Typography

The typography provides a typographic system to ensure that the designers at LINE can create consistent designs by using the web-certified font families, font weights, and letter spacing. In the typographic system, individual unique names have been specified as design tokens. The typographic system provides the title and text types and specifies their usage. The typographic system was designed to maintain the compatibility in four languages and the language pack is also available.

Typography Token Name

`$lds-g-en-title-xxl-200`**EN / Title / XXL 38 / Bold**

4

Font Size

5

Font Weight

The typography token name consists of five elements. Although the same element names are shared in the Figma and CSS libraries, there are small differences in use. For detailed information, see the following table.

Category	Description
	Four languages (English, Japanese, Traditional Chinese, and Thai) are supported, and each language is described as follows:
1 Language	- English: EN - Japanese: JP - Traditional Chinese: TC - Thai: TH
2 Type	Indicates the typography type. Title and text types are available.
3 Size	Indicates the relative sizes in the typographic system with alphabetical letters. XS, S, M, L, XL, and XXL are used.
4 Font Size	Indicates the absolute text sizes with numbers. This notational system is used to conveniently view the font sizes in design files and it is not used for CSS tokens.

	Indicates the width of the text.
5 Weight	100, 200, and 300 are used for CSS tokens because different languages and fonts have different notational systems for text widths.

Usage

Title and Text types are provided. The line height to ensure the legibility of each type is included. Use them according to the usage specified in the following table.

- Title: Used for titles, including headlines with H1 through H6 heading levels, list titles, and subtitles. This type uses small line heights.
- Text: Used for main content, such as paragraphs, and button labels. This type uses highly legible line heights.

Type	Size	Token	Usage
Title	XXL	ldsg-typography-title-xxl	Headings
	XL	ldsg-typography-title-xl	Headings
	L	ldsg-typography-title-l	Headings, List Item Title, Sub Title
	M	ldsg-typography-title-m	Headings, List Item Title, Sub Title
	S	ldsg-typography-title-s	Headings, List Item Title, Sub Title
	XS	ldsg-typography-title-xs	Headings, List Item Title, Sub Title
Text	L	ldsg-typography-title-l	Body, Button Label
	M	ldsg-typography-text-m	Body, Button Label, Sub Text Caption, Overline, Badge
	S	ldsg-typography-text-s	Body, Button Label, Sub Text Caption, Overline, Badge
	XS	ldsg-typography-text-xs	Body, Button Label, Sub Text Caption, Overline, Badge

Language Pack

Without Language Pack

More than just a messenger app. LINE is new level of communication, and the very infrastructure of your life.

メッセージアプリを超え、新しいコミュニケーションの形を目指して、新時代のインフラ体験をLINEはひとりひとりに届けていきます。

超越通訊軟體，LINE為用戶建構全新的溝通型態與豐富的數位生活，成為用戶生活中不可或缺的平台。

นอกเหนือจากแอปพลิเคชันสื่อสารและส่งข้อความ LINE มุ่งสร้างประสบการณ์และบริการที่ช่วยให้ชีวิตประจำวันของคุณเป็นเรื่องง่ายยิ่งขึ้น

Depending on the characteristic of the languages, texts in the same font may have varying legibilities and visual impressions. Therefore, even when the same font settings are used, the legibility and impressions of a design may vary when the design is converted using another language. To solve this problem, we provide the LINE Design System for Global Family Service (LDSG) Language Pack.

The LDSG Language Pack supports English, Japanese, Traditional Chinese, and Thai, and provides optimized typography for these languages. The use of the LDSG typography ensures easy conversion of designs to use other languages and allows for highly compatible sharing of components between the LINE Global Family Service in various countries.

File Structure

The LINE Design System for Global Family Service (LDSG) Library uses English as the default language. The language pack files are separated from the library files. Therefore, the language pack files must be linked with the library files before you can design using languages other than English.
