Tooltip

In most cases, tooltips are used for displaying a Help menu on a specific feature or an updated service. It helps users on the unfamiliar features that cannot be directly recognized from the UI. It is also used for additional description if there are promotions on a specific area (e.g., button).

Anatomy

1. Background

Use colors that visually emphasize the text of a tooltip.

Use the colors set in the guide.

The tooltip will be deleted when BG is selected if there is no Close button.

2. Arrow

Located near the element (e.g. button) explained by the text.

3. Close Button (Optional)

If selected, the tooltip will be deleted. If the Close button is not provided, the rule for deleting the tooltip must be followed precisely.

4. Text area

Display the details to be explained.

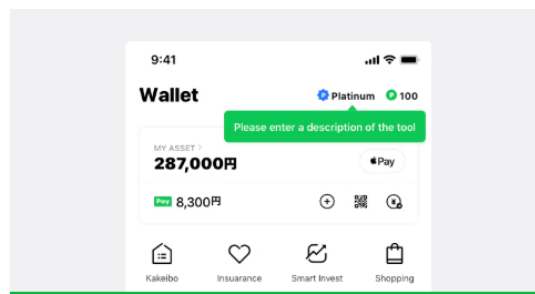

It is recommended to not exceed three text lines. Information that can be checked by scrolling is not provided.

5. Button (Optional)

If selected, an action of redirecting to the respective page will be executed. The text included in the respective area will be provided as up to one line.

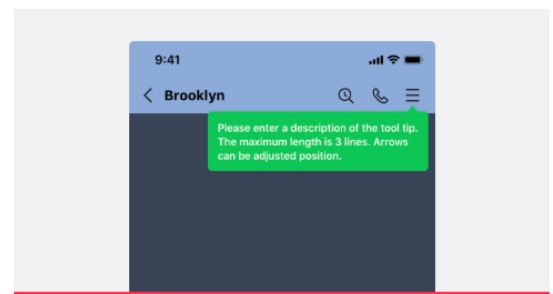

6. Icon Area (Optional)

Expose the icon related to the details to be explained.

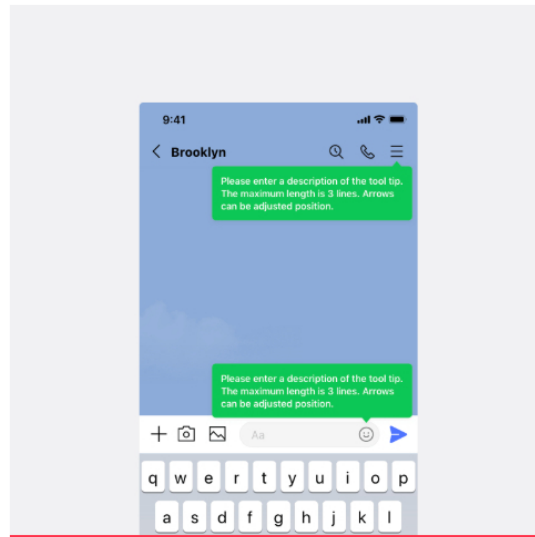

Do

Place near the specific area explained by the tooltip.

Don't

Avoid using with the dimmed screen at the same time when exposing a tooltip.

