Text Option

You can select whether to use the text option. The text must not exceed a single line when it is used.

Icon Option

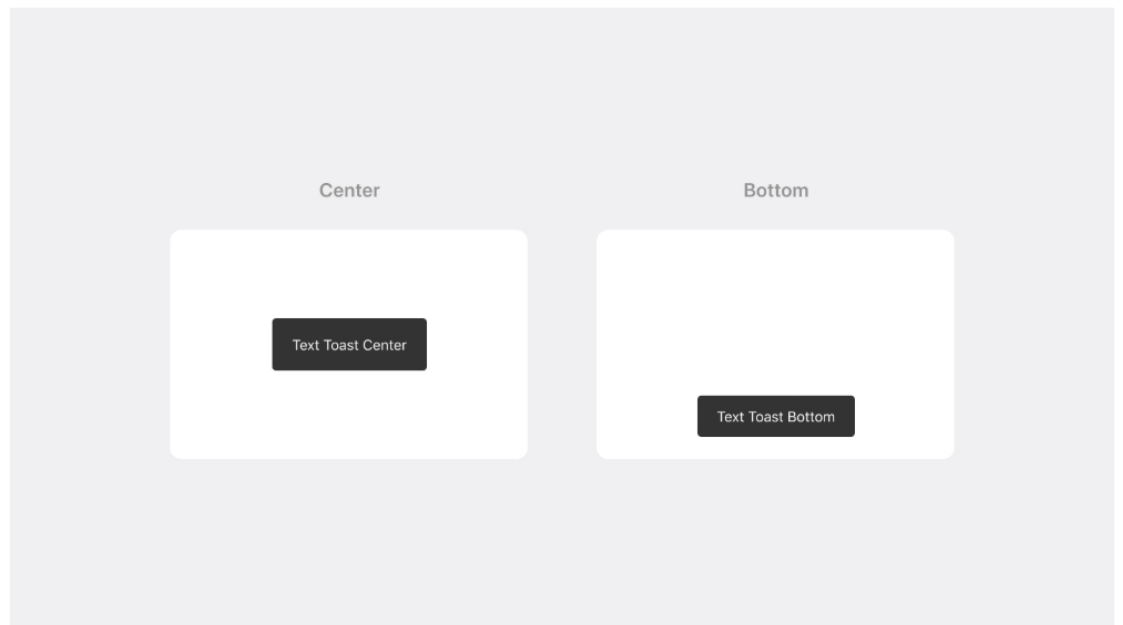

You can select the icon options. Three icon options and labels are provided, and you can change the labels if needed. If you select the custom option, you can add an icon of your choice.

Text Toast

It is a component that provides only text and you can select options for the position on the screen and the number of lines.

