Text

Four input states are provided according to the input interactions. The Placeholder state indicates that no user actions have been made. When the text input is selected, the input container changes to the On Focus state, and an Erase icon is provided in the tailing icon area. When one or more characters have been entered, the On Typing state is provided for the input container. When the user has left the input container by selecting another area after completing the input, the input container changes to the Typed state.

Error

Please enter a valid email address

Confirm

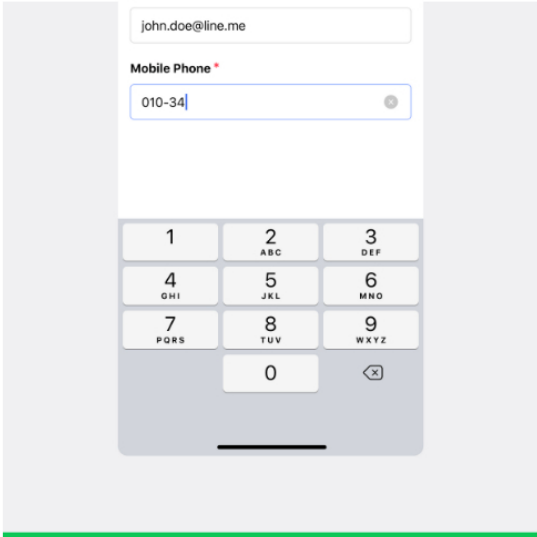

Don't

Do not wait until user input is complete to provide an error notification. Provide the notification while the user input is being made.

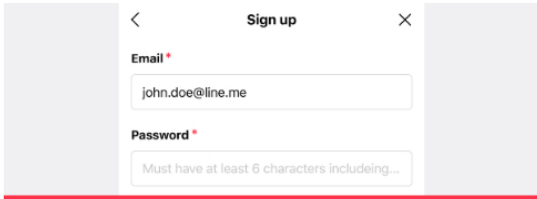

Do

Provide information about the text input, such as the restrictions, through the help text.

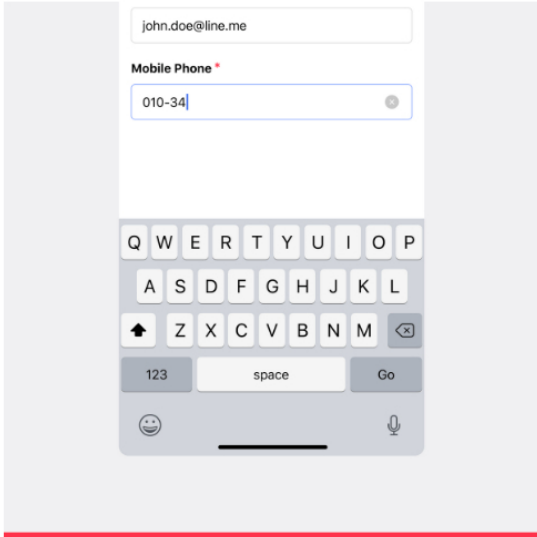

Do

Provide a keyboard that suits the input format.
If only numbers are required in the input field, allow only number inputs and provide a numeric keypad on mobile devices.