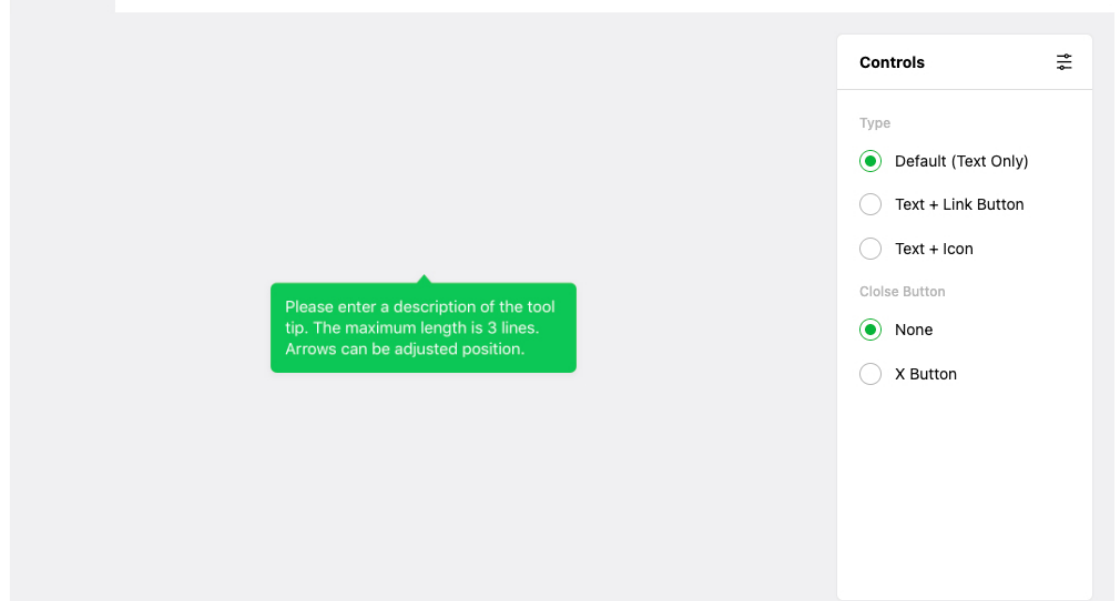

Don't

Do not use more than one tooltip per page.

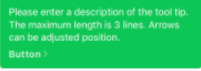

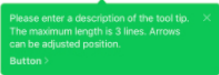

Types

Based on the tooltip configuration, the component type and UX rules will be different.

Common

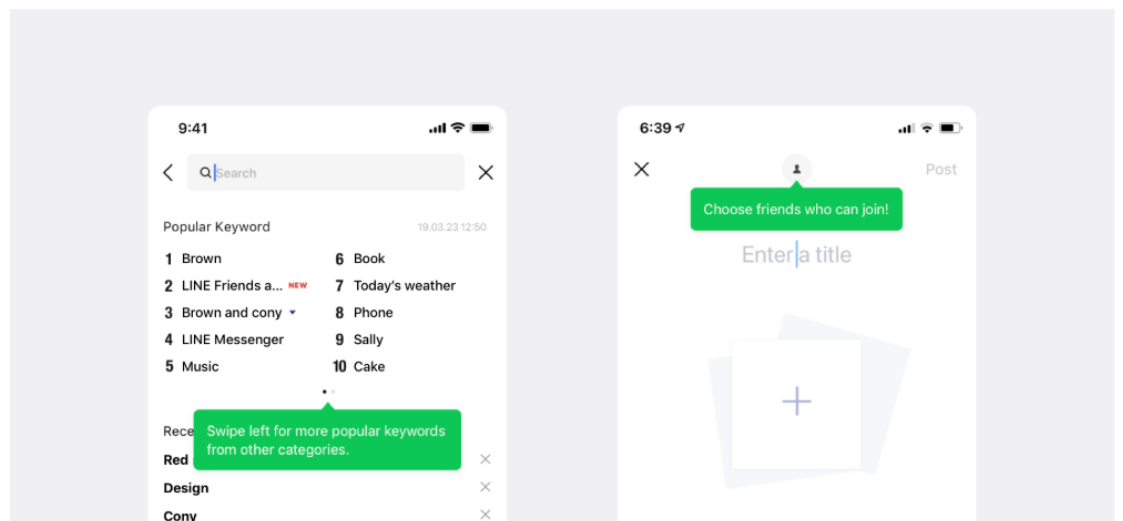

- If a button to close is not provided in the tooltip, the tooltip will be deleted when another area is selected or when the tooltip component itself is selected.
- If the X button is provided, the tooltip will be deleted right away if selected.