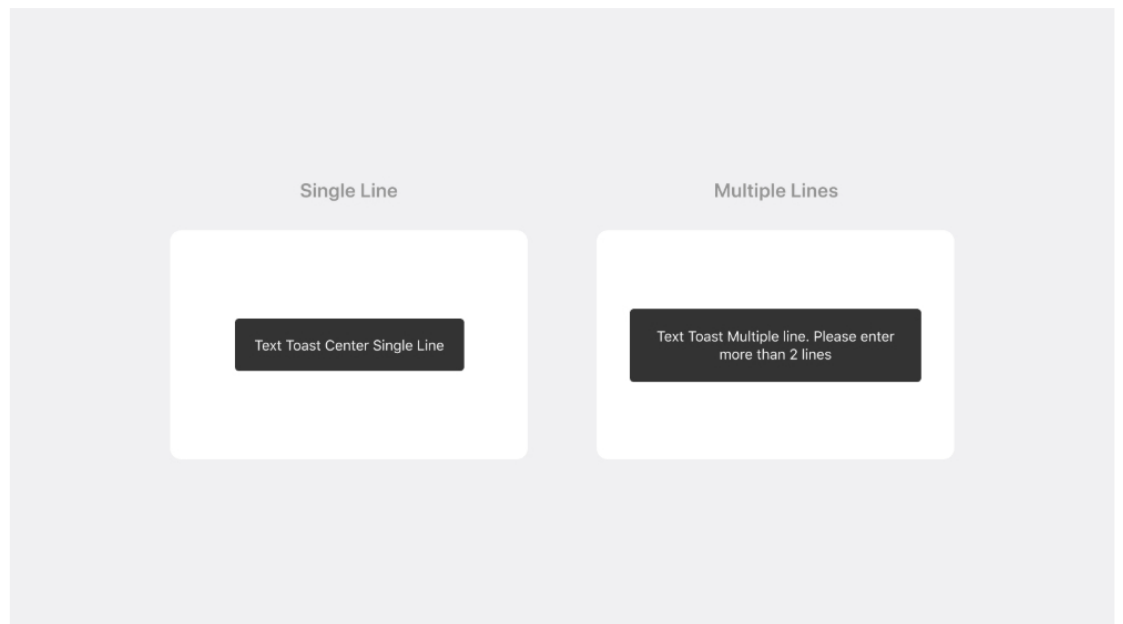

Position	Center	Bottom
Number of Line	Single	Multiple

Position

Select the center or bottom alignment option. Be careful when you select the alignment option because the two options provide quite different designs.

Number of Line

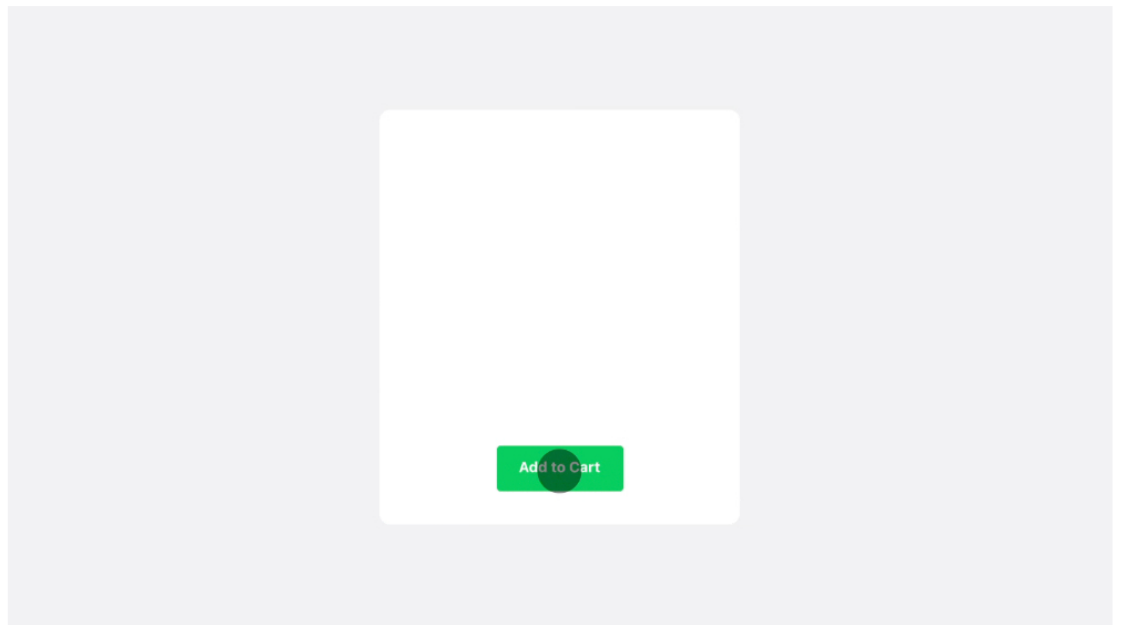

This option sets the number of lines: "Single Line" or "Multiple Lines" The container width is adjusted based on the left and right margins for the "Single Line" option, whereas the width is fixed and the height is adjusted according to the number of lines for the "Multiple Line" option.