Don't

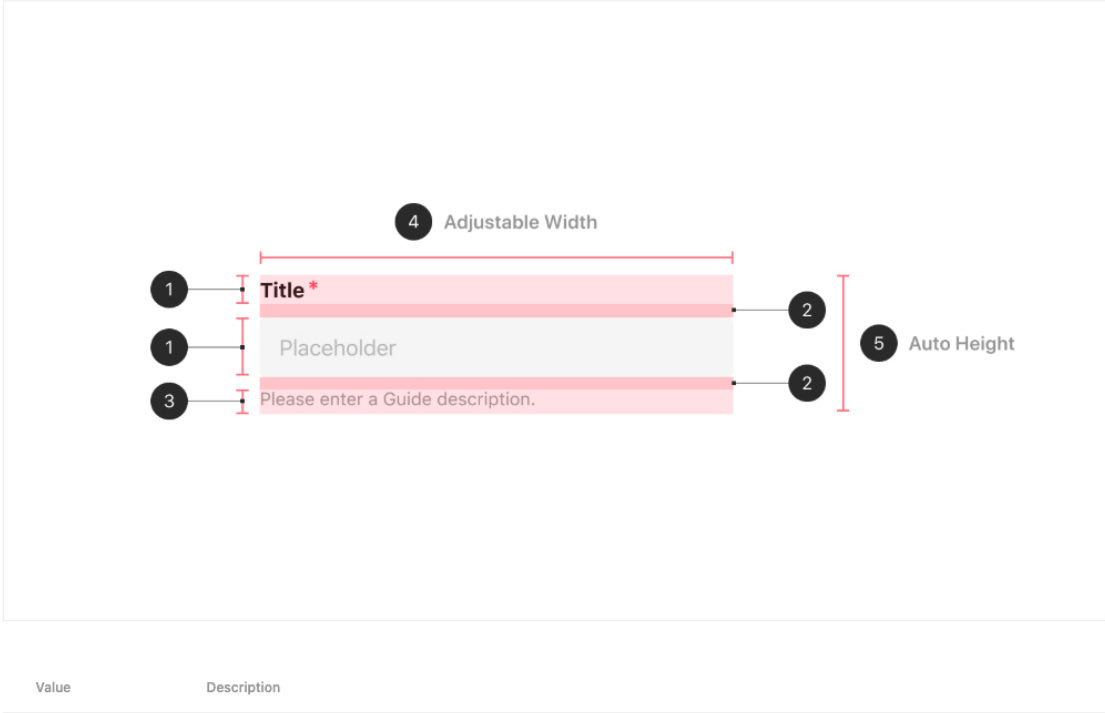

Do not provide information about the text input, such as the restrictions through placeholders.

Don't

Do not provide keyboards that do not suit the input formats.
Do not provide a text keyboard if only number inputs are required.

Design Specs

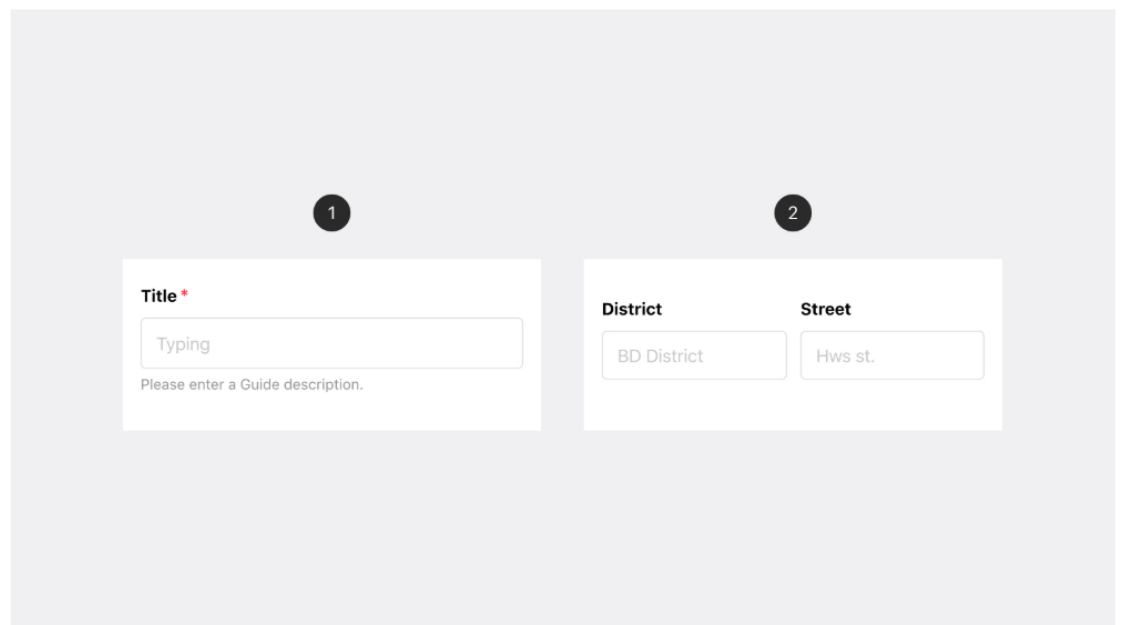

1 Fixed Height

- A fixed height value. The container size cannot be changed without changing the font size.

-
- | | |
|-----------------------|--|
| 2 Fixed Margin | <ul style="list-style-type: none">• A fixed margin value that cannot be changed. |
|-----------------------|--|
-
- | | |
|----------------------|--|
| 3 Auto Height | <ul style="list-style-type: none">• The height is automatically adjusted according to the text length. |
|----------------------|--|
-
- | | |
|---------------------------|---|
| 4 Adjustable Width | <ul style="list-style-type: none">• Users can freely set the width.• The width (screen width - left and right margins) is provided by default. |
|---------------------------|---|
-
- | | |
|----------------------|--|
| 5 Auto Height | <ul style="list-style-type: none">• The value changes according the height in (3). |

You can change the properties of an input area that is included in a text input. To change the State and Typing State properties, you need to configure the text Input options instead of making the changes with the component.

Option Name	Options				Description
States	Enabled	Disabled			This option cannot be changed with the input area.
Typing States	Placeholder	On Focus	On Typing	Typed	This option cannot be changed with the input area.
Prefix	True	False			You can select whether to provide a title.
Suffix	True	False			You can select whether to provide the "Required" indication.
Tailing Icon	True	False			You can select whether to provide the help text.