Text Only		This is a type used when a brief explanation must be provided on a specific feature. It is used for tooltips that only have phrases without buttons.
Text + Link Button		This is a type used when a method to redirect the user somewhere must be provided by placing a link button along with a brief explanation of a specific feature. It will be deleted after following the link by selecting the button or selecting the tooltip component itself except for the button link area.
Text + Icon		This is a type used when an icon must be provided along with a brief explanation of a specific feature. The icon area will not have any action even if selected.
Text + Close Button		This is a type made to be deleted right away by placing an X button along with a brief explanation of a specific feature. A Close button is used together with the text. The tooltip will be deleted if the Close button is selected.
Text + Link Button + Close Button		This is a type used when a method to redirect the user somewhere must be provided by placing a link button along with a brief explanation of a specific feature. The tooltip will be deleted if the Close button is selected and redirected if the button link is selected.
Text + Icon + Close Button		This is a type used when an icon must be provided along with a brief explanation of a specific feature. The icon area will not have any action even if selected. The tooltip will be deleted if the Close button is selected.

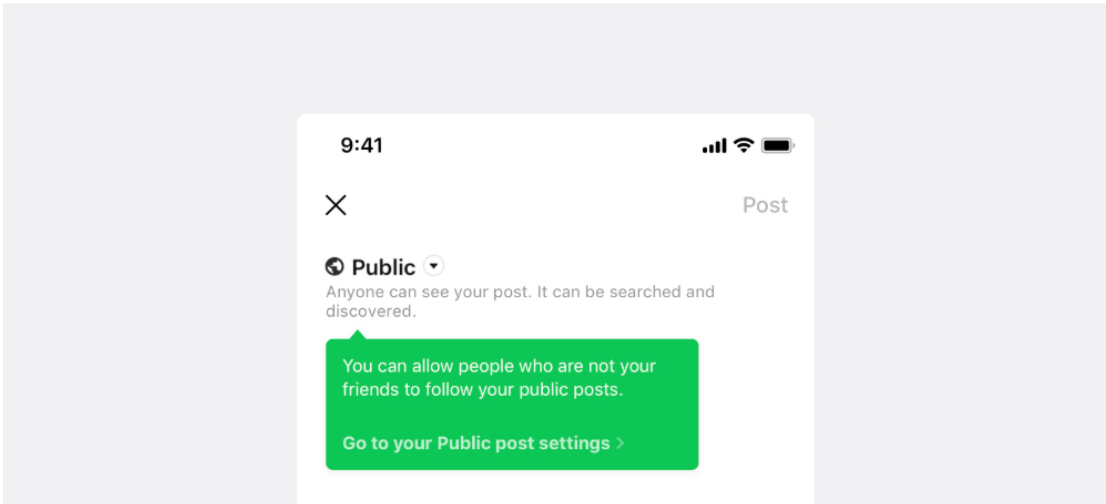

Usage

General Usage

- Tooltips are used to help users on the unfamiliar features or the features that cannot be directly recognized from the UI.
- They're used for the purpose of displaying a Help menu on a specific feature or an updated service in most cases.

Text+Button Case

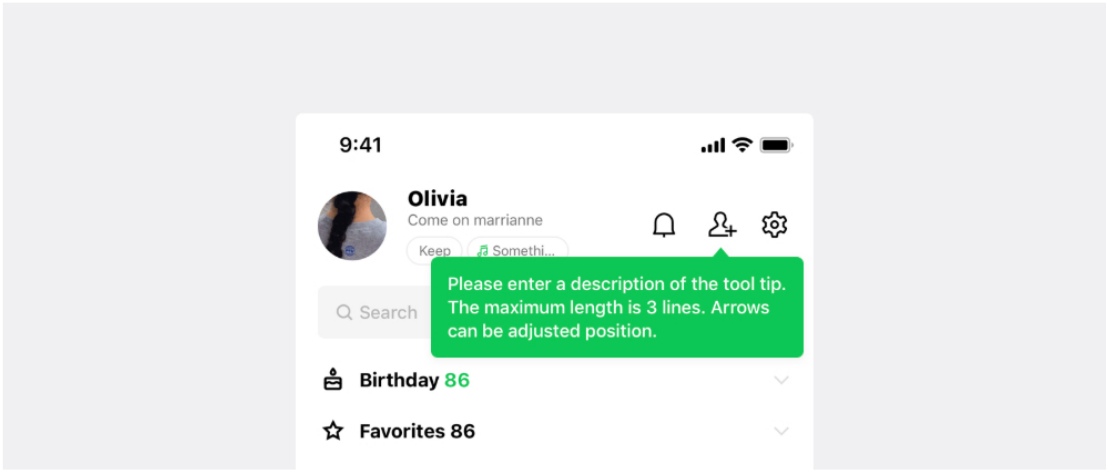

This is used when you need to provide a link related to the details displayed in text on the tooltip and send to the relevant page.