Behavior

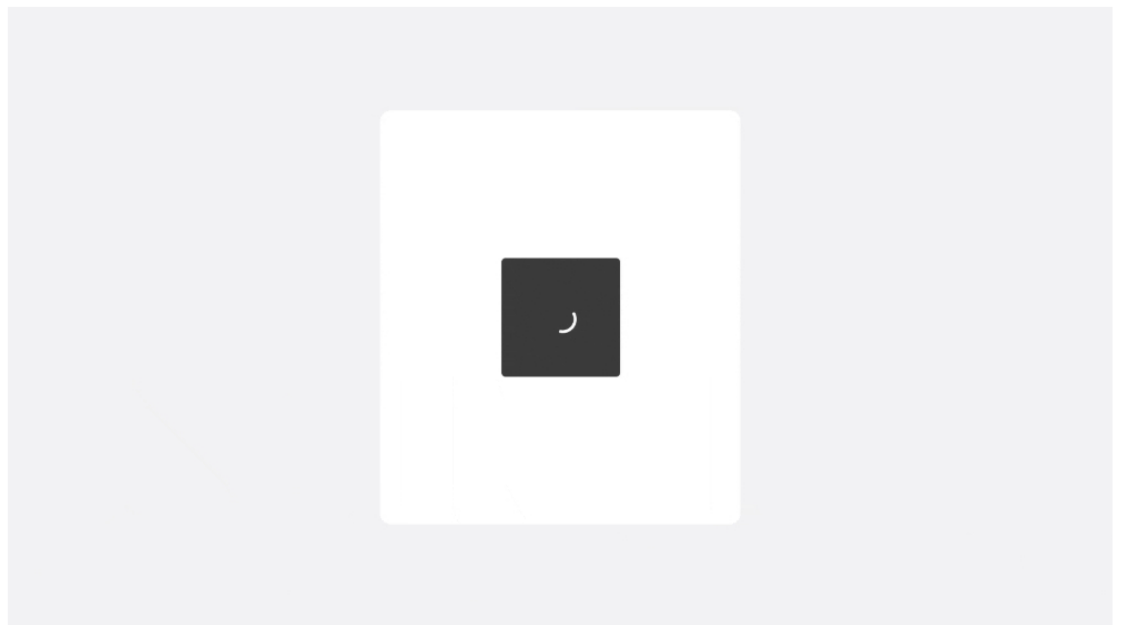

This option allows the element to appear with a specific trigger and automatically disappears. Toast overlays cannot be forcibly terminated by user actions.

Appear and Disappear without Loading

Appears when the user action is made and disappears after four seconds.

Appear and Disappear with Loading

For the icon toast element, you can set an option to add the loading status. When the loading status option has been added, the icon and text are displayed in a toast message after the loading is complete and they disappear after N seconds. For a text toast, the loading text "Loading" is provided and the entered text string is displayed after the loading is complete.

Usage

It is used for simple information that does not require additional user interaction. Consider using a pop-up message or snackbar instead, according to the attention level.

