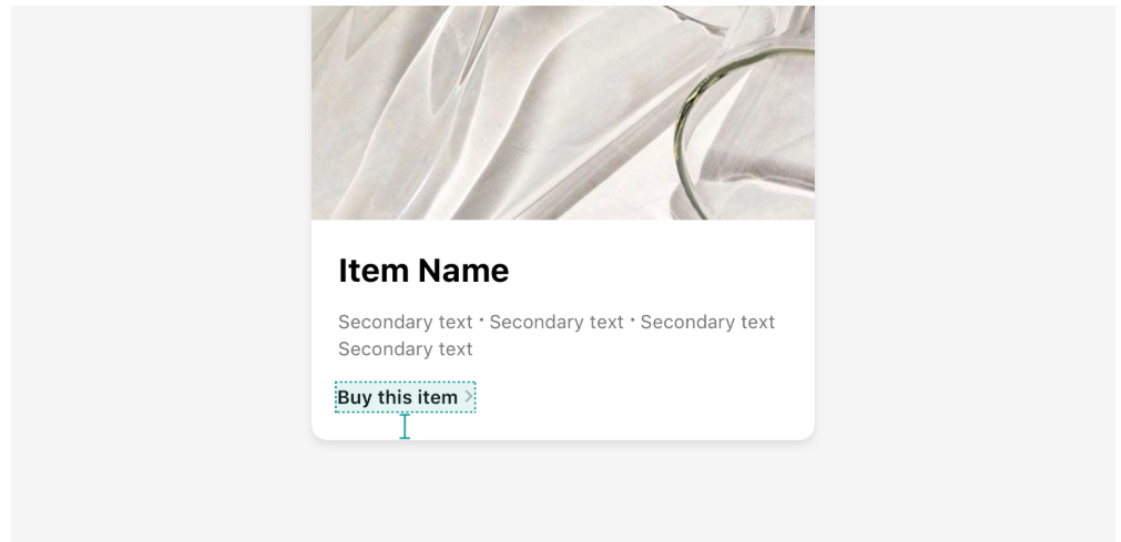

Top navigation should be positioned with the internal margin on the right and left.

Snackbar

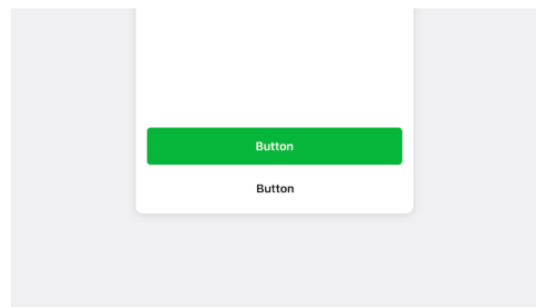

Snackbar should be positioned with the internal margin on the right.

Card

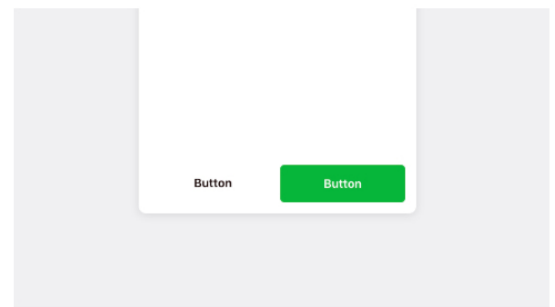

Card should be positioned with the internal margin at the bottom left.

Do

When the Box button and Text button are positioned vertically, place the Text button below.

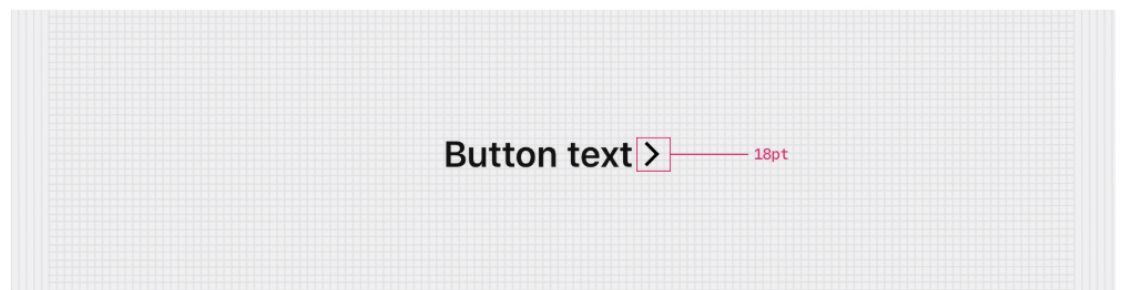

Don't

Box button and Text button cannot be placed horizontally together.

Design spec

Text button does not allow design customization.

Text button is provided in three sizes of Large, Medium, and Small, and the icon is an optional area that does not need to be used depending on circumstances. Text button requires Design QA.

Request placement QA

Delete Account

Request design QA

Text buttons can be positioned anywhere on the screen, but we recommend to use one text button per line. It requires design QA as there is no fixed placement and no margin is included in the component.