Interaction

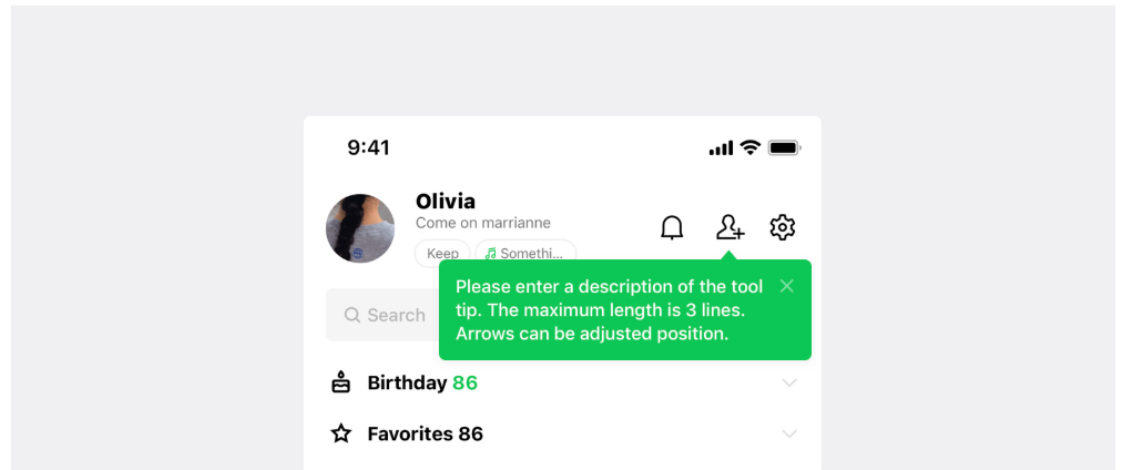

Describes the conditions for exposure/re-exposure/delete listed above.
If priority of the message details given in the text area is low, it is recommended to use this type if there is no X button. If priority of the message details given in the text area is high, it is recommended to use this type if there is an X button.

Text only (Default type)

When to Use	It is easily removed, so it is recommended to use when the priority of the text details is low
Exposure Rules	Automatic exposure: Exposed when entering a screen that requires a tooltip. Conditional exposure: Exposed when the set conditions have been prepared.
Re-exposure Rules	Conditions for re-exposure Re-exposed during the re-entry even if removed after selecting an area other than the element explained by the tooltip or when the page is scrolled. Re-exposed by also initializing the tooltip conditions if the app has been reinstalled. Re-exposed during the re-entry after deviating from the page without removing. Conditions for no re-exposure Not re-exposed afterwards in case of selecting the specific element explained by the tooltip Not re-exposed after the exposure period specified in Admin.
Delete Rules	Manual delete Deleted permanently if the specific element explained by the tooltip is selected. Deleted when an area other than the element explained by the tooltip is selected or when the page is scrolled. Deleted when the background area of the tooltip itself is selected.
Avoid Rules	Do not use more than one tooltip per page. Do not use the auto-delete (disappears after N seconds), which deletes the item even when the user didn't take any actions Avoid using with the dimmed screen at the same time when displaying a tooltip.

Text + Close Button

When to Use It is harder to remove than the default type, so it is recommended to use when the priority of the text details is high.

Exposure Rules Automatic exposure: Exposed automatically when entering a screen that needs a tooltip.

Re-exposure Rules

Conditions for re-exposure

- Re-exposed by also initializing the tooltip conditions if the app has been reinstalled.
- Re-exposed during the re-entry after deviating from the page without removing.
- Deleted when the X button is selected.

Conditions for no re-exposure

- Not re-exposed afterwards in case of selecting the specific element explained by the tooltip
- Not re-exposed after the exposure period specified in Admin.