Consider Attention Level

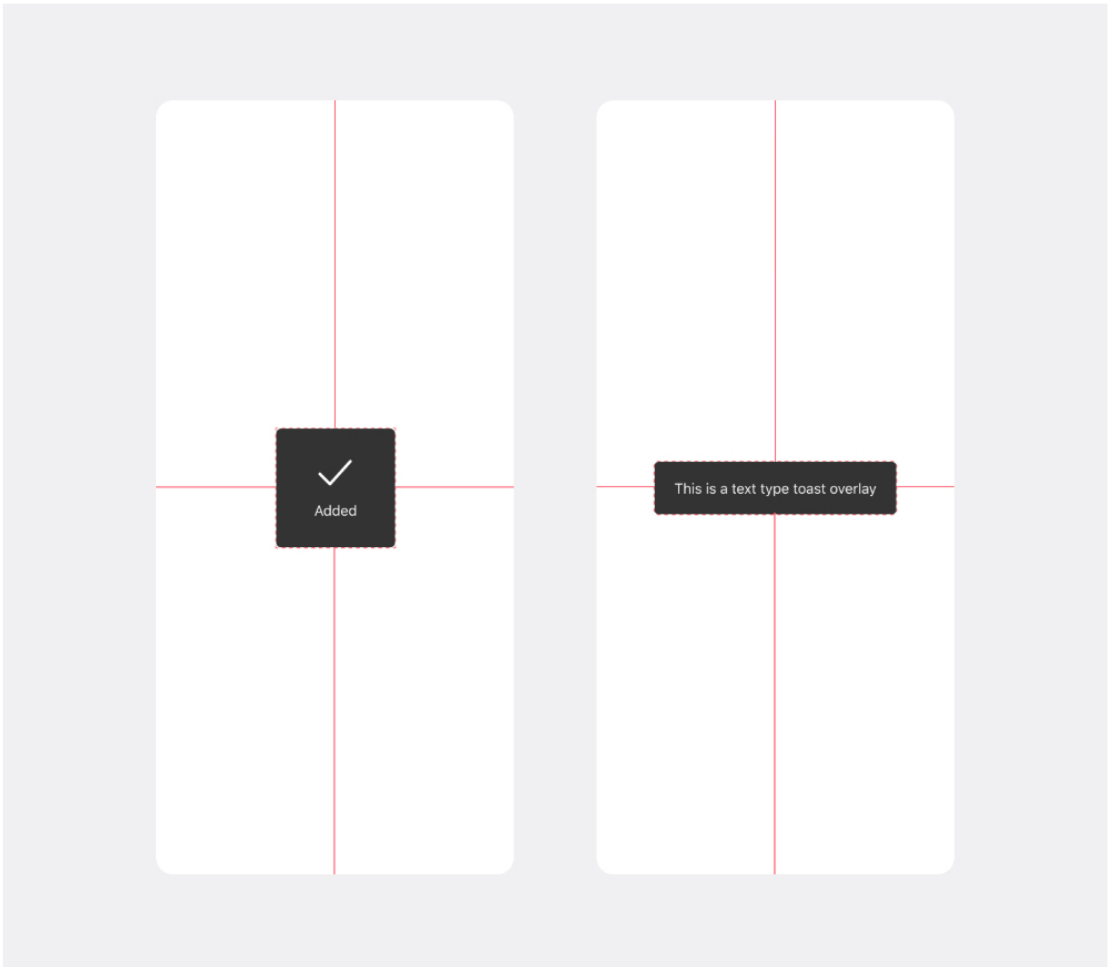

Provides a toast overlay as the feedback to a user action. The displayed toast overlay must reflect the feedback to the action on the screen. For example, when a heart icon is selected, a toast overlay may be provided after the heart icon has been filled.

Design Specs

Placement

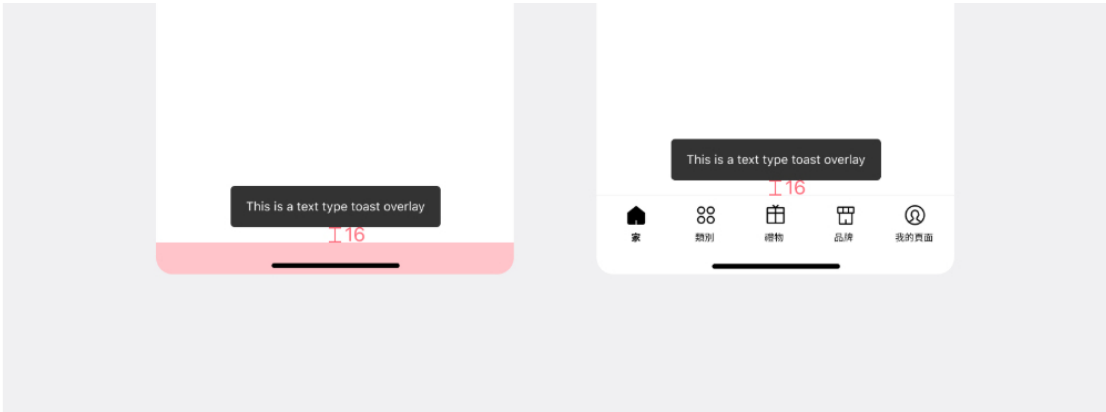

Center

The center placement always aligns icons and toast messages in the center of the screen.