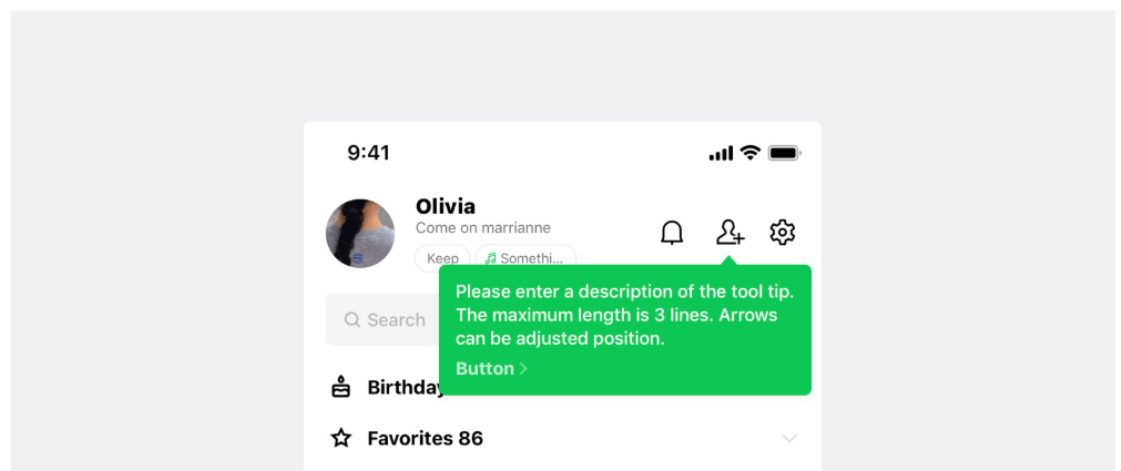

Delete Rules

- Manual delete
- Deleted only when the X button is selected.
- Deleted permanently if the element explained by the tooltip is selected.

Avoid Rules

- Do not use more than one tooltip per page.
- Avoid using with the dimmed screen at the same time when exposing a tooltip.

Text + Link Button

Exposure Rules Automatic exposure: Exposed automatically when entering a screen that needs a tooltip.

Re-exposure Rules

Conditions for re-exposure

- Re-exposed during the re-entry even if removed after selecting an area other than the element explained by the tooltip or when the page is scrolled.
- Re-exposed by also initializing the tooltip conditions if the app has been reinstalled.
- Re-exposed during the re-entry after deviating from the page without removing.

Conditions for no re-exposure

- Not re-exposed for selecting the specific element explained by the tooltip
- Not re-exposed if redirected to the relevant page by selecting the button.

Not re-exposed after the exposure period specified in Admin.

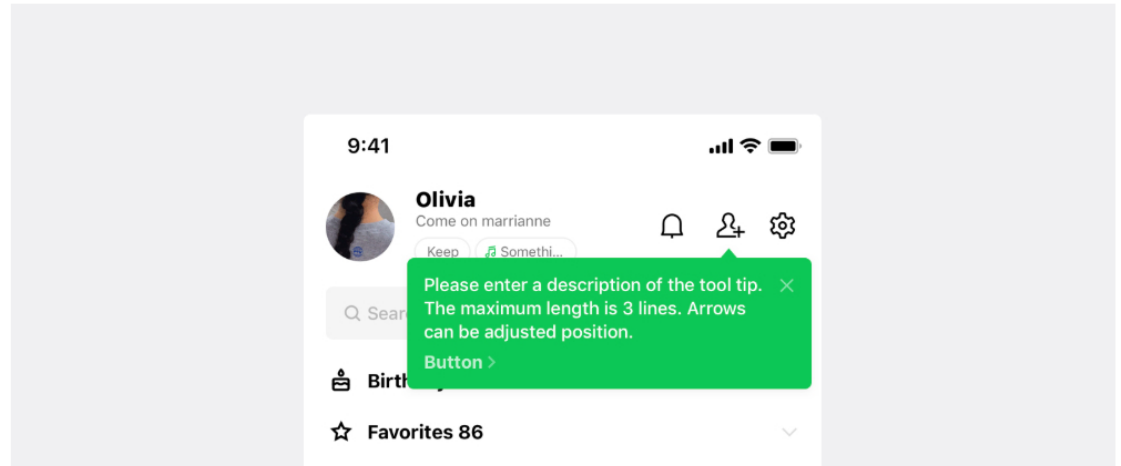

Delete Rules

Manual delete
Deleted if the element explained by the tooltip is selected.
Deleted when an area other than the element explained by the tooltip is selected or when the page is scrolled.
Deleted if redirected to a link by selecting the button.
Deleted when the background area of the tooltip itself is selected.

Avoid Rules

Do not use more than one tooltip per page.
Avoid using with the dimmed screen at the same time when exposing a tooltip.

Exposure Rules Automatic exposure: Exposed automatically when entering a screen that needs a tooltip.

Re-exposure Rules

Conditions for re-exposure

Re-exposed during the re-entry even if removed after selecting an area other than the element explained by the tooltip or when the page is scrolled.

Re-exposed by also initializing the tooltip conditions if the app has been reinstalled.

Re-exposed during the re-entry after deviating from the page without removing.

Conditions for no re-exposure

Not re-exposed in case of selecting the element explained by the tooltip

Not re-exposed after the exposure period specified in Admin.

Delete Rules

Manual delete

Deleted if the element explained by the tooltip is selected.

Deleted when an area other than the element explained by the tooltip is selected or when the page is scrolled.

Deleted when the background of the tooltip itself is selected.

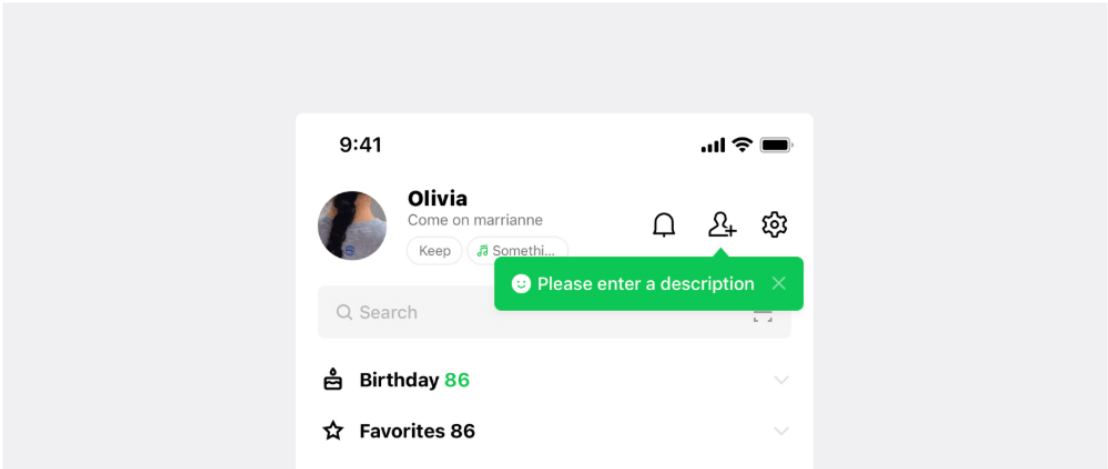

Avoid Rules

Do not use more than one tooltip per page.

Avoid using with the dimmed screen at the same time when exposing a tooltip.

If content is included, illustrations may not be included and only the icon is included.

Text + Icon + Close Button

Exposure Rules Automatic exposure: Exposed automatically when entering a screen that needs a tooltip.

Re-exposure Rules

Conditions for re-exposure

Re-exposed by also initializing the tooltip conditions if the app has been reinstalled.

Re-exposed during the re-entry after deviating from the page without removing.

Deleted when the X button is selected.

Conditions for no re-exposure

Not re-exposed afterwards in case of selecting the specific element explained by the tooltip

Not re-exposed after the exposure period specified in Admin.

Delete Rules

Manual delete

Deleted only when the X button is selected.

Deleted permanently if the element explained by the tooltip is selected.

Avoid Rules

Do not use more than one tooltip per page.