Bottom

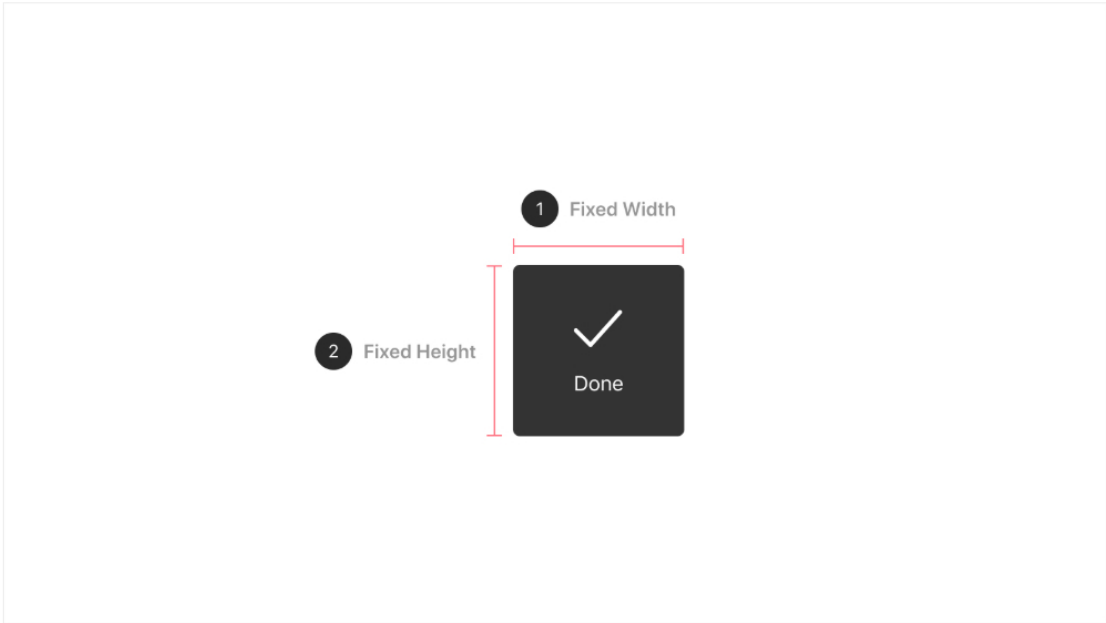

The bottom placement requires a margin of at least 16px from the bottom edge of the device screen. On devices that provide indicators at the bottom, such as iPhone X, or if the screen has bottom tabs, a margin of at least 16px is required from the bottom element.

Value	Description
	Changeable
Bottom	- Default: 16px - Minimum: 16px

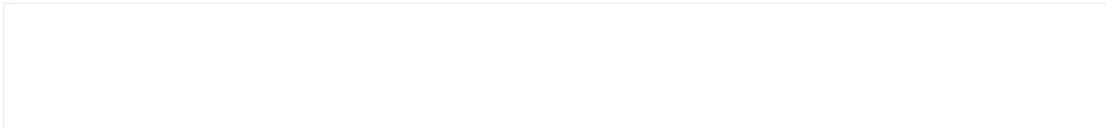

Resizing

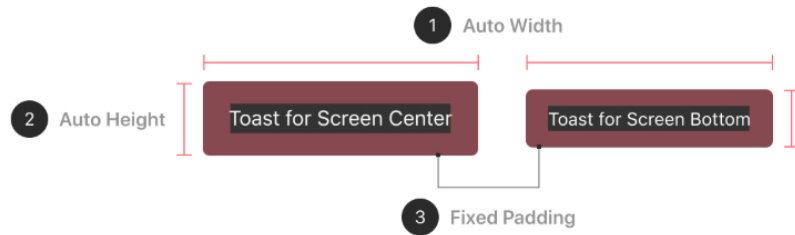

Icon Toast

	Element	Description
1	Width	A fixed width value that cannot be changed.