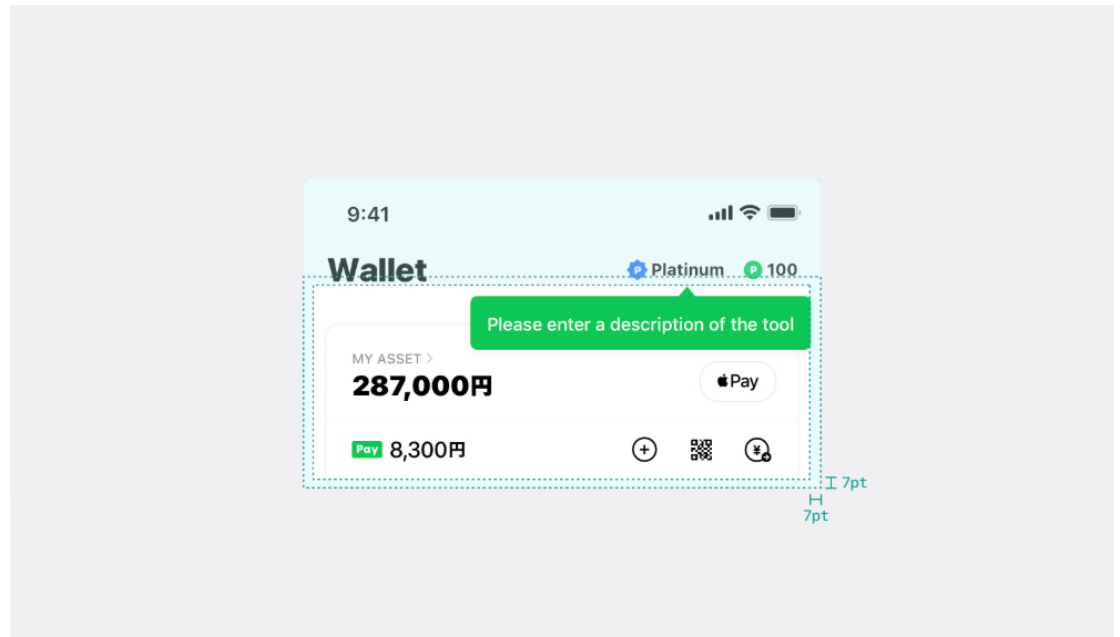

Avoid using with the dimmed screen at the same time when exposing a tooltip.

If content is included, illustrations may not be included and only the icon is included.

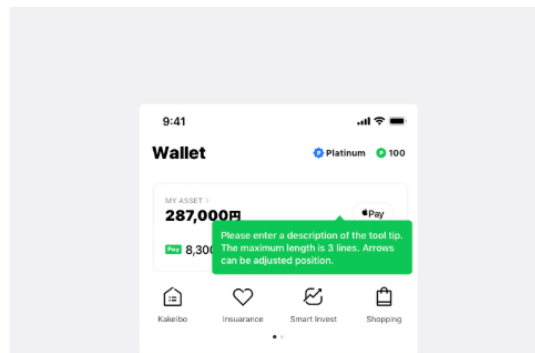

Placement

Tooltips include the following common layout rules.

All Type Common

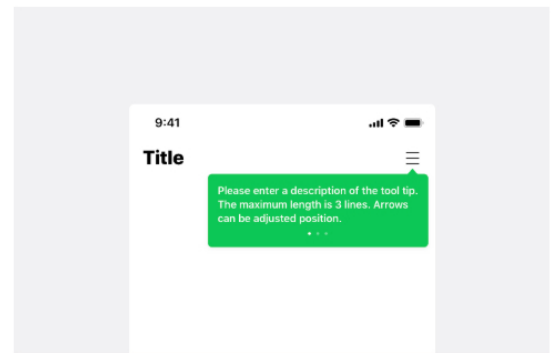

- If a tooltip is placed near the top, bottom, left, or right corner, it is placed with a space of 7pt.
- The arrow (▲) of tooltip is located near the element explained by the tooltip.

Don't

Do not place the explanation on the button far away.

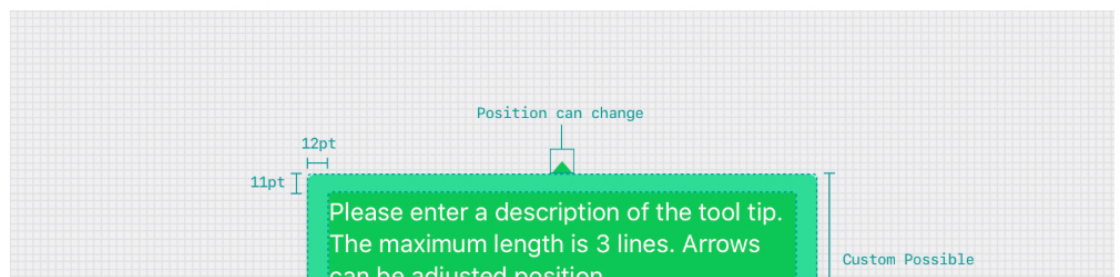

Don't

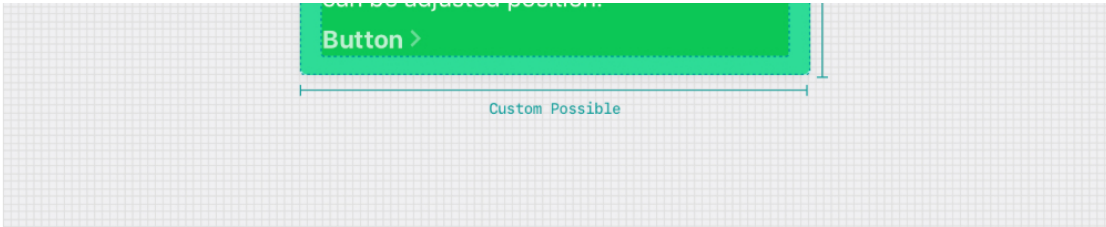

Do not use the process type to swipe by inserting pagination into the tooltip.

Design spec

Because tooltips allow customization according to the case, detach the symbol for use. However, customization should follow the design guide.

All Type Common

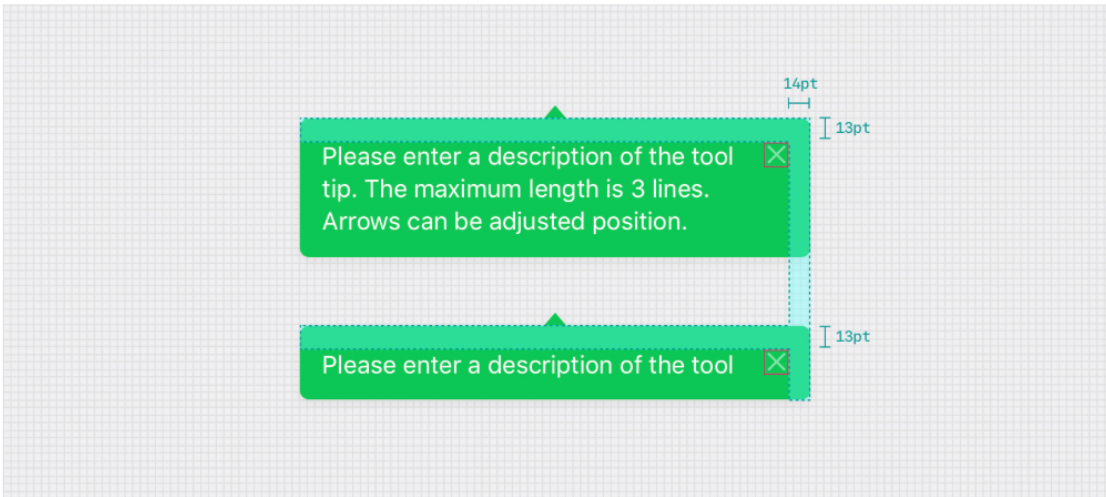

The width of tooltip and the location of the arrow can be adjusted depending on the case. However, they are not allowed to modify the margin and text between BG and the text area nor the button style. Design QA must be carried out for the modified width and the arrow location.

Element	Max line	Max width
Description	Recommended within 3 lines	No limit
Button Text	1line	No limit

Close Button

The location of the X button is fixed regardless of the description length.
